Wide Bandgap Devices – Challenges in Application

Recent Progress of 650 V Cascode GaN Technology 13

Charlie Liu, ON Semiconductor, USA
Ali Salih, ON Semiconductor, USA
Balaji Padmanabhan, ON Semiconductor, USA
Woochul Jeon, ON Semiconductor, USA
Peter Moens, ON Semiconductor, Belgium
Marnix Tack, ON Semiconductor, Belgium
Eddy De Backer, ON Semiconductor, Belgium

Advantages of Temperature-stable Ron of SiC Diode in Practical Applications 21

Hideki Nakata, Panasonic Corporation, Japan
**Nominated for the Best Paper Award*
Kazuyuki Sawada, Panasonic Corporation, Japan
Keisuke Watanabe, Panasonic Corporation, Japan
Ryosuke Usui, Panasonic Corporation, Japan
Tetsuzo Ueda, Panasonic Corporation, Japan
Eiji Fujii, Panasonic Corporation, Japan

Drive and Protection of SiC Power Module 28

Xiankui Ma, Mitsubishi Electric & Electronics, China
Xing Zhang, Mitsubishi Electric & Electronics, China
Jianfei Li, Wuxi Sineng New Energy, China

Performance Comparison for A4WP Class-3 Wireless Power Compliance between eGaN® FET and MOSFET in a Class E Amplifier 35

Michael de Rooij, Efficient Power Conversion Corporation, USA

New Hybrid Large DIIPM™ for PV Application with Built-in SiC-SBD and Seventh-generation CSTBT™ 43

Yazhe Wang, Mitsubishi Electric Corporation, Japan
Kosuke Yamaguchi, Mitsubishi Electric Corporation, Japan
Tomofumi Tanaka, Mitsubishi Electric Corporation, Japan
Kiyoto Watabe, Mitsubishi Electric Corporation, Japan

Power Electronics Modulation and Motor Control

ΣΔ-Conversion used for Motor Control 49

Li Tao, Analog Devices, China
**Nominated for the Best Paper Award*
Jens Sorensen, Analog Devices, USA

Highly Dynamic, Highly Integrated Current Sensors for Electromobility Applications 57

Peter Radde, Sensitec, Germany
Rolf Slatter, Sensitec, Germany

Analysis of Temperature Correlation on IGBT Modules	65
ZiQing Zheng, Infineon Technologies, China	
Song Shen, Infineon Technologies, China	
Zhenbo Zhao, Infineon Technologies, China	
Zhou Zeping, Shenzhen Hopewind Electric, China	
Xie Feng, Shenzhen Hopewind Electric, China	

Cost Efficient Matrix Converter Employing a Conventional Simple Controller	72
Rui Zhao, University of Sheffield, Great Britain	
Daniel T. Gladwin, University of Sheffield, Great Britain	
David A. Stone, University of Sheffield, Great Britain	

Cost Efficient Medium Power Inverter Design up to 90 kW	80
Timo Gassauer, Semikron, South Korea	
Nak-Gyu Sung, Semikron, South Korea	

Keynote

Toyota's Challenge of Applying SiC Power Semiconductors to Environmentally Friendly Vehicles	86
Kimimori Hamada, Toyota Motor Corporation, Japan	

Poster Session

Benefits of HTS Technology to FLNG Power Systems	87
Alexey Kuchaev, SuperOx, Russia	

Modelling and Control of Commercial PV Solar Inverter for use in Electromechanical Performance Simulation	94
--	-----------

Marcos Aurélio Izumida Martins, CERTI Foundation, Brazil

**Nominated for the Best Paper Award Renewable Energy*

Cesare Quinteiro Pica, CERTI Foundation, Brazil

Yales Romulo de Novaes, CERTI Foundation, Brazil

Kadu Henrique Miranda Lemes, CERTI Foundation, Brazil

A New and Innovative Gate Charge Measurement Technique	102
Kai-Seong Cheah, Keysight Technologies International, Singapore	
Atsushi Mikata, Keysight Technologies International, Japan	
Hisao Kakitani, Keysight Technologies International, Japan	
Ryo Takeda, Keysight Technologies International, Japan	

