

CONTENT

1. **CSP and MED
Desalination Markets**
Claus R. Mertes, Pöyry Deutschland GmbH, Germany
2. ***Desalination Systems with Renewable Energies***
Tarik Schwarzer, University of Applied Sciences Aachen, Germany
3. **Solar Tower Power Plants**
*Prof. Dr.-Ing. Bernhard Hoffschmidt, Tarik Schwarzer,
University of Applied Sciences Aachen, Germany*
4. **Small Photovoltaic Powered RO-units for Seawater
Desalination**
Joachim Went, Fraunhofer (ISE), Germany
5. **The TUM DeSal Challenge**
Dr. Markus Spinnler, TU Munich, Germany
6. **Fieldtests Results with a Solar Thermal Multi-Stage
Desalination System**
Tarik Schwarzer, University of Applied Sciences Aachen, Germany
7. **New Approach for Small Thermally Driven MED-Desalination
Systems using Solar or Waste Heat**
Dr.-Ing. Hendrik Müller-Holst, fischer eco solutions GmbH, Germany
8. **Energy Self Sufficient Desalination Units based on
Solar Driven Membrane Distillation**
Joachim Koschikowski, Fraunhofer (ISE), Germany
9. **Waste to Water (Feasibility Study 2008)**
Matthias Schmuderer, Base Technology Germany

10. **Interactive Stage Evaporation Technology by Terrawater (I.S.E.T.T.) for Solar driven Desalination**
Nicolas Heyn, Terrawater GmbH
11. **This presentation will be overworked by the author ANAHITA - Solar Desalination System: Mobile powerplant (CSP) running desalination and production of electricity as stand-alone-solution**
Hans Philipp Krause, water¤t, Germany
12. **Combined CSP and Desalination Plants: Techno-Economic Potential in Mediterranean Partner Countries**
Jürgen Kern, Kernenergien, Germany
13. **MENA Regional Water Outlook - Desalination Using CSP**
Massimo Moser, DLR Germany
