Chapter 1 The Perinatal Necropsy	
<i>Jean W. Keeling</i>	1
Introduction	1
Importance of Negative Findings	2
Adequate Clinical Information	2
Place of Structured Request Forms in Perinatal Pathology	3
Growth and Development	3
Equipment for Perinatal Necropsy	7
Post-mortem Examination	9
Examination of the Embryo and Fetus	27
Examination of the Placenta	27
Appendix	30
 Chapter 2 Placenta and Umbilical Cord	
<i>Patricia A. Boyd</i>	45
Introduction	45
Development of the Placenta	46
Mature Delivered Placenta	51
Circulation in the Placenta	52
Abnormalities of Placentation	54
Placenta in Multiple Pregnancy	55
Placenta in Genetic and Congenital Abnormalities of the Fetus	57
Umbilical Cord and Placental Membranes	57
Placenta in Maternal Disorders	60
Intrauterine Growth Retardation	62
Macroscopic Abnormalities Within the Placenta	62
Placenta Following Intrauterine Fetal Death	66
Placental Oedema	66
Placental Infection	67

Chapter 3 Spontaneous Abortion and the Pathology of Early Pregnancy

<i>S. Knowles</i>	77
Introduction	77
Frequency of Spontaneous Abortion	77
Causes of Spontaneous Abortion	78
Maternal Disease—General	79
Maternal Disease—Gynaecological	79
Drugs—Social	80
Drugs—Therapeutic	80
Immunological Rejection	80
Environmental Hazards to Early Pregnancy	81
Other Factors	81
Pathological Classification of Spontaneous Abortion	81
Mechanisms of Spontaneous Abortion	83
Pathological Examination of Abortion Material	84
Examination of Placental Tissue	84
Changes Following Fetal Death	84
Causes of Fetal Death	85
Repeated Spontaneous Abortion	86
Criminal Abortion	87
Disorders of Twinning	87
Ectopic Gestation	91
Gestational Trophoblastic Neoplasia	93

Chapter 4 Examination of the Fetus Following Prenatal Suspicion of Congenital Abnormality

<i>Jean W. Keeling</i>	99
Introduction	99
Review of Prenatal Diagnosis	99
Complications of Methods of Antenatal Diagnosis	101
Information for the Pathologist	102
Examination of Fetus and Placenta	102
Artefactual Abnormalities	104
Specific Fetal Anomalies	106
Fetal Abnormalities and Elevated Alpha-fetoprotein Levels in Amniotic Fluid or Maternal Serum	114
Chromosome Anomalies	116
Amnion Rupture Sequence	117

Chapter 5 Congenital Abnormalities and the Pathologist

<i>Mary J. Seller and M. Bobrow</i>	123
Introduction	123
Definitions	123
Clinical Importance of Accurate Diagnosis	124
Factors Involved in Genesis of Congenital Abnormalities	127
Aetiology of Congenital Abnormalities	129
Conclusions	133

Chapter 6 Genetic Metabolic Disease

<i>G. A. Machin</i>	135
Introduction	135
Prenatal Diagnosis	136
Pathogenesis and Classification	139
Clinical Presentation	141
Screening	146
Necropsy and Biopsy Investigation	147
Reference Laboratories for Investigation of Metabolic Disorders	147

Chapter 7 Epidemiology of Fetal and Neonatal Death

<i>Jean Golding</i>	151
Introduction	151
Accuracy of Perinatal Death Statistics	151
Epidemiological Analyses	153
Studies of Perinatal Mortality	153
Causes of Perinatal Death	158
Avoidability of Death	162
Discussion	163

Chapter 8 Macerated Stillbirth

<i>Jean W. Keeling</i>	167
Introduction	167
Changes of Maceration	167
Problems and Limitations of Examination	169
Histological Examination	169
Examination of the Placenta	169
Microbiological Studies	172
Chromosome Culture	172
Radiographic Examination	173
Pathological Abnormalities in Macerated Stillbirth	173
Conclusions	177

Chapter 9 Prematurity

<i>Gillian Batcup</i>	179
Introduction and Definitions	179
Predisposing Factors	180
Pathology of the Preterm Infant	184
Conclusion	197

