

Contents

Chapter 1	The Normal Pancreas	1
	The Duct System of the Pancreas	3
	Pancreas Divisum	9
	Interpretation of Pancreatograms	10
	The Effects of Age in Relation to Pancreatography	10
	The Weight of the Normal Pancreas and Pancreatic Fat	11
	Heterotopia of Pancreatic Tissue	12
	Accessory Spleens Within the Pancreas	19
	Pancreatic Malformations	19
	Pancreatic Atrophy	23
	Pancreatic Tissue in Teratomas	28
	References	28
Chapter 2	Normal Microscopic Structure	31
	The Islets of Langerhans	33
	The Development of the Pancreas	36
	Epithelial Metaplasia and Dysplasia in the Pancreas	38
	Pancreatic Injury, Repair and Regeneration	42
	References	43
Chapter 3	Effects upon the Pancreas of Disease in Various Organs and Systems	45
	Cystic Fibrosis (Fibrocystic Disease of the Pancreas, Pancreatic Fibrosis, Mucoviscidosis)	46
	Haemosiderosis of the Pancreas	54
	Other Pancreatic Lesions Associated with Hepatic Disease	57
	Chronic Venous Congestion	57
	Pancreatic Lesions Associated with Chronic Ulcerative Colitis	58
	Pancreatic Lesions Associated with Uraemia and Dehydration	59

Pancreatic Lesions Associated with Death from Lightning Stroke	60
Pancreatic Lesions in Fatal Cases of Burning	61
Amyloidosis	61
Wilson's Disease (Hepatolenticular Degeneration)	62
Progressive Systemic Sclerosis	62
Systemic Lupus Erythematosus	62
References	62
 Chapter 4 The Effects of Arterial Disease upon the Pancreas	65
Anatomy of the Arteries of the Pancreas	65
Aneurysms of the Pancreatic Arteries	66
Effects of Arteriosclerosis of the Pancreatic Arteries	68
Arterial Lesions in Relation to Acute Haemorrhagic Pancreatitis	69
Pancreatic Infarcts	69
Injury to the Arteries of the Pancreas	75
References	76
 Chapter 5 The Pancreas in Diabetes Mellitus and Haemochromatosis	79
Type I Diabetes (Early-Onset Insulin-Dependent Diabetes, Juvenile Diabetes)	79
Type II Diabetes (Insulin-Independent Diabetes, Maturity-Onset Diabetes)	87
The Pancreas in Haemochromatosis	91
The Pancreas in Diabetes Associated with Other Endocrine Disease	93
Insulin-Resistant Diabetes	94
References	94
 Chapter 6 Pancreatic Calculi	97
True Calculi Within Ducts	97
Chemical Composition	97
Single and Multiple Calculi	98
Epithelial Metaplasia in Ducts Containing Calculi	98
Relationship of Calculi to Pancreatitis	99
Calculi in the Aged	99
Calculi in Infants Treated with ACTH	100
Size and Shape	100
Pancreatic Calcification Associated with Carcinoma	100
Calcification in Cystic Lesions of the Pancreas	103
Calcification in Other Lesions of the Pancreas	103
References	103
 Chapter 7 Cystadenoma and Cystadenocarcinoma	105
Cystadenoma	105
Cystadenocarcinoma	112
References	115

Chapter 8 Solid Carcinomas of the Exocrine Pancreas 117

Increasing Incidence 117

Aetiology 118

Causes of Symptoms 120

Abnormal Immunity and Pancreatic Carcinoma 133

Neurofibromatosis and Pancreatic Carcinoma 133

Lipomatous Pseudo-hypertrophy and Pancreatic Carcinoma 133

Skin Changes 133

Ectopic Hormone Production 133

Hypercalcaemia 134

Macroscopic Features 134

Microscopic Features 137

Carcinoma of the Ampulla of Vater, Common Bile Duct and Duodenum 147

Microscopic Confirmation of a Diagnosis of Carcinoma of the Pancreas 148

Use of Tumour Markers in Diagnosis 150

Spontaneous Carcinoma of the Exocrine Pancreas in Animals 150

References 150

Chapter 9 Tumours and Hyperplasias of the Endocrine Pancreas 155

General Characteristics of Islet Cell Tumours 156

Insulinomas 158

Gastrinomas 160

Glucagonomas 164

Somatostatinomas 168

Islet Cell Tumours Associated with the Verner-Morrison Syndrome 169

Tumours Producing Pancreatic Polypeptide (PP-omas) 171

Carcinoid Tumours of the Pancreas 172

The Malignant Behaviour of Pancreatic Endocrine Carcinomas 173

Pancreatic Islet Cell Tumours in Multiple Endocrine Adenopathy 173

Nesidioblastosis and Adenomatosis in the Adult 174

The Pancreas in Persistent Hyperinsulinaemic Hypoglycaemia in Infancy 176

Hyperplasia of Pancreatic Islets Associated with Extrapancreatic Lymphoma
and Sarcomas 177

Drug-Induced Nesidioblastosis 177

Islet Cell Tumour in Calcifying Chronic Pancreatitis 177

References 177

Chapter 10 Secondary Tumours, Lymphomas and Rare Tumours 181

Secondary Tumours 181

Pancreatic Involvement in Lymphoma 183

Rare Tumours 187

Tumours of the Exocrine Pancreas in Infancy and Childhood 189

Tumour-like Lesions 191

References 194

Chapter 11 Non-infective Acute Pancreatitis	195
Aetiology and Mechanism	195
Morbid Anatomy	210
Non-pancreatic Lesions Attributable to Acute Pancreatitis	219
Complications and Sequels	222
Unusual Effects	228
Late Effects	228
References	229
 Chapter 12 Non-infective Chronic Pancreatitis	233
Types of Chronic Pancreatitis Associated with Clinical Syndromes	233
Chronic Pancreatitis and Immunological Abnormalities	245
Chronic Obstructive Pancreatitis	245
Effects and Complications	246
References	256
 Chapter 13 Bacterial, Granulomatous, Viral and Parasitic Lesions of the Pancreas	259
Pancreatic Abscess	259
Salmonella Infections	259
Tuberculosis	261
Sarcoidosis	261
Fungal Lesions	262
Viral Lesions	263
Pancreatitis in Fulminant Psittacosis	266
Effects of Helminth Infestation upon the Pancreas	266
References	267
 Subject Index	269
