

CONTENTS

On David Nachmansohn's Relationship to Berlin	
H. Herken	XV
 David Nachmansohn (1899-1983): a pioneer of neurochemistry	
Jean-Pierre Changeux	1
 I. THE MOTOR ENDPLATE AND PRESYNAPTIC MECHANISMS	
 Remodelling of neuromuscular junctions during repair of muscle fibres	
R. Couteaux, J.C. Mira	35
 Intermittant, Calcium independent release of acetylcholine from motor nerve terminals	
S. Thesleff	47
 Prostaglandins mediate the muscarinic inhibition of acetyl- choline release from Torpedo nerve terminals	
I. Pinchasi, M. Burstein, D.M. Michaelson	55
 Molecular mechanisms underlying acetylcholine release	
M. Israel, N. Morel, S. Birman, B. Lesbats, R. Manaranche	77
 Adenosine-5'-Triphosphate at the cholinergic synapse: a cotransmitter?	
H. Zimmermann, E.J.M. Grondal	91

Solubilization, affinity labelling and purification of the dihydropyridine receptor of the voltage-dependent calcium channel from rabbit skeletal muscle transverse tubule membranes	
M. Borsotto, J. Barhanin, J.-P. Galizzi, M. Fosset, M. Lazdunski	107
Is ATP a general molecular constituent of cholinergic synaptic vesicles?	
W. Volknandt, H. Zimmermann	121
Single channel formation of cooperatively interacting units of the highly-purified Na-channel protein	
G. Boheim, W. Hanke, J. Barhanin, D. Pauron, M. Lazdunski	131
K ⁺ -channels in rat ventricular cells show voltage-dependent outward rectification and non-linear voltage to current relation	
W. Schreibmayer, H. Hagauer, H.A. Tritthart, H. Schindler	145
A purification procedure of the tetrodotoxin binding component contained in the electroplaxes of <i>Electrophorus electricus</i>	
G. Dandrifosse, Ch. Grandfils, L. Bettendorff, E. Schoffeniels, J. Bontemps	153
High-yield synthesis of a new Na-channel marker: (³ H)ethylenediamine ditetrodotoxin or ED-diTTX	
Ch. Grandfils, L. Bettendorff, E. Schoffeniels, J. Bontemps, G. Dandrifosse	163
Insect olfactory cells: electrophysiological and biochemical studies	
K.E. Kaissling, U. Klein, J.J. de Kramer, T.A. Keil, S. Kanaujia, J. Hemberger	173
Effects of extracellular ATP on ⁸⁶ Rb influx in chick myotubes; indications of a cotransmitter role in neuromuscular transmission	
J. Häggblad, H. Eriksson, E. Heilbronn	185

II. THE ACETYLCHOLINE RECEPTOR: STRUCTURAL ASPECTS

A monoclonal antibody specific for one of the two agonist binding sites at the acetylcholine receptor

G. Fels, A. Maelicke, D. Schäfer, J.P. Walrond, Th. Reese 197

The molecular biology of acetylcholine receptors

A. Mauron, P. Nef, M. Ballivet 209

Antibodies to synthetic peptides as probes of nicotinic acetylcholine receptor structure

T. Barkas, M. Juillerat 223

Regulation of the nicotinic acetylcholine receptor by phosphorylation

E. Heilbronn, H. Eriksson, R. Salmonsson 237

Molecular interactions between the major proteins of the postsynaptic domain in *Torpedo marmorata* electromotor synapse

J. Cartaud, C. Kordeli, H.O. Nghiê, J.-P. Changeux 251

The glycine receptor of rat spinal cord: progress in the investigation of a neuronal ion channel protein

H. Betz, G. Grenningloh, B. Schmitt 263

Antibodies to synthetic peptides as probes for the α -subunit and for the cholinergic binding site of the acetylcholine receptor

D. Neumann, J.M. Gershoni, M. Fridkin, S. Fuchs 273

Postsynaptic modulation of neuronal firing pattern by adenosine

P. Schubert, K.S. Lee, W. Tetzlaff, G.W. Kreutzberg 283

Major proteins of the electric organ from *Torpedo marmorata* - possible associations with the postsynaptic membrane

V. Witzemann, C.M. Boustead, J.H. Walker 293

Protein-blot analysis of the nicotinic acetylcholine receptor

J.M. Gershoni, E. Hawrot, P.T. Wilson, T.L. Lentz 303

III. THE ACETYLCHOLINE RECEPTOR: FUNCTIONAL ASPECTS

Acetylcholine receptor (from *Electrophorus Electricus*): A comparison of single-channel current recordings and chemical kinetic measurements

G.P. Hess, H.-A. Kolb, P. Luger, E. Schoffeniels,
W. Schwarze, J.B. Udgaonkar, E.B. Pasquale 317

Photoaffinity labelling of receptor states with millisecond time resolution

A. Fahr, L. Lauffer, F. Hucho 335

Binding of [³H] acetylcholine to acetylcholine receptor from *Torpedo californica* under equilibrium conditions: stoichiometry and evidence for long-lived metastable states

