

TABLE DES MATIERES

Introduction	iii
Liste des participants	vi
Conférences et communications	ix
Partitions with "N copies of N"	1
Ashok K. Agarwal	
Relations fonctionnelles et dénombrement des hypercartes planaires pointées	5
Didier Arquès	
Prefix-free words of length n over m letters: two-sided well-balanced parentheses and palindromes	27
Joffroy Beauquier, Loys Thimonier	
Combinatorial representations of some Lie groups and Lie algebras	34
François Bergeron	
Definite integral evaluation by enumeration	48
David M. Bressoud	
Enumeration of certain Young tableaux with bounded height	58
Myriam DeSainte-Catherine, Gérard X. Viennot	
Fonctions symétriques et séries hypergéométriques basiques multivariées, II	68
Jacques Désarménien, Dominique Foata	
Raising operators and Young's rule	91
Adriano M. Garsia	
Counting three-line latin rectangles	106
Ira M. Gessel	
Chemins sous-diagonaux et tableaux de Young	112
Dominique Gouyou-Beauchamps	
Foncteurs analytiques et espèces de structures	126
André Joyal	

Enumeration under finite group action: symmetry classes of mappings Adalbert Kerber	160
Joint distributions of three descriptive parameters of bridges Germain Kreweras	177
Some new computational methods in the theory of species Gilbert Labelle	192
Combinatorial resolution of systems of differential equations, I. Ordinary differential equations Pierre Leroux, Gérard X. Viennot	210
Une combinatoire non-commutative pour l'étude des nombres sécants André Longtin	246
Theorem of Poincaré-Birkhoff-Witt, logarithm and symmetric group representations of degrees equal to Stirling numbers Christophe Reutenauer	267
A baker's dozen of conjectures concerning plane partitions Richard Stanley	285
Combinatorics of Jacobi configurations I: Complete oriented matchings Volker Strehl	294
About the inequalities of Erdős and Moser on the largest transitive subtournament of a tournament Claudette Tabib	308
Heaps of pieces, I: Basic definitions and combinatorial lemmas Gérard X. Viennot	321
The calculus of virtual species and K-species Yeong-Nan Yeh	351
Toward a combinatorial proof of the Jacobian conjecture? Doron Zeilberger	370
Séance de problèmes	381
