

TABLE OF CONTENTS

CHAPTER I:	REGULAR SOLIDS AND FINITE ROTATION GROUPS ...	1
§1.	The Platonic Solids	2
§2.	Convex Polytopes	6
§3.	Regular Solids	10
§4.	Enumeration and Realization of Regular Solids	14
§5.	The Rotation Groups of the Platonic Solids...	17
§6.	Finite Subgroups of the Rotation Group $SO(3)$	20
§7.	Normal Subgroups	25
§8.	Generators and Relations for the Finite Subgroups of $SO(3)$	27
CHAPTER II:	FINITE SUBGROUPS OF $SL(2, \mathbb{C})$ AND INVARIANT POLYNOMIALS	32
§1.	Finite Subgroups of $SL(2, \mathbb{C})$	33
§2.	Quaternions and Rotations	36
§3.	Four-Dimensional Regular Solids	39
§4.	The Orbit Spaces S^3/G of the Finite Subgroups G of $SU(2)$	44
§5.	Generators and Relations for the Finite Subgroups of $SL(2, \mathbb{C})$	50
§6.	Invariant Divisors and Semi-Invariant Forms	53
§7.	The Characters of the Invariant Divisors	56
§8.	Generators and Relations for the Algebra of Invariant Polynomials	60
§9.	The Affine Orbit Variety	65

CHAPTER III:	LOCAL THEORY OF SEVERAL COMPLEX VARIABLES...	69
§1.	Germes of Holomorphic Functions	69
§2.	Germes of Analytic Sets	72
§3.	Germes of Holomorphic Maps	75
§4.	The Embedding Dimension	78
§5.	The Preparation Theorem	81
§6.	Finite Maps	84
§7.	Finite and Strict Maps	90
§8.	The Nullstellensatz	99
§9.	The Dimension	103
§10.	Annihilators	107
§11.	Regular Sequences	109
§12.	Complete Intersections	112
§13.	Complex Spaces	116
CHAPTER IV:	QUOTIENT SINGULARITIES AND THEIR RESOLUTIONS	118
§1.	Germes of Invariant Holomorphic Functions ...	119
§2.	Complex Orbit Spaces	125
§3.	Quotient Singularities	128
§4.	Modifications. Line Bundles	132
§5.	Cyclic Quotient Singularities	135
§6.	The Resolution of Cyclic Quotient Singularities	138
§7.	The Cotangent Action	142
§8.	Line Bundles with Singularities	145
§9.	The Resolution of Non-Cyclic Quotient Singularities	148
§10.	Plumbed Surfaces	150
§11.	Intersection Numbers	154
§12.	The Homology of Plumbed Surfaces	158
§13.	The Fundamental Group of a Plumbed Surface Minus its Core	162
§14.	Groups Determined by a Weighted Tree	167
§15.	Topological Invariants	171

CHAPTER V: THE HIERARCHY OF SIMPLE SINGULARITIES	177
§1. Basic Concepts	179
§2. The Milnor Number	181
§3. Transformation Groups	184
§4. Families of Germs	187
§5. Finitely Determined Germs	189
§6. Unfoldings	191
§7. The Multiplicity	194
§8. Weighted Homogeneous Polynomials	197
§9. The Classification of Holomorphic Germs	202
§10. Three Series of Holomorphic Germs	204
§11. Simple Singularities	208
§12. Adjacency	211
§13. Conclusion and Outlook	215
References	219
Subject Index	222
