Introduction 1

1	Overview of the cardiovascular system	2
----------	---------------------------------------	---

Anatomy and histology 5

2	Gross anatomy and histology of the heart	6
3	Vascular anatomy	8
4	Vascular histology and smooth muscle cell ultrastructure	10

Blood and body fluids 13

5	Constituents of blood	14
6	Erythropoiesis, haemoglobin and anaemia	16
7	Haemostasis	18
8	Thrombosis and anticoagulants	20
9	Blood groups and transfusions	22

Cellular physiology 25

10	Membrane potential, ion channels and pumps	26
11	Electrophysiology of cardiac muscle and origin of the heartbeat	28
12	Cardiac muscle excitation–contraction coupling	30
13	Electrical conduction system in the heart	32
14	The electrocardiogram	34
15	Vascular smooth muscle excitation–contraction coupling	36

Form and function 39

16	Cardiac cycle	40
17	Control of cardiac output	42
18	Haemodynamics	44
19	Blood pressure and flow in the arteries and arterioles	46
20	The microcirculation and lymphatic system and diapedesis	48
21	Fluid filtration in the microcirculation	50
22	The venous system	52
23	Local control of blood flow	54
24	Regulation of the vasculature by the endothelium	56
25	The pulmonary, skeletal muscle and fetal circulations	58
26	The coronary, cutaneous and cerebral circulations	60

Integration and regulation 63

- 27** Cardiovascular reflexes 64
- 28** Autonomic control of the cardiovascular system 66
- 29** The control of blood volume 68
- 30** Cardiovascular effects of exercise 70
- 31** Shock and haemorrhage 72

History, examination and investigations 75

- 32** History and examination of the cardiovascular system 76
- 33** Cardiac imaging 78

Pathology and therapeutics 81

- 34** Risk factors for cardiovascular disease 82
- 35** β -blockers, angiotensin-converting enzyme inhibitors, angiotensin receptor blockers and Ca^{2+} channel blockers 84
- 36** Hyperlipidaemias 86
- 37** Atherosclerosis 88
- 38** Mechanisms of primary hypertension 90
- 39** Treatment of hypertension 92
- 40** Stable, microvascular, and vasospastic angina 94
- 41** Pharmacological management of stable, microvascular and vasospastic angina 96
- 42** Non-ST segment elevation acute coronary syndromes (NSTEMI) 98
- 43** Coronary revascularisation 100
- 44** Pathophysiology of acute myocardial infarction 102
- 45** ST segment elevation myocardial infarction (STEMI) 104
- 46** Heart failure 106
- 47** Treatment of chronic heart failure 108
- 48** Mechanisms of tachyarrhythmia 112
- 49** Atrial fibrillation 114
- 50** Other supraventricular arrhythmias 118
- 51** Ventricular tachyarrhythmias and their non-pharmacological management 120
- 52** Pharmacological treatment of tachyarrhythmias 122
- 53** Conduction system abnormalities and pacing 124
- 54** Diseases of the aortic valve 126
- 55** Diseases of the mitral valve 128
- 56** Congenital heart disease 130
- 57** Cardiomyopathies and channelopathies 132
- 58** Pulmonary hypertension 134
- 59** Stroke 136
