

Table of Contents

1.	<i>Introduction</i>	1
2.	<i>Terminology and Definitions</i>	4
3.	<i>Stress-Strain Concept in Whole-Body Vibration</i>	7
4.	<i>Work-Related Stress from Whole-Body Vibration</i> . . .	9
5.	<i>Acute Effects of Mechanical Vibration</i>	12
5.1	Biological Prevention and Control Mechanisms Against Mechanical Vibration	12
5.2	Biodynamic Reaction on Vibration	14
5.2.1	Models of the Human Body under Vibration	14
5.2.2	Vibration Behavior when Walking and Running . . .	20
5.2.3	Vibration Behavior in Standing Posture	22
5.2.3.1	Vertical (z-Axis) Excitation	22
5.2.3.2	Horizontal (x-Axis, y-Axis) Excitation	22
5.2.4	Vibration Behavior in Reclining Posture	23
5.2.4.1	Vertical (x-Axis) Excitation	24
5.2.4.2	Horizontal (y-Axis, z-Axis) Excitation	25
5.2.5	Vibration Behavior in Sitting Posture	26
5.2.5.1	Vertical (z-Axis) Excitation	27
5.2.5.2	Horizontal (x-Axis, y-Axis) Excitation	29
5.2.6	Vibration Behavior of the Spinal Column	31
5.2.7	Vibration Behavior of Internal Organs	39
5.2.8	Vibration Behavior of the Eye	44
5.2.9	Review of the Resonance Frequencies of Various Parts of the Body	49
5.3	Changes in Physiological Functions	50
5.3.1	Muscle Activity	51
5.3.2	Heart-Circulatory Function	54
5.3.3	Respiratory Function	57

5.3.4	Vegetative and Biochemical Reactions	60
5.3.5	Sensory Function	63
5.3.5.1	Acoustic Perception	64
5.3.5.2	Equilibrium Regulation	65
5.3.5.3	Kinetosis	66
5.3.5.4	Visual Perception	69
5.4	Sensorimotor Performance	75
5.5	Subjective Perception	77
5.5.1	Vibration Perception and Vibration Sensation Memory	78
5.5.2	Vibration Perception in the Sitting and Standing Postures	79
5.5.3	Vibration Perception in Reclining Posture	84
6.	<i>Chronic Effects of Whole-Body Vibration</i>	87
6.1	Methodological Problems	87
6.2	Work-Related Diseases in National and International Regulations	88
6.3	Vibration Effects on the Skeletal System in Animal Experiments	90
6.4	Epidemiological Research on Professional Groups Exposed to Vibration	91
6.4.1	Diseases of the Spinal Column	91
6.4.1.1	Tractor Drivers	92
6.4.1.2	Truck and Bus Drivers	97
6.4.1.3	Drivers of Earth-Moving Equipment	99
6.4.1.4	Railroad, Ship and Airplane Crews, and Employees in the Concrete Industry	106
6.4.1.5	Prevalence of Pathological Changes in the Spinal Column (Summary)	108
6.4.1.6	An Occupational Medicine Appraisal of Changes in the Spinal Column Arising from Vibration Exposure	110
6.4.2	Digestive System Diseases	114
6.4.2.1	Tractor Drivers	114
6.4.2.2	Truck and Bus Drivers	116
6.4.2.3	Drivers of Earth-Moving Equipment	117
6.4.2.4	Employees in the Concrete Industry	119
6.4.2.5	Prevalence of Pathological Findings in the Digestive System (Summary)	119
6.4.2.6	An Occupational Medicine Appraisal of Digestive Disorders Arising from Vibration Exposure	119
7.	<i>The Influence of Particular Modes of Vibration</i>	121
7.1	Vibration Occurring Simultaneously in Several Directions	121

7.2	Mixtures of Periodic Vibration, Random Vibration and Vibration Containing Shocks	122
7.2.1	Mixtures of Periodic Vibration	122
7.2.2	Random Vibration	123
7.2.3	Vibration Containing Shocks	124
7.3	Rotational Vibration	125
7.4	Exposure Duration and Rest Pauses	126
8.	<i>Preventive Measures</i>	129
8.1	Engineering Methods	129
8.2	Prevention by Work Organization	130
8.3	Personal Prevention	131
8.4	Prevention by Occupational Medicine	131
9.	<i>Laws, Regulations, Standards, and Guidelines for the Protection of Man against Mechanical Vibration . . .</i>	133
9.1	Occupational Diseases	133
9.2	Criteria for the Evaluation of Risk from Mechanical Vibration and the Establishment of Exposure Guidelines	134
9.3	Guidelines for the Measurement and Evaluation of Vibration	135
9.4	Medical Examinations of New Employees and Regular Health Check ups	138
9.5	Technical and Organizational Measures for Protection Against Mechanical Vibration	138
10.	<i>Summary and Conclusions</i>	139
11.	<i>References</i>	142
12.	<i>Medical Terminology</i>	158
