

Table of Contents

General Physiology	1
SI Units	1
Length, Area, Volume	2
Frequency, Velocity, Acceleration	2
Work, Energy, Heat, Power	2
Mass, Quantity, Concentration	2
pH, pK, buffers	3
Temperature	5
Electrical Units	6
Osmolarity, Osmolality, Osmotic and Oncotic Pressure	6
Properties of Living Systems	7
Transport Processes in Living Systems	7
The Role of Ca^{2+} Ions in the Regulation of Cellular Processes	12
The Production and Transformation of Energy	13
Control and Transmission of Information	17
The Cell	17
 Nerve and Muscle	 22
Structure and Function of the Nerve Cell	22
Resting Membrane Potential	24
Action Potential	26
Propagation of the Action Potential in Nerve Fibers	28
Synaptic Potentials	30
The Motor Unit	32
Neuromuscular Junction	32
Contractile Machinery I	34
Contractile Machinery II	36
Molecular Events in Muscle Contraction	38
Muscle Mechanics I	40
Muscle Mechanics II	42
Smooth Muscle	44
Energy for Muscle Contraction	46
Exercise	48
 Autonomic Nervous System	 50
Organization of the Autonomic Nervous System	50
Acetyl Choline – Cholinergic transmission	54
Norepinephrine – Adrenergic Transmission	56
The Adrenal Medulla	58
 Blood	 60
Composition and Function of the Blood	60
Iron Metabolism, Erythropoiesis and Anemias	62
Flow Properties of the Blood	64
Plasma Components	64
Immune Defense I	66
Immune Defense II	68
Immune Defense III	70
Blood Groups	72

Allergies	72
Organ Transplantation	72
Hemostasis	74
Blood Clotting and Fibrinolysis	76
Respiration	78
The Lungs	78
Functions of Respiration	78
Respiratory Mechanics	80
Cleansing of the Inspired Air	80
Artificial Respiration	82
Pneumothorax	82
Respiratory Volumes and the Spirometer	84
Dead Space and Residual Volume	86
Pressure-Volume Curves, Work of Breathing	88
Surface Tension of the Alveoli	90
Gas Exchange in the Lung	92
Pulmonary Blood Flow, Ventilation-Perfusion Ratio	94
CO ₂ Transport in Blood	96
CO ₂ Binding and Distribution in Blood	98
CO ₂ in the Cerebrospinal Fluid	98
O ₂ Binding and Transport in Blood	100
O ₂ Deficit – Hypoxia	102
Control of Respiration	104
Respiration at Elevated Barometric Pressure: Diving	106
Respiration at High Altitude	108
O ₂ Toxicity	108
Acid-Base Balance	110
pH – Buffers – Acid-Base Balance	110
Bicarbonate/CO ₂ Buffer	112
Metabolic Disturbances in Acid-Base Balance	114
Respiratory Disturbances in Acid-Base Balance	116
Determination of Acid-Base Status	118
Kidney, Salt and Water Balance	120
Kidney: Anatomy and Function	120
Renal Circulation	122
Glomerular Filtration, Clearance	124
Tubular Transport I	126
Tubular Transport II	128
Selection, Detoxification, Excretion	130
Renal Handling of Na ⁺ and Cl ⁻	132
Countercurrent Systems	134
Water Resorption, Concentration and Dilution in the Kidney	136
Water Balance, Body Fluid Compartments	138
Salt and Water: Hormonal Control	140
Disturbances in Salt and Water Homeostasis	142
Diuresis and Diuretics	142
The Kidney and Acid-Base Balance	144
Nitrogen Metabolism and Excretion	146
Potassium Balance	148
Mineralocorticoids	150