An Efficient Method to Estimate the Maximum Junction Temperature of IGBT Modules	108
Hu Bo, Mitsubishi Electric & Electronics, China	
Gaosheng Song, Mitsubishi Electric & Electronics, China	
Xiankui Ma, Mitsubishi Electric & Electronics, China	

Optimizing Gate Drive to Smooth Gate Waveform	114
Yuancheng Zhang, Mitsubishi Electric & Electronics, China	
Xiankui Ma, Mitsubishi Electric & Electronics, China	

New Power Module for 3 Level Power Solution	120
Nobuya Nishida, Mitsubishi Electric Corporation, Japan	
Akiko Goto, Mitsubishi Electric Corporation, Japan	
Yasuo Konishi, Mitsubishi Electric Corporation, Japan	
Hideki Tsukamoto, Mitsubishi Electric Corporation, Japan	
SiC-MOSFET Based Power Modules Utilizing Split Output Topology for Superior Dynamic Behavior	127
Roger Chen, Vincotech, China	
Michael Frisch, Vincotech, Germany	
Pressureless Sintering of Nano-Ag Paste with Low Porosity for High Power Die Attach	132
Fen Chen, Indium Corporation, China	
Sihai Chen, Indium Corporation, USA	
Guangyu Fan, Indium Corporation, USA	
Xue Yan, Indium Corporation, USA	
Chris LaBarbera, Indium Corporation, USA	
Lee Kresge, Indium Corporation, USA	
Ning-Cheng Lee, Indium Corporation, USA	
New MOSFET Packaging Techniques for High Power Density	142
Chien-Hsun Lee, ON Semiconductor, USA	
David Billings, ON Semiconductor, USA	
Yenting Wen, ON Semiconductor, USA	
Study on Semi-Tensor Product Theory in Suppressing Negative Effect of Reactive Power Surge of Power Distribution System	150
Haicong Zhang, Harbin Institute of Technology, China	
Jianxiong Yu, Harbin Institute of Technology, China	
Tianqi An, Harbin Institute of Technology, China	
Liguo Wang, Harbin Institute of Technology, China	
Dianguo Xu, Harbin Institute of Technology, China	
Determination of Harmonic Contributions in a Multi-Harmonic Source Network	158
Osita Omeje, University of Lagos, Benin	
Frank Okafor, University of Lagos, Benin	
Challenges for IGBT Driver in MW Applications	166
Johannes Krapp, Semikron Electronic, Germany	

Special Session: Multilevel Power Converter Technologies

Two Novel Hybrid-Clamped Multilevel Converters for Medium-Voltage Direct-Driven Wind Turbines	171
Kui Wang, Tsinghua University, China	
Lie Xu, Tsinghua University, China	
Zedong Zheng, Tsinghua University, China	
Yongdong Li, Tsinghua University, China	

A Novel Modulation with Voltage Balancing Control for a Modular Matrix Converter	179
Yao Li, Tsinghua University, China Lie Xu, Tsinghua University, China Yongdong Li, Tsinghua University, China	
1.14 kV Tri-level Converters for Direct Drive Wind Turbines	181
Bing Liu, Beijing Etechwin Electric, China	
The Application of Parallel Connected Multilevel Converters in Urban Mass Transit	182
Yan Zhanghui, Hunan Hengxin Electric, China	
Research on the Modulation and Control Theory for the Multilevel Matrix Converter	183
Qiu Lin, Tsinghua University, China	

