

# C O N T E N T S (1)

## CHAPTER I

### MOTIVATIONS AND THE PHYSICAL POINT OF VIEW

A	An elementary example: The vibrating string .....	1
B	The method of separation of variables .....	8
C	Generalization: The vibrating membrane .....	10
D	Other points of view: Partial differential equations vs Spectral theory .....	14

## CHAPTER II

### TOPICS FROM RIEMANNIAN GEOMETRY

A	Generalities .....	21
B	Curvatures: The geometric point of view .....	27
C	The covariant derivative .....	35
D	Curvatures: The analytic point of view .....	39

## CHAPTER III

### THE LAPLACIAN AND RELATED TOPICS

A	Starring: The Laplacian and the Rayleigh quotient .....	44
B	Eigenvalue problems on Riemannian manifolds I: variational characterization of eigenvalues .....	52
C	Eigenvalue problems on Riemannian manifolds II: applications .....	64

## CHAPTER IV

### ISOPERIMETRIC METHODS

A	Motivations: The Faber-Krahn inequality .....	78
B	Isoperimetric inequalities and symmetrization .....	84
	. The isoperimetric function of a closed Riemannian manifold..	84
	. Symmetrization .....	86
	. Applications .....	90

---

(1) Numbers refer to pages

## CHAPTER V

### ISOPERIMETRIC METHODS AND THE HEAT EQUATION

A	The heat kernel .....	98
B	Isoperimetric inequality for the heat kernel I: main theorem .....	101
C	Isoperimetric inequality for the heat kernel II: an effective case .....	108
D	Applications .....	112

## CHAPTER VI

### GEOMETRIC APPLICATIONS OF ISOPERIMETRIC METHODS

A	Introduction .....	116
B	The analytic approach I .....	118
	. Bochner vanishing theorems .....	118
	. Generalized Bochner vanishing theorems .....	126
C	The analytic approach II .....	129
D	The analytic approach III: Estimating theorems .....	134
E	Underlying philosophy: M. Gromov's compactness theorems .....	139

## CHAPTER VII

### A BRIEF SURVEY OF SOME RECENT DEVELOPMENTS IN SPECTRAL GEOMETRY

A	The heat equation and applications .....	145
	. The isospectral problem .....	147
B	The wave equation and applications .....	149
C	Final comments .....	153

## APPENDIX A by G. BESSON

### ON SYMMETRIZATION

.	Introduction .....	156
.	The absolute value as a symmetrization procedure and the Beurling-Denys criterion .....	159
.	Symmetrization .....	163
.	Interpretation in terms of quadratic forms: a criterion for semi-group domination .....	168
.	Application 1: Kato's inequality on fibre bundles .....	172
.	Application 2: Schwarz symmetrization .....	175
.	References for Appendix A .....	190

APPENDIX B by P. BÉRARD and M. BERGER

A GUIDE TO THE LITERATURE

- . "Le spectre d'une variété riemannienne en 1982" ..... 192

APPENDIX C

- A COMPLEMENT TO APPENDIX B ..... 249

REFERENCES

- . References for Chapters I to VII ..... 257

INDEXES

- . Subject index ..... 265
- . Index of notations ..... 270
