

Content

About the authors.....	VI
Preface by Boris Zlotin	VII
Preface by Valeri Souchkov	VIII
1 Technology Pull: beyond Technology Push and Market Pull.....	1
2 TRIZ tools for the study and design of the evolution of engineering systems	2
3 S-curve analysis and pragmatic S-curve analysis	5
From trends in Altshuller's time to TESE	5
From S-curve analysis to pragmatic S-curve analysis.....	10
From the Trend of Increasing Ideality to the Trend of Increasing Value.....	11
3.1 Stage 1: Infancy	13
Causes.....	13
Indicators.....	15
Recommendations	16
3.2 Transitional Stage.....	17
Causes.....	19
Indicators.....	19
Recommendations	19
3.3 Stage 2: Rapid Growth	20
Causes.....	20
Indicators.....	21
Recommendations	24
3.4 Stage 3: Maturity.....	25
Causes.....	26
Indicators.....	28
Recommendations	30
3.5 Stage 4: Decline.....	32
Causes.....	32
Indicators.....	32
Recommendations	33
A special case in stage 4: reincarnation	34
3.6 Summarized recommendations for pragmatic S-curve analysis.....	34
4 Trends of Engineering System Evolution (TESE)	37
4.1 Trend of Increasing Value	38
4.2 Trend of Increasing System Completeness.....	39

4.3 Trend of Increasing Degree of Trimming.....	41
4.3.1 Subtrend: Trimming Subsystems.....	43
4.3.1 Subtrend: Trimming Operations.....	45
4.3.1 Subtrend: Trimming Components with the Lowest Value	46
4.4 Trend of Transition to the Supersystem	47
4.4.1 Subtrend: Increasing Differentiation of Parameters	49
4.4.2 Subtrend: Increasing Differentiation Between Main Functions.....	50
4.4.3 Subtrend: Deeper Integration	53
4.4.4 Subtrend: Increased Integrated Systems.....	56
4.5 Trend of Increasing Coordination	57
4.5.1 Subtrend: Coordination of Shape	58
4.5.2 Subtrend: Coordination of Rhythms.....	61
4.5.3 Subtrend: Coordination of Materials.....	62
4.5.4 Subtrend: Coordination of Actions.....	65
4.5.5 Subtrend: General Coordination of Parameters	67
4.6 Trend of Increasing Controllability	70
4.6.1 Subtrend: Increasing Level of Control within the System.....	71
4.6.2 Subtrend: Increasing Number of Controllable States.....	74
4.7 Trend of Increasing Dynamization	76
4.7.1 Subtrend: Design Dynamization	77
4.7.2 Subtrend: Composition Dynamization.....	80
4.7.3 Subtrend: Function Dynamization.....	82
4.8 Trend of Decreasing Human Involvement.....	83
4.9 Trend of Uneven Development of System Components.....	85
4.10 Trend of Flow Enhancement.....	86
4.10.1.1 Improve useful flows: Increase the conductivity of the flow	87
4.10.1.2 Improve useful flows: Improve flow utilization.....	93
4.10.2.1 Reduce harmful flows: reduce conductivity.....	99
4.10.2.2 Reduce harmful flows: reduce impact	101
5 Your next steps	105
References.....	106
Related literature.....	109
Foundational knowledge.....	109
Related Articles and papers.....	111
Supporting books	120
Pictures	121