Automotive Power Electronics

Influence of High Frequency Charge-Discharge Cycling Induced by a Configurable Modular Multilevel Converter	184
Martel Tsirinomeny, EPFL Lausanne, Switzerland Alfred Rufer, EPFL Lausanne, Switzerland	
New Standard 800 A / 750 V IGBT Module Technology for Automotive Applications	191
	Keiichi Higuchi, Fuji Electric, Japan <i>*Winner of the Best Paper Award</i> Takahiro Koyama, Fuji Electric, Japan Akio Kitamura, Fuji Electric, Japan Shin Soyano, Fuji Electric, Japan Yoshikazu Takamiya, Fuji Electric, Japan Hiromichi Gohara, Fuji Electric, Japan Souichi Yoshida, Fuji Electric, Japan Hideto Kobayashi, Fuji Electric, Japan Yoshitaka Nishimura, Fuji Electric, Japan Thomas Heinzl, Fuji Electric Europe, Germany Akira Nishiura, Fuji Electric, Japan
Automotive Power Module Solution for EV Inverter Application	199
Hui Han, Mitsubishi Electric & Electronics, China Gaosheng Song, Mitsubishi Electric & Electronics, China	
A New Versatile High Power Intelligent Power Module (IPM) for EV and HEV Applications	205
Seiichiro Inokuchi, Mitsubishi Electric Corporation, Japan Shoji Saito, Mitsubishi Electric Corporation, Japan Arata Izuka, Mitsubishi Electric, Corporation, Japan Hata Yuki, Mitsubishi Electric Corporation, Japan Shinji Hatae, Mitsubishi Electric Corporation, Japan	
Reliability Design for Automotive Power Modules	210
Yangang Wang, Dynex Semiconductor, Great Britain Yibo Wu, Dynex Semiconductor, Great Britain Xiaoping Dai, Dynex Semiconductor, Great Britain Steve Jones, Dynex Semiconductor, Great Britain Guoyou Liu, Dynex Semiconductor, Great Britain	

High Frequency Converter

Design High Power Factor High Efficiency Primary-Side Regulated Flyback LED Driver 218

Ningliang Mi, Fairchild Semiconductor Corporation, USA
Richard Chung, Fairchild Semiconductor Corporation, USA
Xiukuan Jing, Fairchild Semiconductor Corporation, USA
Jason Guo, Fairchild Semiconductor Corporation, USA

Optimal Design of an Interleaved DC-DC Switch Mode Converter 226

Prasanna Kumar, PES Institute of Technology, India
Ramu T S, Indian Institute of Science, India

A Novel LED Driver Based on Single-stage LLC Resonant Converter 233

Yijie Wang, Harbin Institute of Technology, China
**Nominated for the Young Engineer Award*
Jiawei Sun, Harbin Institute of Technology, China
Yueshi Guan, Harbin Institute of Technology, China
KaiLin Ren, Harbin Institute of Technology, China
Wei Wang, Harbin Institute of Technology, China
Dianguo Xu, Harbin Institute of Technology, China

Performance of 1700V Si-IGBT/SiC-SBD Hybrid Module for High Efficiency AC690V Inverters 241

Taku Takaku, Fuji Electric, Japan
Haining Wang, Fuji Electric, Japan
Seiki Igarashi, Fuji Electric, Japan
Takashi Nishimura, Fuji Electric, Japan
Yuichi Onozawa, Fuji Electric, Japan
Shuji Miyashita, Fuji Electric, Japan
Osamu Ikawa, Fuji Electric, Japan
Jun Li, Fuji Electric, China

On the Multi-Level Inverter with Bi-directional Switching 248

Gayathri Devi, PES Institute of Technology, India
Ramu T S, Indian Institute of Science, India

Keynote

Driving Transport Electrification 256

Chris Gerada, University of Nottingham, Great Britain

Poster Session

An Accurate Thermal Resistance Testing Method for Power Semiconductors 257

Jin Zhang, Chinese Academy of Science, China
Zhijie Qiu, Chinese Academy of Science, China
Xuhui Wen, Chinese Academy of Science, China

