

Contents

Part I Introduction

Advances in Semiconductor Superlattices and Quantum Wells By L. Esaki	2
--	---

Part II Theory

Band Structure, Impurities and Excitons in Superlattices By M. Altarelli (With 12 Figures)	12
Electrons in Heterojunctions. By F. Stern (With 6 Figures)	38

Part III Experimental Studies

Pictures of the Fractional Quantized Hall Effect By H.L. Störmer (With 14 Figures)	50
Photoluminescence in Semiconductor Quantum Wells By C. Delalande (With 4 Figures)	64
Optical and Magneto-optical Absorption in Quantum Wells and Superlattices. By P. Voisin (With 4 Figures)	73
Optical Properties of 2D Systems in the Far Infrared By E. Gornik and R.A. Höpfel (With 10 Figures)	84
Raman Scattering by Free Carriers in Semiconductor Heterostructures. By G. Abstreiter (With 8 Figures)	99
Confined and Propagative Vibrations in Superlattices By B. Jusserand and D. Paquet (With 16 Figures)	108
Electrical Transport Perpendicular to Layers in Superlattices By J.F. Palmier (With 15 Figures)	127
Doping Superlattices. By J.C. Maan (With 2 Figures)	146
Electronic Properties of InAs-GaSb and Related AlSb Superlattices By L.L. Chang (With 8 Figures)	152

Strained Superlattices. By J.Y. Marzin (With 8 Figures)	161
HgTe-CdTe Superlattices. By Y. Guldner (With 8 Figures)	177

Part IV Technology

Molecular Beam Epitaxy of III-V Compounds By J. Massies (With 13 Figures)	188
Molecular Beam Epitaxy of II-VI Compounds By A. Million (With 5 Figures)	208
Dynamic Aspects of Growth by MBE By C.T. Foxon (With 11 Figures)	216
An Introduction to OMVPE of III-V Compounds By P.M. Frijlink (With 11 Figures)	226

Part V Applications

The Two-Dimensional Electron Gas Field Effect Transistor By B. Vinter (With 13 Figures)	238
Index of Contributors	253