Chapter 10 Intrapartum Asphyxia and Birth Trauma

<i>Jean W. Keeling</i>	199
Introduction	199
Fetal Response to Asphyxia	199
Fetal Response to Labour	200
Incidence	201
Placental Factors During Labour	201

Maternal Factors in Labour	201
Fetal Factors in Labour	202
Intrapartum Asphyxial Insult	203
Traumatic Birth Injury	205
 Chapter 11 Fetal Hydrops	
<i>Jean W. Keeling</i>	211
Introduction	211
Mechanisms	212
Causes of Fetal Hydrops	212
Investigation of Fetal Hydrops	225
 Chapter 12 Congenital Tumours	
<i>P. J. Berry</i>	229
Introduction	229
Incidence	230
Aetiology	230
Investigation of Congenital Tumours	232
Teratomas	233
Congenital Neuroblastoma	235
Renal Tumours	237
Liver Tumours	240
Congenital Mesenchymal Tumours	241
Congenital Leukaemia	243
Tumours of the Central Nervous System	244
Maternal Malignant Disease in Pregnancy	245
 Chapter 13 Immunology	
<i>Helen M. Chapel</i>	249
Normal Mechanisms	249
Pathology	255
 Chapter 14 Infection in Pregnancy and the Neonatal Period	
<i>Helen Holzel</i>	265
Adverse Effects of Infection During Pregnancy	265
Introduction	265
Viral Infection	265
Parasitic Infection	271
Bacterial Infection	272
Infection in the Neonate	274
Introduction	274
Congenital Infection: Toxoplasma, Rubella, CMV and HSV	274
Bacterial Infection in the Neonate	279

Acute Neonatal Viral Infection 284

Other Infection 286

Investigation of Infection 286

Chapter 15 Iatrogenic Disease

Jean W. Keeling 295

Introduction 295

Maternal Medication During Pregnancy 295

Prenatal Diagnosis 296

Intrapartum Monitoring 298

Breech Delivery 298

Neonatal Intensive Care 299

Medication 306

Nutritional Rickets 309

Necrotising Enterocolitis 310

Chapter 16 The Gastrointestinal Tract and Exocrine Pancreas

S. Variend 315

Development 315

Oral Cavity 316

Oesophagus 317

Stomach 317

Small Intestine 318

Colon and Rectum 326

Anorectal Malformations 329

Abdominal Wall Defects and Hernias 329

Exocrine Pancreas 333

Chapter 17 Liver and Gall Bladder

D. I. Rushton 339

Embryology 339

Physiology 339

Classification of Fetal and Neonatal Liver Disease 341

Cholestasis 342

Neonatal Giant Cell Transformation 343

Conjugated Hyperbilirubinaemia 343

Extrahepatic Biliary Atresia 344

Paucity of the Intrahepatic Bile Ducts 345

Infectious Causes of Conjugated Hyperbilirubinaemia 346

Non-viral Infections 348

Metabolic Disorders 350

Cirrhosis, Fibrosis and Cystic Disease 352

Trauma and Iatrogenic Disease 353

Circulatory Disorders 355

Liver Disease in Babies of Diabetic Mothers 356

Malformations of the Liver 357

Tumours 357

Gall Bladder and Extrahepatic Bile Ducts (Excluding EHBA) 359

Chapter 18 The Respiratory System

<i>Gillian S. Gau</i>	363
Introduction	363
Normal Development	364
Developmental Anomalies of the Upper Respiratory Tract	365
Developmental Anomalies of the Lower Respiratory Tract	367
Effects of Birth Asphyxia	371
Pulmonary Pathology Associated with Immaturity	372

Chapter 19 The Cardiovascular System

<i>J. N. Cox and J. Briner</i>	381
Introduction	381
Development of the Heart	381
Changes in the Circulation at Birth	384
Examination of the Heart	385
Congenital Heart Disease	386
Infection	394
Endocardial Fibroelastosis	395
Myocardial Necrosis	395
Tumours	397
Conduction System	399
Pericardium	399
Ductus Arteriosus	400
Aorta and Peripheral Vessels	401
Lymphatics	402

