

TABLE OF CONTENTS

	Page
1 Introduction	1
2 The experiment and the workshop	
2.1 H. Sobieczky, G. Hefer and S. Tusche: "DFVLR-F5 Test Wing Experiment for Computational Aerodynamics"	4
2.2 W. Kordulla: "Final Announcement of the Workshop - Definition of the Test Cases"	23
2.3 H. Sobieczky: "DFVLR-F5 Test Wing Configuration - The Boundary Value Problem"	27
2.4 W. Kordulla: "Evaluation of the Workshop"	38
3 Invited papers	
3.1 Joe F. Thompson: "Advances in Numerical Grid Generation"	107
3.2 J. Cousteix and D. Arnal: "Boundary Layer Transition and Turbulence Modelling in Three-Dimensional Flow"	122
3.3 D. Vandromme and H. Haminh: "Turbulence Modelling for Compressible Flows"	139
4 Contributed papers	
4.1 N. M. Chaderjian: "Navier-Stokes Simulation of Transonic Wing Flow Fields Using a Zonal Grid Approach"	159
4.2 T. Lindeberg, A. Rizzi and B. Müller: "Numerical Simulation of Viscous Transonic Flow over the DFVLR-F5 Wing"	184
4.3 S. Obayashi, K. Fujii and S. Gavali: "Navier-Stokes Simulation of Wind-Tunnel Flow Using LU-ADI Factorization Algorithm"	200
4.4 M. A. Schmatz: "Three-Dimensional Viscous Flow Simulations Using an Implicit Relaxation Scheme"	226
4.5 D. Schwamborn: "Simulation of the DFVLR-F5 Wing Experiment Using a Block-Structured Explicit Navier-Stokes Method"	244
4.6 V. N. Vatsa and B. W. Wedan: "Navier-Stokes Calculations for DFVLR-F5 Wing in Wind Tunnel Using Runge-Kutta Time-Stepping Scheme"	269
5 Conclusions	289
6 Appendix: Tabulated measured pressure data	291
6.1 Location of sections with pressure taps	292

6.2	Wing surface	Page
6.2.1	Symmetric flow	293
6.2.2	Flow at an angle of attack of 2°	296
6.3	Splitter plate	
6.3.1	Symmetric flow	302
6.3.2	Flow at an angle of attack of 2°	304
