

Table of Contents

Introduction: Elementary parameters in the study of ancient writing

systems	13
Writing research: The orphanage of a non-established discipline of scholarly research.....	14
The bias of the conditioned mind: <i>Ex oriente lux</i> and the Mesopotamian “prototype” model of civilization	17
Ex oriente lux – Ex meridie lux – Ex occidente lux: Reassessing cultural chronology	22
Writing as technology and cultural ecology.....	27

1. The intentionality of symbol-making and the working of cultural memory

memory	33
Symbol-making as a tool of intentionality	34
Identification through language as non-written code	36
Knowledge-construction and the role of visual signifiers in illiterate cultures.....	43
Cultural symbolism and visual signifiers in the Anatolian Neolithic	44
Approaches to replace the Goddess by a bull god	46
Approaches to replace the Goddess by a bear	47
Memory boards in traditional cultures: Techniques of visual memorizing on the verge of writing	48

2. Sign systems as constructs of the abstract mind – Communication systems in processes of higher-order knowledge-construction.....

Specialized sign use (1): Numerical and calendrical notation	55
Specialized sign use (2): Symbolism of identification	60
Specialized sign use (3): Writing in a web of communication systems	61
Specialized sign use (4): The interplay of communication systems – A typology	69
National language-English bilingualism (NEB) – A functional pattern of communication and its infrastructure	79

3. Models of ancient civilizations – <i>Oecumene</i> versus state	83
The <i>oecumene</i> model of ancient civilization – The archeological record	88
Human ecology and the rise of the <i>oecumene</i> model: The formation of the Danube civilization (Old Europe)	91
The role of myth for assessing ecological conditions in the prehistory of southeastern Europe	93
Environmental changes caused by the Black Sea flood of c. 6700 BCE	98
Human response to the Black Sea flood and trends of cultural evolution in the post-deluge era	103
Old European settlements, their layout and size	107
Innovative technologies	108
Pottery	108
Experimenting with metallurgical techniques	109
The proliferation of imagery	111
Conditions for the shift toward the state model	114
Human ecology and the rise of the state model: The emergence of city-states in Mesopotamia	117
Convergent technologies and life-styles in the pre-Sumerian era (c. 6500 – c. 4000 BCE)	119
Pre-Sumerian cultural terminology	120
Assessing the Occidental-Oriental time gap	123
 4. Conditions for the transition to literacy – Deconstructing a Euro-American myth	125
The traditional canon of imagined needs for introducing writing technology	125
The fallibility of the Euro-American canon (1): The puzzle of Catalhöyük – A technologically advanced Neolithic community without writing technology	129
The fallibility of the Euro-American canon (2): The civilization of Sicán in the Lambayeque valley (Perú) – The functioning of institutions of an advanced culture without the use of writing	132
The fallibility of the Euro-American canon (3): Fluctuations of systemic sign use – Community life at Troy, a civilization oscillating between illiteracy and literacy	133

5. Writing technology and cultural ecology in societies without statehood (1): First writing in communities of the <i>oecumene</i> model ...	137
First writing without the pressing needs of state bureaucracy: Writing as a ritual means to sustain community life	138
The ecology of writing in the Danube <i>oecumene</i>	139
The famous and infamous Tărtăria Tablets: Original signs or foreign import?	146
In the presence of the Sacred: Belief systems and first writing in the Danube civilization.....	150
Inscribed figurines	152
Inscribed spindle-whorls	154
Interconnections of cultural symbolism and script signs within the spirited world of the ancient Danubians	156
Parallelism of motifs on the human body and on figurines	157
Parallelism of motifs on figurines and on artifacts with non-practical functions	161
Parallelism of motifs throughout the spectrum of templates bearing cultural symbols (i.e. the human body, figurines, pottery, utensils and requisites)	162
The Danube script and its legacy – Pre-alphabetic literacy as a leitmotiv in the Balkanic-Aegean convergence zone	165
The working of cultural memory and the continuity of sign systems in the horizon of time.....	167
Signs and symbols in the Cycladic culture	170
The renewal of literacy in Minoan Crete.....	175
Parameters of Balkanic-Aegean continuity in the domain of writing technology	178
The principle of linear writing	178
The repertory of graphic parallelisms in the Old European and ancient Cretan linear scripts.....	178
Ligatures as a typical feature of the writing systems	182
The diacritical technique of distinguishing individual signs.....	182
The social functions of the writing systems as sacred scripts	184
The use of inscribed stamp seals.....	184
The close association of writing with the religious symbolism	185
The tradition of inscribing human figurines	188
The tradition of inscribing sculptures of sacrificial animals	189
The tradition of writing on pottery.....	190
The tradition of inscribing weights.....	190

The ancient Aegean substratum in the early versions of the Greek alphabet – Lingering traces of pre-Greek literacy	191
Trade relations and writing in the communities of the ancient Indus civilization	195
6. Writing technology and cultural ecology in societies without statehood (2): First writing and the transition to social hierarchy	199
The ecology of writing and shamanistic rituals in ancient China.....	199
Divinities, ritual calendar and writing in Olmec culture	207
Reflections of an early stage of a hunters' culture	209
Subsistence and beliefs of agrarian village communities	210
The emergence of social hierarchy	211
Olmec inventiveness and the mother of Mesoamerican writing.....	215
7. Writing technology and cultural ecology in communities of the state model	219
Communicational challenges for early statehood in Egypt and in the ancient Orient.....	219
The dual function of early writing technology in pre-dynastic Egypt	220
First writing at the service of temple bureaucracy in ancient Sumer and the sources of the sign inventory	223
Early documentation for the proto-Elamite script	229
Idea diffusion and early culture contacts in the Fertile Crescent	232
Urbanism, statehood and symbolic communication in the City of the Gods: Teotihuacán (pre-Columbian Mesoamerica)	240
8. Ancient scripts and their principles of writing	249
Intentionality as an arbiter of logographic and phonographic writing	251
Writing with and without language.....	255
The applied principle of nuclear writing.....	259
Combinatory techniques of writing principles and their manifestation in historical scripts	262
Name-writing in the Naxi script.....	264
The working of an incipient rebus technique in the Naxi script	266
Archaic period (until about 2700 BCE).....	269
Pitfalls and quandaries of decipherment: A methodology for decoding an unknown sign system	271

9. The composition and systematic structuring of sign inventories	279
Cultural relativity as an arbiter in the composition of sign inventories of ancient scripts	279
The multiple-choice composition of sign inventories	283
Groupings and enchainment of signs in sequences	293
Non-practical domains of writing: Calligraphy and esthetic functions of sign use	295
10. The cultural ecology of writing materials and writing techniques	301
The choice of materials: Availability versus function.....	302
Culturally specific modes of selection of writing surfaces	304
Chronological sequences of materials for writing in the ancient civilizations	306
Writing instruments	310
11. The dissemination and proliferation of ancient scripts.....	315
The spread of ancient scripts as technological innovations.....	315
Local traditions of cuneiform.....	316
Local traditions of Chinese characters	318
Early Chinese-inspired writing in Korea and the shift to a local script.....	320
The adaptation of Chinese writing and the emergence of local script varieties in Japan.....	326
The tradition of Chinese writing in Vietnam and the shift to the Latin alphabet.....	335
Epilogue: First writing and the differential fabric of ancient civilizations	341
Bibliography.....	343
Figures	369
Maps.....	373