Excretion of Ca^{2+} and Phosphate.....	151
Renin-Angiotensin Mechanism.....	152
Heart and Circulation	154
Cardiovascular System.....	154
Blood Vessels.....	156
Transcapillary Exchange.....	158
Blood Pressure.....	160
The Cardiac Cycle.....	162
Excitation and Conduction in the Heart.....	164
Control of Excitation of the Heart.....	164
Disturbances of Excitation of the Heart.....	166
Electrocardiogram.....	168
Abnormalities in Cardiac Rhythm (Arrhythmias).....	174
Control of the Circulation.....	176
Regulation of Stroke Volume.....	182
Cardiac Work.....	182
Cardiac Response to Changes in Preload and Afterload.....	184
Veins.....	184
Circulatory Shock.....	186
Coronary Blood Flow, Myocardial Metabolism.....	188
Measurement of Blood Flow.....	188
Fetal Circulation.....	190
Heat Metabolism and Thermoregulation	192
Heat Metabolism.....	192
Thermoregulation.....	194
Nutrition and Digestion	196
Nutrition.....	196
Energy Metabolism, Calorimetry.....	198
Digestive Organs, Intestinal Blood Flow and Defense Mechanisms.....	200
Saliva.....	202
Deglutition – Vomiting.....	204
Stomach: Structure and Motility.....	206
Gastric Secretion.....	208
Small Intestine: Structure and Motility.....	210
Pancreatic Juice – Bile.....	212
Bile Production, Hepatic Excretion.....	214
Bilirubin – Jaundice.....	216
Digestion of Lipids.....	218
Fat Absorption and Triglyceride Metabolism.....	220
Lipoproteins, Cholesterol.....	222
Digestion of Carbohydrates and Proteins.....	224
Absorption of Vitamins.....	226
Absorption of Water and Electrolytes.....	228
Colon, Rectum, Defecation.....	230
Hormonal Control	232
Physiological Integration.....	232
Hormones.....	234
Feedback Control. General Hormone Effects.....	238
Hypothalamic – Hypophyseal System.....	240

Cyclic AMP as Second Messenger.....	242
Steroid Hormones.....	244
Phosphoinositide – derived Second Messengers.....	244
Carbohydrate Metabolism. Pancreatic Hormones.....	246
Thyroid Hormones.....	250
Calcium and Phosphate Homeostasis.....	254
Bone Metabolism.....	256
Biosynthesis of Steroid Hormones.....	258
Adrenal Cortex. Glucocorticosteroids.....	260
Menstrual Cycle.....	262
Regulation of Hormone Secretion during the Menstrual Cycle.....	264
Prolactin.....	264
Estrogens.....	266
Gestagens.....	267
Endocrinology of Pregnancy.....	268
Androgens, Sexual Differentiation.....	270
Central Nervous System and Senses.....	272
Anatomy of the Central Nervous System (CNS).....	272
Cerebrospinal Fluid.....	272
Processing of Informational Input.....	274
Superficial Senses (Skin), Pain.....	276
Proprioception, Monosynaptic Reflexes.....	278
Polysynaptic Reflexes.....	280
Synaptic Inhibition.....	280
Central Processing of Sensory Input.....	282
Motor Activity – Motor Hold System.....	284
Function of the Cerebellum.....	286
Motor Move System – Purposeful Motor Control.....	288
Hypothalamus, Limbic System, Frontal Cortex.....	290
Electroencephalogram, Waking-Sleeping.....	292
Consciousness, Speech, Memory.....	294
Sense of Smell.....	296
Sense of Taste.....	296
Sense of Balance, Vestibular Function.....	298
Eye Structure, Tears, Aqueous Humor.....	300
Optics.....	302
Visual Acuity, Retinal Receptors.....	304
Adaptation to Light.....	306
Color Vision.....	308
Visual Fields and Visual Pathways.....	310
Processing of Light Stimuli.....	312
Eye Movements, Three-dimensional Vision and Distant Vision.....	314
Sound: Physical Principles, Stimulus, Perception.....	316
Sound Detection and Conduction. Sound Receptors.....	318
Central Processing of Acoustic Information.....	322
Voice and Speech.....	324
References.....	327
Index.....	330