Chapter 20 The Urogenital System

<i>R. Anthony Risdon</i>	407
Kidneys and Urinary Tract	407
Development	407
Malformations of the Kidney	409
Tumours of the Kidney in the Neonate	417
Hereditary Abnormalities of Renal Tubular Transport	418
Renal Hypoperfusion	418
Congenital Nephrotic Syndrome	418
Renal Infection	421
Renal Glomerular Lesions in Cyanotic Congenital Heart Disease	421
Congenital Abnormalities of the Renal Pelvis and Ureter	422
Congenital Abnormalities of the Bladder	422
Congenital Abnormalities of the Urethra	423
Reproductive Organs	424
Development	424
Congenital Anomalies of the Male Genital Tract	427
Congenital Anomalies of the Female Genital Tract	427

Chapter 21 The Endocrine System	
<i>Elizabeth S. Gray</i>	429
Introduction	429
Pituitary/Hypothalamic Axis	429
Adrenal Glands	432
Thyroid Gland	440
Parathyroid Glands	442
Endocrine Pancreas	444
 Chapter 22 The Reticuloendothelial System and Blood	
<i>C. L. Berry</i>	453
Components of the Immune Response	453
Morphological Development	453
Cellular Development	454
Functional Aspects of Cellular Development	455
Abnormalities of the Immunoreactive Cells and Tissues	456
Thymus	457
Spleen	458
Lymph Nodes	459
Rhesus Isoimmunisation	459
Anaemia in Infancy	460
 Chapter 23 Hydrocephalus and Malformations of the Central Nervous System	
<i>K. M. Laurence</i>	463
Development of the Central Nervous System	463
Hydrocephalus	465
Introduction	465
Clinical Features	466
Types of Hydrocephalus	466
Malformations Leading to Hydrocephalus	468
Inflammation Causing Hydrocephalus	472
Tumours Leading to Hydrocephalus	473
Neural Tube Defects	473
Introduction	473
Anencephaly	474
Cranial Meningocele and Encephalocele	476
Myelocele (Myelomeningocele)	477
Meningocele	479
Spina Bifida Occulta	479
Other Malformations of the Spinal Cord	480
Other Disorders with NTD as a Constant or Common Component	480
Arhinencephaly	482
Hydranencephaly	484
Agenesis of the Corpus Callosum	485
Cerebellar Malformations	486
Microcephaly	486
Megalencephaly	487
Micropolygyria	487
Porencephaly	488
Pachygyria, Lissencephaly and Agyria	488

Chapter 24 Acquired Disorders of the Central Nervous System

<i>R. N. Laurini</i>	491
Introduction	491
Mechanical Birth Trauma	491
Haemorrhage	492
Hypoxic and Ischaemic Cerebral Injury	499
Intrauterine Brain Damage	502
Vascular Abnormalities	503
Kernicterus	503
Hypoglycaemia	504
Infection	504

Chapter 25 Skeletal Muscle and Peripheral Nerves

<i>Margaret M. Esiri</i>	509
Development of Skeletal Muscle	509
Development of Muscle Innervation	510
Generalised Abnormalities of Muscle	510
Arthrogryposis or Arthrogryposis Multiplex Congenita	510
Investigation of Neuromuscular Disease in Infants	511
Classification of Neonatal Neuromuscular Disease	511

Chapter 26 The Skeletal System

<i>H. J. van der Harten</i>	529
Introduction	529
Normal Development of the Skeleton	529
Osteochondrodysplasias	530
Other Generalised Skeletal Abnormalities Associated with Perinatal Death	539
Other Skeletal Abnormalities	541
Fractures	542
Osteomyelitis	542

Chapter 27 The Skin

<i>Beryl Crossley</i>	545
Development of the Skin	545
Disorders of Development	546
Dermal Developmental Disorders	549
Developmental Abnormalities of Pigment	550
Common Neonatal Skin Conditions	550
Birthmarks	552
Congenital Infections with Skin Manifestations	556
Congenital Genetically Determined Diseases	558
Congenital Blistering Disorders—Epidermolysis Bullosa	561
Skin Infiltrations and Tumour-like Lesions	564

Chapter 28 Special Senses

Beryl Crossley 567

The Eye 567

Development 567

Developmental Abnormalities of the Eye 569

Developmental Abnormalities Associated with Specific Chromosomal Defects 571

Infections 572

Cataract 574

Retinal Disorders of Infancy 575

The Ear 577

Development 577

Developmental Abnormalities of the Ear 578

Ears of the Stillborn 578

Congenital Rubella Infection and Hearing Loss 579

Subject Index 581
