

CONTENTS

Preface v

Conversion of Glucocorticoid Receptors from a Nonbinding Form
to a Form That Binds Steroid
 . . *E.R. Sanchez, J.F. Grippo, P.R. Housley, and W.B. Pratt* 3

Purification, Activation, and Phosphorylation of the Glucocorticoid
Receptor. *T.J. Schmidt and G. Litwack* 35

Translocation or Binding of Activated Receptor-Glucocorticoid
Complex to Nuclear Acceptors: Identification and Mechanism of
Possible Regulatory Substances . *F. Isohashi and Y. Sakamoto* 69

Binding Sites for the Glucocorticoid Receptor on Hormonally
Regulated Genes *M. Beato,
D. von der Ahe, A.C.B. Cato, S. Janich, P. Krauter, C. Scheide-
reit, G. Suske, M. Wenz, H.M. Westphal, and T. Willmann* 97

Mechanisms of Glucocorticoid Resistance in Leukemic Cells
 *E.B. Thompson, Y. Sakaue, and J.M. Harmon* 119

Correlation between Hormone-Mediated Messenger RNA Induc-
tion and Nuclear Histone Acetylation *M. Hirose* 139

Analysis of the Molecular Organization of Steroid Hormone Receptor System	<i>A. Murayama</i> 157
Stimulatory and Inhibitory Pathways for Steroid Receptor to Regulate Gene Expression in Hormone-Responsive Cells	<i>B. Sato, Y. Nishizawa, Y. Maeda, K. Noma, S. Kishimoto, and K. Matsumoto</i> 175
Subject Index	195