Investigation on V_{CE} Slope of Field Stop IGBT (FS IGBT) during Low Current Turn-off Transient of Inductive Load Switching	264
Jiyong Lim, Fairchild Semiconductor, South Korea	
Kyuhyun Lee, Fairchild Semiconductor, South Korea	
Sungmin Yang, Fairchild Semiconductor, South Korea	
Sekyeong Lee, Fairchild Semiconductor, South Korea	
Youngchul Choi, Fairchild Semiconductor, South Korea	
A New Version Transfer Mold-Type DIIPM™s with Built-in Converter and Brake Function	272
Kosuke Yamaguchi, Mitsubishi Electric Corporation, Japan	
Shinya Nakagawa, Mitsubishi Electric Corporation, Japan	
Tomofumi Tanaka, Mitsubishi Electric Corporation, Japan	
Yazhe Wang, Mitsubishi Electric Corporation, Japan	
Performance of J1-Series Power Modules with Evaluation Kit	277
Kazuaki Hiyama, Mitsubishi Electric Corporation, Japan	
Noburu Miyamoto, Mitsubishi Electric Corporation, Japan	
Mikio Ishihara, Mitsubishi Electric Corporation, Japan	
Kazuki Yamada, Mitsubishi Electric Corporation, Japan	
Yosuke Nakata, Mitsubishi Electric Corporation, Japan	
Tatsuya Kawase, Mitsubishi Electric Corporation, Japan	
Kentaro Yoshida, Mitsubishi Electric Corporation, Japan	
Shinsuke Godo, Mitsubishi Electric Corporation, Japan	
A Comparison of Switching Characteristics between SiC BJT and Si IGBT at Junction Temperature above 200 °C	283
Hui Zhu, University of Sheffield, Great Britain	
Mark R Sweet, University of Sheffield, Great Britain	
E.M. Sankara Narayanan, University of Sheffield, Great Britain	
The Improvement of High Temperature Zn- Based Lead Free Solder by the Application of Besi's Programmable Ultrasonic Module (PUM)	291
Xiaodan Wu, Honeywell Electronic Materials, USA	
Jianxing Li, Honeywell Electronic Materials, USA	
Hyo Xi, Honeywell Co., Ltd, China	
Charles Galea, Besi Switzerland AG, Switzerland	
Heinrich Berchtold, Besi Switzerland AG, Switzerland	
Tora Unuvar, Honeywell Electronic Materials, USA	
Better Efficiency with Linear-Regulator Compared to Flyback-Converters in LED Lamps at AC Grids	300
Reinhard Jaschke, Helmut-Schmidt-University, Germany	
Klaus F. Hoffmann, Helmut-Schmidt-University, Germany	
Evaluating and Comparing IGBT Performance in Application Conditions	305
Ajit Dubhashi, ezIGBT.com, USA	
Modelling the Enhancement to the Thermal Performance of Encapsulants using Thermally Conductive Filler Materials	312
David Hewitt, University of Sheffield, Great Britain	
David Stone, University of Sheffield, Great Britain	
Martin Foster, University of Sheffield, Great Britain	

Design and Implementation of a 125 kW T-NPC PV Inverter 320

Yuelin Wu, Beijing Jiaotong University, China
Guohong Zeng, Beijing Jiaotong University, China
Jingdou Liu, Beijing Jiaotong University, China
Gaosheng Song, Mitsubishi Electric & Electronics, China
Jian Sun, Mitsubishi Electric & Electronics, China

Silicone Protection Solution for IGBT Modules: from Dielectric Encapsulation to Thermal Management 328

Zhiliang Li, Wacker Chemicals, China
Northy Zhou, Wacker Chemicals, China
Kevin Xiao, Wacker Chemicals, China
Bruce Yang, Wacker Chemicals, China
Winter Li, Wacker Chemicals, China
Jason Rouse, Wacker Chemicals, USA

Economic Assessments of Electric Energy Storage in Wave Power Integrations 333

Mukai Hao, China Electric Power Research Institute, China
**Winner of the Best Paper Award Renewable Energy*
He Guoqing, China Electric Power Research Institute, China
Xu Bolun, China Electric Power Research Institute, China

4th Generation Field Stop (FS) IGBT with High Performance and Enhanced Latch Up Immunity 341

