

Contents

CHAPTER 0	
Preliminaries	1
§1. Length Functions.	1
§2. Complex Spaces	7
CHAPTER I	
Basic Properties	11
§1. The Kobayashi Semi Distance.	11
§2. Kobayashi Hyperbolic.	19
§3. Complete Hyperbolic	24
§4. Connection with Ascoli's Theorem	28
CHAPTER II	
Hyperbolic Imbeddings	31
§1. Definition by Equivalent Properties.	31
§2. Kwack's Theorem (Big Picard) on $\mathbf{D}$	39
§3. Some Results in Measure Theory.	43
§4. Noguchi's Theorem on $\mathbf{D}$	55
§5. The Kiernan-Kobayashi-Kwack (K^3) Theorem and Noguchi's Theorem	57
CHAPTER III	
Brody's Theorem	65
§1. Bounds on Radii of Discs	65
§2. Brody's Criterion for Hyperbolicity.	67
§3. Applications	72
§4. Further Applications: Complex Tori	83

CHAPTER IV

Negative Curvature on Line Bundles	87
§1. Royden's Semi Length Function.	88
§2. Chern and Ricci Forms.	94
§3. The Ahlfors-Schwarz Lemma	102
§4. The Equidimensional Case	107
§5. Pseudo Canonical Varieties.	118

CHAPTER V

Curvature on Vector Bundles	124
§1. Connections on Vector Bundles	124
§2. Complex Hermitian Connections and Ricci Tensor	132
§3. The Ricci Function	139
§4. Garry's Theorem	147

CHAPTER VI

Nevanlinna Theory	158
§1. The Poisson-Jensen Formula	158
§2. Nevanlinna Height and the First Main Theorem	167
§3. The Theorem on the Logarithmic Derivative	171
§4. The Second Main Theorem	179

CHAPTER VII

Applications to Holomorphic Curves in P^n	184
§1. Borel's Theorem	185
§2. Holomorphic Curves Missing Hyperplanes	194
§3. The Height of a Map into P^n	200
§4. The Fermat Hypersurface.	204
§5. Arbitrary Varieties	212
§6. Second Main Theorem for Hyperplanes	220

CHAPTER VIII

Normal Families of the Disc in P^n Minus Hyperplanes	224
§1. Some Criteria for Normal Families.	226
§2. The Borel Equation on D for Three Functions	233
§3. Estimates of Bloch-Cartan	235
§4. Cartan's Conjecture and the Case of Four Functions.	244
§5. The Case of Arbitrarily Many Functions	258
Bibliography	263
Index	269
