Introduction	ix
--------------------	----

Part I. Background and Introduction

1. History of Computers	3
1.1. Introduction	3
1.2. The Early Foundations	4
1.3. Early Electronic Computers	15
1.4. The Modern Computer	24
1.5. Concluding Remarks	30
2. Computers and Health Care	33
2.1. Historical Overview	33
2.2. Data Oriented Applications	37
2.3. Information Oriented Applications	52
2.4. Knowledge Oriented Applications	58
2.5. Concluding Remarks	64

Part II. Computer Systems

3. Overview of Hardware and Software	71
3.1. Introduction	71
3.2. The Personal Computer	72
3.3. The Multiuser Environment	90
3.4. Networking Computers	99
3.5. Concluding Remarks	110
4. Programming Languages	112
4.1. Introduction	112
4.2. Survey of Programming Languages	113
4.3. Some Programming Languages	121
4.4. Concluding Remarks	147
5. Data Bases	150
5.1. Introduction	150
5.2. File Structures	150

5.3.	Data Base Management Systems	160
5.4.	Database Design	174
5.5.	Concluding Remarks	179
6.	System Implementation	181
6.1.	Introduction	181
6.2.	System Level Activities	182
6.3.	Application Software Development	186
6.4.	Programming Heuristics	203
6.5.	Concluding Remarks	212
 Part III. Clinical Applications		
7.	Hospital Information Systems	217
7.1.	Introduction	217
7.2.	Information Processing	218
7.3.	Some Hospital Information Systems	230
7.4.	Evaluation	244
7.5.	Concluding Remarks	250
8.	Ambulatory Care Systems	253
8.1.	Introduction	253
8.2.	Automated Ambulatory Medical Record Systems	254
8.3.	Some Ambulatory Care Systems	260
8.4.	Evaluation	286
8.5.	Concluding Remarks	290
9.	Medical Decision Making	294
9.1.	Introduction	294
9.2.	Medical Decision Making	295
9.3.	Strongly Formalized Techniques	302
9.4.	Artificial Intelligence in Medicine	315
9.5.	Concluding Remarks	337
10.	A Case Study	341
10.1.	Introduction	341
10.2.	The Johns Hopkins Oncology Clinical Information System	342
10.3.	The Data Model	347
10.4.	System Evaluation	368
10.5.	Concluding Remarks	372
Epilogue		375
A Computer Glossary		379
Selected Readings		393
Index		409