Kyuhyun Lee, Fairchild Semiconductor, South Korea
Sungmin Yang, Fairchild Semiconductor, South Korea
Sekyeong Lee, Fairchild Semiconductor, South Korea
Jiyong Lim, Fairchild Semiconductor, South Korea
Youngchul Choi, Fairchild Semiconductor, South Korea

High Power Switching Device and Related Applications

An Approach to Balancing the Switching Behavior of Paralleled IGBT-Modules using a Differential-Mode Choke in a Gate-Control Loop 347

Karsten Fink, Power Integrations, Germany
Christoph Dustert, Power Integrations, Germany
Andreas Volke, Power Integrations, Germany

Advanced Features in Sophisticated Inverter Design Supporting MW-Applications 355

Yizheng Zhou, Infineon Technologies AG, Germany
Stefan Schmies, Infineon Technologies AG, Germany
Peter Lahl, Infineon Technologies AG, Germany
Karsten Schoo, Infineon Technologies AG, Germany
Martin Schulz, Infineon Technologies AG, Germany

Application Benefits Achieved Utilizing IGBT5-Based Power Semiconductors 363

Martin Schulz, Infineon Technologies, Germany
Raghavan Nagarajan, Infineon Technologies, Germany
Dirk Brieke, Infineon Technologies, Germany
ZhenBo Zhao, Infineon Technologies, China

State of the Art Thyristors for UHVDC Applications 370

Jens Przybilla, Infineon Technologies Bipolar, Germany

Uwe Kellner-Werdehausen, Infineon Technologies Bipolar, Germany

Sebastian P. Sommer, Infineon Technologies Bipolar, Germany

Mario Schenk, Infineon Technologies Bipolar, Germany

New Generation of Clustered IGBT with High Ruggedness 378

Hong Yao Long, University of Sheffield, Great Britain

**Winner of the Young Engineer Award*

Mark R Sweet, University of Sheffield, Great Britain

Maria M. De Souza, University of Sheffield, Great Britain

Ekkannath M. S. Narayanan, University of Sheffield, Great Britain

New Technologies for Energy Generation and Conversion

Integration of a Photovoltaic and Battery System into a Decentralized Power Generation 384

Hartmut Hinz, University of Applied Sciences Frankfurt, Germany

**Nominated for the Best Paper Award Renewable Energy*

Yavor Stefanov, University of Applied Sciences Frankfurt, Germany

Jonas Kilz, Süwag Energie, Germany

Thermal Comparison of SO8FL and DPAK Power Semiconductor Packages 392

Donald Zaremba, ON Semiconductor, USA

How to turn off IGBTs with Unipolar Voltage (0V)? 400

Norbert Pluschke, Semikron, Hong Kong

Niklas Hofstoetter, Semikron International, Germany

The High Power Density and High Efficiency 7th Generation IGBT Module Realizing Compact Power Conversion Systems 410

Jun Li, Fuji Electric, China

Junya Kawabata, Fuji Electric, Japan

Yoshiyuki Kusunoki, Fuji Electric, Japan

Yuichi Onozawa, Fuji Electric, Japan

Yoshitaka Nishimura, Fuji Electric, Japan

Yasuyuki Kobayashi, Fuji Electric, Japan

Song Chen, Fuji Electric, China

Osamu Ikawa, Fuji Electric, Japan

A Low-Switching Noise and High-Efficiency Superjunction MOSFET, Super J MOS® S2 419

Toshiaki Sakata, Fuji Electric, Japan

Yasushi Niimura, Fuji Electric, Japan

Shunji Takenori, Fuji Electric, Japan

Sota Watanabe, Fuji Electric, Japan

Takayuki Shimato, Fuji Electric, Japan

Hiroshi Minazawa, Fuji Electric, Japan

Yasuhiko Arita, Fuji Electric, Japan

Yasuyuki Kobayashi, Fuji Electric, Japan

Jun Li, Fuji Electric, Hong Kong
