

Manuel Bremer

An Introduction to Paraconsistent Logics

PETER LANG

Europäischer Verlag der Wissenschaften

Contents

1.	Introduction	9
----	--------------	---

Part I: Foundations

2.	Semantic Closure	19
3.	Methodological Considerations	33
4.	LP and Relatives	45
5.	Relevant Logics	63
6.	A Sequential Calculus	79
7.	Adaptive Logics	93
8.	LFI and Da Costa-Systems	107
9.	Other Systems	121

Part II: Applications

10.	Semantics	127
11.	Set Theory	139
12.	Inconsistent Mathematics	149
13.	Meta-Logic	159
14.	Deontic Logic and Meta-Ethics	167
15.	Epistemology and Philosophy of Science	177

Part III: Discussions, Alternatives, Perspectives

16. Hypercontradictions	185
17. Inconsistent Ontology	199
18. Alternative Solutions of the Paradoxes?	207
19. Paraconsistency and Programming	215
20. Universal Logic	221
Epilogue	241
Further References	243
