

Table of Contents

Introduction	1
Notations and Conventions Concerning Quadratic Number Fields.....	2
I. Hilbert's Modular Group	4
1. The Action of the Hilbert Modular Group.....	5
2. The Distance to the Cusps	7
3. A Fundamental Domain	9
4. The Hurwitz-Maass Extension.....	11
5. Elliptic Fixed Points	14
6. Hilbert Modular Forms.....	17
7. The Adelic Version.....	25
II. Resolution of the Cusp Singularities.....	28
1. The Local Ring at Infinity.....	28
2. Glueing	30
3. Dividing by the Units	33
4. Digression: the Elliptic r -gon	36
5. Continued Fractions	37
6. Resolution of Cyclic Quotient Singularities	41
7. The Baily-Borel Compactification	44
III. Local Invariants.....	45
1. Local Chern Classes.....	45
2. Meyer's Theorem	48
3. Extension of Differential Forms.....	51
IV. Global Invariants.....	58
1. The Volume of $\Gamma \backslash \mathfrak{H}^2$	58
2. Chern Numbers of Y_F	61
3. Inequalities for χ and c_1^2	66
4. Dimensions of Spaces of Cusp Forms	71
5. Representations on Spaces of Cusp Forms	77

6. The Vanishing of the Fundamental Group	81
7. Rigidity	82
 V. Modular Curves on Modular Surfaces	 86
1. The Curves F_N and T_N	86
2. Intersections with the Cusp Resolutions	91
3. The Components of F_N	93
4. The Geometry of $SO(2, 2)$	100
5. The Volume of the Modular Curves	101
6. The Intersection Points of the Modular Curves	102
7. Classification of Elliptic Fixed Points	106
8. The Intersection Number of T_1 and T_N	110
9. The Fixed Points of the Galois Involution	116
Appendix: Modular Forms on $\Gamma_0(D)$	118
 VI. The Cohomology of Hilbert Modular Surfaces	 121
1. Cohomology and Hilbert Modular Forms	123
2. The Dual of T_N	130
3. The Generating Series of the Modular Curves	133
4. The Doi-Naganuma Lifting	136
5. The Intersection Number of T_M and T_N	142
6. The Action of the Hecke Algebra on the Cohomology	144
7. The Periods of Eigenforms	147
8. The Contribution of an Eigenform to the Picard Number	155
 VII. The Classification of Hilbert Modular Surfaces	 158
1. The Rough Classification of Algebraic Surfaces	159
2. Configurations of Curves on Surfaces	161
3. Classification Theorems.	165
4. Exceptional Curves on Hilbert Modular Surfaces	167
5. Estimates for the Numerical Invariants	171
6. Proof of the Classification	174
7. Canonical Divisors.	178
 VIII. Examples of Hilbert Modular Surfaces	 187
1. Preliminaries	187
2. The Examples	189
 IX. Humbert Surfaces	 205
1. Modular Embeddings	205
2. Humbert Surfaces.	210
3. Examples	215
4. Jacobians with Real Multiplication	220

X. Moduli of Abelian Schemes with Real Multiplication	222
1. Abelian Schemes with Real Multiplication	223
2. Modular Stacks	227
3. Hilbert Modular Forms.	234
4. The Galois Action on the Set of Components	236
XI. The Tate Conjectures for Hilbert Modular Surfaces	239
1. Hodge and Tate Cycles	240
2. Decomposition of the Cohomology and L -Series.	245
3. Splitting up the Galois Representation	249
4. The Tate Conjectures.	257
Table 1. Elliptic Fixed Points	267
Table 2. Numerical Invariants	269
Bibliography	277
List of Notations.	284
Index.	290