H.W. Chang, E. Bock, E. Neumann 351

The dimer of *Torpedo* acetylcholine receptor: Synchronized double channel

E. Neumann, F. Spillecke, H. Schindler 369

Synchronization of electrically and chemically excitable ion channels

H. Schindler, W. Schreibmayer 387

Effects of histrionicotoxin on the synaptic and conducting membranes of the electroplax

E. Bartels 399

Thiamine triphosphate as specific operating substance in axonal conduction

E. Schoffeniels, D.G. Margineanu 401

Dose response curves at the neuromuscular junction	
R. Sterz, K. Peper	417
NBD-5-acetylcholine is a fluorescent agonist of the membrane-bound acetylcholine receptor from <i>Torpedo marmorata</i>	
M. Covarrubias, A. Maelicke	429
Do sigmoid dose-response curves require the assumption of allostericity?	
H. Prinz, A. Maelicke	437
Foundations of the ion flux method	
J. Bernhardt, E. Neumann	445
Surface processes in ion transport and excitation	
M. Blank	457
Chemical kinetic investigations of the effects of cis and trans bis-Q on the acetylcholine receptor in <i>Electrophorus electricus</i> vesicles	
A.H. Delcour, G.P. Hess	465
Determination of thiamine and its phosphate esters by reversed-phase HPLC at femtomole levels. Application to bioelectrogenesis	
L. Bettendorff, Ch. Grandfils, E. Schoffeniels, J. Bontemps, D. Schmartz, G. Dandrifosse	479
IV. IMMUNOLOGY OF THE ACETYLCHOLINE RECEPTOR: MYASTHENIA GRAVIS AND SYNAPTIC PLASTICITY	
Regulation of the immune response to the acetylcholine receptor and of experimental myasthenia	
S. Fuchs, Miry C. Souroujon, S. Bogen	493

Congenital and autoimmune diseases of the neuromuscular junction

A. Vincent, P.J. Whiting, J. Newsom-Davis 505

Anti-idiotypic antibody to the acetylcholine and adenosine receptors

B.F. Erlanger, W.L. Cleveland, N.H. Wassermann, B.L. Hill,
A.S. Penn, H.H. Ku, R. Sarangarajan 523

Analysis of the prophylactic and therapeutic action of electrolectin in experimental autoimmune myasthenia gravis

V.I. Teichberg, G. Levi 537

Regulation of acetylcholine receptors on muscle in vitro by central nervous system factors

T.R. Podleski, I. Greenberg, D. Knaack, K. Neugebauer,
M.M. Salpeter 551

Use and disuse and the control of acetylcholinesterase activity in fast and slow twitch muscle of rat

W.-D. Dettbarn, D. Groswald, R.C. Gupta, K.E. Misulis ... 567

The expression of microtubule proteins during the development of the nervous system

I. Ginzburg, U.Z. Littauer 589 "

V. ACETYLCHOLINESTERASE AND CHOLINE ACETYLTRANSFERASE

Acetylcholinesterase of muscle and nerve

W.R. Randall, Josephine Lai, E.A. Barnard 595

Expression of acetylcholinesterase in murine neural cells in vivo and in culture

J. Massoulié, M. Vigny, M. Lazar 619

The involvement of phosphatidylinositol in the anchoring of hydrophobic forms of acetylcholinesterase to the plasma membrane

A.H. Futerman, P.L. Barton, R.M. Fiorini, M.G. Low, W.R. Sherman, I. Silman 635

The hydrophobic domain of human erythrocyte acetylcholinesterase contains nonamino acid components

T.L. Rosenberry, R. Haas, W.L. Roberts, B.H. Kim 651

Cholinesterase: two surprising inhibitors

I.B. Wilson 667

Correlation of assumed functions of acetylcholinesterase with its cellular and subcellular distribution

M. Brzin 679

The mechanism of action of choline acetyltransferase

H.G. Mautner 697

Acetylcholinesterase in regenerating skeletal muscles

J. Sketelj, A. Blinc, M. Brzin 709

Distribution and regulation of acetylcholinesterase forms in chick myotubes: comparison with rat myotubes

M. Vigny, F. Vallette 719

Acetylcholinesterase in mammalian skeletal muscle and sympathetic ganglion cells. Extra and intracellular hydrophilic and hydrophobic asymmetric forms

P. Dreyfus, M. Verdière, D. Goudou, L. Garcia, F. Rieger 729

Inhibition and photoaffinity labeling of acetylcholinesterase by phencyclidine and triphenylmethylphosphonium

J. Verdenhalven, F. Hucho 741

A comparative study of the ageing of DFP-inhibited serine hydrolases by means of ^{31}P -NMR and mass spectrometry

A.C.M. van der Drift 753

Lipid mechanism and acetylcholinesterase function

K. Kaufmann 765
