## Native and Biosynthetic Growth Hormones

|                                                                                                                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Evolution and structure of the growth hormone gene cluster<br><i>J.S. Parks, M. Kassels, M.C. McKean, J.T. Parks, C. Johnson, and L. Meacham</i>                                                    | 3  |
| Cell-type-specific regulation of growth hormone gene expression<br><i>P. Tripputi, S. Guerin, and D.D. Moore</i>                                                                                    | 19 |
| Characterization of natural-sequence recombinant human growth hormone<br><i>W.F. Bennett, R. Chloupek, R. Harris, E. Canova-Davis, R. Keck, J. Chakel, W.S. Hancock, P. Gellefors, and B. Pavlu</i> | 29 |
| Evolutionary aspects of growth hormones from nonmammalian species<br><i>H. Kawauchi, and A. Yasuda</i>                                                                                              | 51 |
| Circulating binding proteins for human growth hormone<br><i>G. Baumann</i>                                                                                                                          | 69 |
| Direct actions of growth hormone and insulin-like growth factor in cultured adipocytes<br><i>J. Schwartz, C. Carter-Su, C.M. Foster, and J.A. Shafer</i>                                            | 85 |

## Somatomedins

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| Localization and regulation of IGF-I and IGF-II mRNA<br><i>M.A. Hynes, P.J. Brooks, J. English, J.J. Van Wyk, and P.K. Lund</i> | 103 |
|---------------------------------------------------------------------------------------------------------------------------------|-----|

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| Studies on somatomedin-binding protein<br><i>G. Pòvoa, K. Hall, and V.P. Collins</i>                                        | 121 |
| Receptors for insulin-like growth factors I and II<br><i>R.G. Rosenfeld</i>                                                 | 133 |
| <i>In vivo</i> actions of insulin-like growth factor-I<br><i>J. Zapf, H.P. Guler, C. Schmid, A. Kurtz, and E.R. Froesch</i> | 145 |

### Growth Factors

|                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The structure and physiology of epidermal growth factor and its receptor<br><i>R.W. Donaldson, S. Nishibe, and G. Carpenter</i>                                        | 165 |
| Platelet-derived growth factor – Structural and functional aspects of the A-chain gene<br><i>C. Betsholtz, F. Rorsman, M. Bywater, C.-H. Heldin, and B. Westermark</i> | 181 |
| Biological effects of transforming growth factors<br><i>H.L. Moses, J. Keski-Oja, R.M. Lyons, N.J. Sipes, C.C. Bascom, and R.J. Coffey, Jr.</i>                        | 191 |

### Neural Regulation of Growth Hormone Secretion

|                                                                                                                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Ontogeny of growth hormone-releasing factor and its role in fetal and neonatal growth<br><i>W.B. Wehrenberg and R.C. Gaillard</i>                                                                                                                     | 203 |
| Structure and expression of growth hormone-releasing hormone (GHRH) genes<br><i>K.E. Mayo</i>                                                                                                                                                         | 217 |
| Multifactorial regulation of growth hormone<br><i>C. Berthelie, P. Bertrand, M.T. Bluet-Pajot, H. Clauser, D. Durand, A. Enjalbert, J. Epelbaum, E. Rerat, and C. Kordon</i>                                                                          | 231 |
| Growth hormone-releasing hormone and somatostatin in the physiology and pathophysiology of growth hormone secretion<br><i>L.A. Frohman, P. Chomczynski, T.R. Downs, H. Katakami, and J.-O. Jansson</i>                                                | 247 |
| Aspects of neurotransmitter control of GH secretion: basic and clinical studies<br><i>F. Camanni, E. Ghigo, E. Mazza, E. Imperiale, S. Goffi, V. Martina, V. De Gennaro Colonna, S.G. Cella, D. Cocchi, V. Locatelli, F. Massara, and E.E. Müller</i> | 263 |

## Growth Hormone Deficiency States

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Growth hormone deficiency (GHD) and GHD-like syndromes<br><i>R.M. Blizzard</i>                                                                        | 285 |
| Use of provocative tests and measurement of spontaneous GH secretion to diagnose GH deficiency<br><i>J.R. Bierich, G. Brüggmann, and E. Kiessling</i> | 299 |
| Growth hormone secretory dysfunction after hypothalamic and pituitary irradiation<br><i>R. Rappaport, M. Fontoura, and R. Brauner</i>                 | 321 |

## Round Table-Approach to Therapy

|                                                                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A critical overview of the state of the art<br><i>R.D.G. Milner</i>                                                                                                                                      | 341 |
| Human growth hormone therapy in children with growth hormone deficiency<br><i>K. Takano, K. Shizume, N. Hizuka, K. Asakawa, I. Sukegawa, R. Horikawa, and the members of the Study Committee for hGH</i> | 353 |
| Growth hormone-releasing hormone: a new treatment for growth hormone deficiency<br><i>R.J.M. Ross, M.A. Preece, G.M. Besser, and M.O. Savage</i>                                                         | 365 |
| Growth hormone deficiency states: approach by CNS-acting compounds<br><i>C. Pintor, S. Loche, R. Puggioni, S.G. Cella, V. Locatelli, A. Lampis, and E.E. Müller</i>                                      | 375 |
| Discussion by <i>Bierich, Blizzard, Cattaneo, Cavallo, Costin, Ghigo, Heinrich, Marek, Milner, Müller, Pintor, Rappaport, Rosenfeld, Ross, Savage, Smith, Takano</i>                                     | 389 |

## Growth Hormone Hypersecretory States

|                                                                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Growth hormone-releasing factor in acromegaly<br><i>T. Shibasaki, A. Masuda, M. Hotta, T. Imaki, N. Hizuka, K. Takano, and K. Shizume</i>                   | 401 |
| The hypersecreting somatotroph: functional and morphological aspects<br><i>A. Spada, M. Bassetti, M. Arosio, L. Vallar, F.R. Elahi, and G. Giannattasio</i> | 411 |

|                                                                                                                                                                                                                           |     |
