

CONTENTS

CHAPTER 1.	<u>FOURIER COEFFICIENTS OF SIEGEL MODULAR FORMS</u>	
	Introduction	.. 1
§ 1.1.	Estimates for Fourier coefficients of cusp forms of degree 1	.. 10
§ 1.2.	Reduction theory	.. 25
§ 1.3.	Minkowski reduced domain	.. 35
§ 1.4.	Estimation of Fourier coefficients of modular forms of degree n	.. 45
§ 1.5.	Generalization of Kloosterman's method to the case of degree 2	.. 83
§ 1.6.	Estimation of Fourier coefficients of modular forms	.. 117
§ 1.7.	Primitive representations	.. 161
CHAPTER 2.	<u>ARITHMETIC OF QUADRATIC FORMS</u>	
§ 2.0	Notation and terminology	.. 167
§ 2.1	Quadratic modules over $\mathbb{Q}_p$	.. 169
§ 2.1.2.	Modular and maximal lattices	.. 170
§ 2.1.3.	Jordan splittings	.. 175
§ 2.1.4.	Extension theorems	.. 178
§ 2.2.	The spinor norm	.. 185
§ 2.3.	Hasse-Minkowski theorem	.. 191
§ 2.4.	Integral theory of quadratic forms	.. 192
	REFERENCES	.. 225
