

# TABLE OF CONTENTS

## INTRODUCTION

### CHAPTER 1: TWO CLASSICAL EXAMPLES: SUBMERSION

THEOREM AND MORSE LEMMA	1
-------------------------	---

### CHAPTER 2: GERMS AND JETS 5

§1. Germs of sets and mappings	5
§2. Basic properties of the algebras $E_n$	7
§3. Jets of mappings	12

### CHAPTER 3: EQUIVALENCE RELATIONS ON GERMS AND JETS 14

§1. Group actions and equivalence relations	14
§2. Germs of complex analytic spaces	19
§3. Group actions on jet spaces	27

### CHAPTER 4: TANGENT SPACES TO ORBITS 30

§1. Semialgebraic sets	30
§2. Tangent spaces and transversals	34
§3. Tangent spaces to orbits in jet spaces	37
§4. Mather's Lemma	40

### CHAPTER 5: BASIC CLASSIFICATION EXAMPLES IN

LINEAR ALGEBRA AND ALGEBRAIC GEOMETRY	43
---------------------------------------	----

§1. Linear maps and quadratic forms	43
§2. Cubic forms and plane cubic curves	47
§3. Pencils of quadrics	55
§4. Pencils of binary cubic forms	57

### CHAPTER 6: FINITE DETERMINACY OF MAP GERMS 62

§1. $R$ -finite determinacy	62
§2. $K$ -finite determinacy and isolated singularities of complete intersections	74
§3. Generic properties of map germs	84
§4. Milnor number and Tjurina number	90

CHAPTER 7: WEIGHTED HOMOGENEOUS SINGULARITIES	99
§1. Weighted homogeneous polynomials and $\mathbb{T}^*$ -actions	99
§2. Finitely determined weighted homogeneous singularities	105
§3. Semi weighted homogeneous singularities	115
§4. Around a theorem of K. Saito	119
§5. Uniqueness of weighted homogeneity type	124
CHAPTER 8: CLASSIFICATION OF SIMPLE SINGULARITIES OF FUNCTIONS	128
§1. Simple singularities and adjacency	128
§2. Complete transversals and Splitting Lemma	133
§3. Classification of $\kappa$ -simple function singularities	136
§4. Classification of $\mathcal{R}$ -simple function singularities	144
CHAPTER 9: CLASSIFICATION OF SIMPLE 0-DIMENSIONAL COMPLETE INTERSECTIONS	147
§1. Further invariants for singularities: Boardman symbol and Hilbert-Samuel function	147
§2. Normal forms and specializations	152
CHAPTER 10: CURVE AND SURFACE SINGULARITIES	168
§1. Weierstrass normal form and blowing-up	168
§2. Invariants of plane curve singularities	172
§3. Blowing-up plane curve singularities	179
§4. Basic facts on resolution of surface singularities	187
§5. Some properties of simple surface singularities	192
CHAPTER 11: DUAL MAPPINGS AND CONTACT TANGENCY CLASSES FOR PROJECTIVE HYPERSURFACES	204
§1. The dual mapping and the dual variety	204
§2. Contact tangency classes	215

§3. Hyperplane sections of generic hyper- surfaces	220
APPENDIX: TWO RECENT RESEARCH TOPICS	230
REFERENCES	232
LIST OF NOTATIONS	236
INDEX	238
