

I. RESOLUTION STATEMENTS FOR A VECTOR FIELD.....	1
0. INTRODUCTION.....	1
1. ADAPTED VECTOR FIELDS.....	1
1.1. General hypotheses and notations.....	1
1.2. Vector fields and distributions.....	3
1.3. The adapted case.....	4
1.4. The formal case.....	6
2. BLOWING UPS OF VECTOR FIELDS.....	7
2.1. Inverse image by a morphism.....	7
2.2. Adapted blowing-ups.....	9
2.3. Formal blowing-ups.....	13
3. SINGULAR LOCUS AND BLOWING UP.....	14
3.1. Adapted order of a vector field.....	14
3.2. The directrix.....	17
3.3. Stationary sequences.....	19
3.4. Permissible centers.....	23
4. RESOLUTION STATEMENTS.....	28
4.1. The general statement.....	28
4.2. Resolution games.....	31
II. A PARTIAL WINNING STRATEGY.....	35
0. INTRODUCTION.....	35
1. TYPE ZERO SITUATIONS.....	37
1.1. Description of type zero.....	37
1.2. Stability results.....	39
1.3. Type zero games.....	43
2. A TYPE 0-0 WINNING STRATEGY.....	44
2.1. An invariant of transversality.....	44
2.2. Polygons for type 0-0.....	45
2.3. Preparation.....	49
2.4. Main result.....	51
3. INVARIANTS ASSOCIATED TO THE TYPE 0-1.....	54
3.1. Polygons for type 0-1.....	54
3.2. Good preparation. First cases.....	57
3.3. Good preparation, $e(E)=1$	60
3.4. Very good preparation.....	66
4. A WINNING STRATEGY FOR TYPE 0-1.....	68
4.1. Good preparation stability.....	69
4.2. Very good preparation stability.....	71
4.3. A winning strategy for type 0-1.....	76
III. STANDARD TRANSITIONS FROM TYPE I.....	79
0. INTRODUCTION.....	79

1. CLASSIFICATION BY TRANSVERSALITY.....	79
1.1. Ideals associated with a vector field.....	79
1.2. Classification.....	81
1.3. Reduction of the no transversals types.....	87
2. STANDARD TRANSITIONS.....	87
2.1. Definitions and first reduction.....	88
2.2. Polygons and invariants.....	90
2.3. Preparation of δ	92
2.4. Standard transitions from the type I.1.1.....	94
2.5. Good preparation.....	95
2.6. Stability results for good preparation.....	97
2.7. Very good preparation.....	98
2.8. Standard winning strategies.....	99
3. REDUCTION OF THE TYPE I-1-1.....	101
3.1. No standard transitions.....	101
3.2. The transition $I \rightarrow I'$. First cases.....	104
3.3. The transition $I \rightarrow I'$. Case $T-1, \zeta$	108
3.4. The transition $II \rightarrow I'$	112
3.5. Reduction of the type $I'-1-1$	114
IV. A WINNING STRATEGY FOR TYPE ONE.....	116
0. INTRODUCTION.....	116
1. THE "NATURAL" TRANSITION.....	117
1.1. Definition and notations.....	117
1.2. First reductions.....	119
1.3. Proof of the main result.....	121
2. NO STANDARD TRANSITIONS FROM TYPE ONE.....	126
2.1. Introduction.....	126
2.2. Preliminaries for the case $e(E(1))=1$ and $\pi(1)$ quadratic...	127
2.3. The case $e(E(1))=1$ and $\pi(1)$ quadratic.....	132
2.4. The case $e(E(1))=2$ and $\pi(1)$ quadratic.....	138
2.5. $\pi(1)$ monoidal with center $(x(0), z(0))$	142
2.6. $\pi(1)$ monoidal with center $(y(0), z(0))$	145
3. NO STANDARD TRANSITIONS FROM TYPE II.....	147
3.1. Introduction.....	147
3.2. The transformation $T-1, \zeta, \zeta \neq 0$	149
3.3. The transformation $T-2$	154
3.4. The transformation $T-1, 0$	156
3.5. $\pi(s+1)$ monoidal with center $(x(s), z(s))$	161
3.6. $\pi(s+1)$ monoidal with center $(y(s), z(s))$	161
4. A WINNING STRATEGY FOR THE TYPE ONE.....	162
4.1. Introduction.....	162
4.2. Standard transitions from the type I'	163
4.3. No standard transitions from the type I'	165
4.4. A winning strategy for the bridge type.....	168
V. TYPES TWO AND THREE.....	172
0. INTRODUCTION.....	172

1. STANDARD TRANSITIONS FROM THE TYPES II AND III.....	172
1.1. A winning strategy if $\dim \text{Dir}(\mathcal{O}, E)=1$	172
1.2. Invariants for the standard transitions.....	175
2. NO STANDARD TRANSITIONS FROM II AND III.....	177
2.1. Another invariant of transversality.....	177
2.2. Quadratic no standard transitions from III.....	178
2.3. No standard transitions from II and III.....	180
2.4. A winning strategy for the type III-bridge.....	181
3. TYPES II' AND III'.....	183
3.1. The case $\tau=0$	183
3.2. The case $\tau=1$	184
