

Table of Contents

Introduction.	
<i>R. J. Bing</i>	1
Pharmacology of molsidomine.	
<i>W. Klaus</i>	3
Treatment of thrombosis-induced acute myocardial infarction with molsidomine in an animal model.	
<i>P. A. Martorana, R.-E. Nitz</i>	10
Biochemical mode of action of molsidomine.	
<i>E. Böhme, G. Grossmann, C. Spies, A. Mülsch</i>	15
Different effects of molsidomine and nitroglycerin on tolerance development in vascular smooth muscle.	
<i>W. R. Kukovetz, S. Holzmann</i>	23
Development of tolerance to organic nitrates but not to SIN-1 in isolated blood vessels.	
<i>U. Borchard, D. Hafner, M. Heidrich, C. Hirth</i>	29
The influence of SIN-1 on the prostaglandin metabolism of human fibroblasts.	
<i>O. Oetliker, M. Perisić</i>	35
Effects of SIN-1 on platelet activation.	
<i>M. Chignard, D. Delautier, B. Poincelot, F. Russo-Marie, O. Gateau, J. Benveniste</i>	39
Relationship between pharmacokinetics and pharmacodynamics of molsidomine and its metabolites in man.	
<i>T. Meinertz, A. Brandstätter, D. Trenk, E. Jähnchen, J. Ostrowski, W. Gärtner</i>	43
The effect of molsidomine on ventricular function and circulation in patients with coronary heart disease.	
<i>M. Stauch, T. Hermann, J. Roth, W. W. Adam</i>	51

Influence of molsidomine and nifedipine on the velocity of circumferential fiber shortening of the left ventricle. <i>D. G. Caralis, Z. Kyriakides, C. C. Henry</i>	59
Scintigraphically documented changes in the blood pool induced by vasodilators. <i>R. Itti, D. Casset, H. Benjelloun, B. Charbonnier, M. Brochier</i> . .	60
Hemodynamic effects of molsidomine in coronary patients. <i>C. Crexells, R. M. Lidón, J. M. Augé, X. Bosch, J. Garcia, A. Oriol</i>	66
Influence of molsidomine on cardiac pump function. <i>M. Kyriakidis</i>	72
Comparison of the influence of nitrates, molsidomine, and SIN-1, a molsidomine metabolite, in acute coronary insufficiency. <i>S. Degré, J. Sobolski, G. Berkenboom, E. Stoupel, P. Vander-moten</i>	76
Long-lasting vasodilatory effect of intracoronary administration of molsidomine metabolite SIN-1. <i>J. Deckers, H. C. Reiber, P. Serruys</i>	80
The effect of molsidomine on pulmonary artery pressure in patients with chronic heart failure, and on ST-segment depression in patients with angina pectoris. <i>U. Brügmann, R. Blasini, W. Rudolph</i>	86
Hemodynamic effects of molsidomine after single- and multiple-dose administration. <i>M. Tauchert, A. Osterspey, W. Jansen</i>	92
Molsidomine and beta-blockade in patients with stable effort angina. <i>G. DeBacker</i>	99
Synergistic action of molsidomine and atenolol in patients with effort angina. <i>J. V. Gimeno, J. Olagüe, J. Ferrer, F. J. Bueno, P. Bordes, F. J. Algarra, C. S. LaFe</i>	105
Exercise test results during long-term treatment with molsidomine for angina pectoris. <i>L. C. Slegers, Ch. A. Sumajow</i>	111

Experience with molsidomine in the treatment of unstable angina. <i>R. Krüger</i>	119
Comparative study of molsidomine, diltiazem, and propranolol in the treatment of unstable angina pectoris. <i>G. Nicolas, H. Kolsky</i>	124
Reduction of infarct size by molsidomine. <i>N. N. Kipshidze, G. E. Chapidze, L. G. Avalishvili, R. N. Shonia</i> . .	128
The influence of molsidomine on hemodynamics in patients with chronic heart failure at rest and during exercise. <i>H. R. Milstrey, D. Larbig, T. Kahle, H. Nasse</i>	132
Acute and long-term treatment of chronic heart failure with molsidomine. <i>N. M. Mukharljamov, R. A. Grigorjants, N. M. Lobova, V. J. Marejev</i>	137
Effect of molsidomine on central hemodynamics, left and right ventricular function, and oxygen transport in patients with chronic obstructive lung disease. <i>H. Seibold</i>	143
Long-term treatment with molsidomine in patients with coronary heart disease <i>L. Hadži-Pesić, F. Čustović, V. Goldner, V. Josipović, M. Kocijan- čić, I. Lambić, V. Obradović, V. Ristić, B. Štrbo, M. Zdravković</i>	148
Summary of the symposium. <i>M. Stauch</i>	157
Authors' addresses	161
