

CONTENTS

INTRODUCTION	1
§1. The prorepresenting substratum of the formal moduli	8
§2. Automorphisms of the formal moduli	15
§3. The Kodaira-Spencer map and its kernel	32
§4. Applications to isolated hypersurface singularities	61
§5. Plane curve singularities with k^* -action.	72
§6. The generic component of the local moduli suite.	88
§7. The moduli suite of $x_1^5 + x_2^{11}$.	105
§8. (Appendix by B. Martin & G. Pfister) An algorithm to compute the kernel of the Kodaira-Spencer map for an irreducible plane curve singularity.	112
