

Prof. Dr. Elmar Csaplovics obtained a doctorate in remote sensing at TU Wien in 1982. He was a post-doc research fellow at the French National Institute for Agricultural Research (INRA) in Montpellier and at the Department of Geology, Geophysics and Geoinformatics, FU Berlin 1988-1992. After habilitation in remote sensing at TU Wien he is professor of Remote Sensing at TU Dresden since 1993. He was visiting professor at University College London (2007), at Université Paris VII Denis Diderot (2014) and at TU Wien (2015). His research focus is on remote sensing and applied geoinformation analysis for monitoring and assessment of land use land cover with emphasis on wetlands, arid lands, landscape history and natural heritage.

Anke Hahn is geographer with a focus on spatial development (University of Trier). She developed, managed and communicated several European territorial cooperation projects and worked for the INTERREG IIIB CADSES Programme 2000-2006. She specialises in graphic design and intercultural communication with a focus on promoting scientific findings. Currently she is scientific researcher at TU Dresden, Chair of Remote Sensing, and responsible for the communication of the INTERREG Central Europe Project MaGICLandscapes.

Christopher Marrs has a BA (Hons) Environmental Management and a Masters in Planning (Research) from the University of Manchester. He worked as a senior environmental consultant in the United Kingdom. Christopher specialises in green infrastructure, landscape ecology and environmental planning. He currently works as a scientific researcher at the TU Dresden, Chair of Remote Sensing, where he is the project manager for the INTERREG Central Europe Project MaGICLandscapes.

Stephan Schöps holds a Masters in Cultural Studies, Geography and Economics from the TU Dresden. He has worked in EU INTERREG programme administration for several years, also as a project manager for the Central Europe Project TransEcoNet, which was running at the Chair of Remote Sensing at TU Dresden from 2009 until 2012. He is now coordinating the environmental management and working for the Directorate of Property Management, Technology and Security of TU Dresden.
