

Contents

Part I Fundamentals

Chapter 1 Physics of Water and Ice: Implications for Cryofixation

L. BACHMANN and E. MAYER (With 18 Figures)	3
1 Introduction	3
2 Functions of Water in Cryospecimens	4
3 Water Below Room Temperature	9
4 Aqueous Solutions Below Room Temperature	17
5 Specimen Cooling	24
References	31

Chapter 2 The Response of Biological Macromolecules and Supramolecular Structures to the Physics of Specimen Cryopreparation

E. KELLENBERGER (With 9 Figures)	35
1 Introduction	35
2 The Hydration Shells of Biological Macromolecules and Supramolecular Structures	35
3 Phases and Interface Phenomena	47
4 The Particular Case of the Biological Membrane	56
5 A Potpourri of Collapses	57
References	60

Chapter 3 Electron Beam Radiation Damage to Organic and Biological Cryospecimens

Y. TALMON (With 7 Figures)	64
1 Introduction	64
2 Electron Beam/Specimen Interaction	65
3 Radiation Damage to Organic Materials at Low Temperature	67
4 Radiation Damage to Ice	69

5 Radiation Damage to Frozen-Hydrated and Vitrified-Hydrated Specimens	74
6 Conclusions	81
References	82

Part II General Methodology

Chapter 4 Cryofixation Without Pretreatment at Ambient Pressure

H. SITTE, L. EDELMANN, and K. NEUMANN (With 9 Figures)	87
1 Introduction	87
2 Cryofixation with Liquid Cryogen	88
3 Impact Cryofixation (Slamming)	95
4 Discussion	105
References	110

Chapter 5 Cryoelectron Microscopy of Vitrified Specimens

J. DUBOCHET, M. ADRIAN, J.-J. CHANG, J. LEPAULT, and A. W. MCDOWALL (With 3 Figures)	114
1 Introduction	114
2 Vitrification	116
3 Preparation of Thin Specimens	120
4 Image Formation	124
5 Beam Damage	126
References	128

Chapter 6 Cryoultramicrotomy

K. ZIEROLD (With 19 Figures)	132
1 Introduction	132
2 Technical Aspects of Cryoultramicrotomy	133
3 Physical Aspects of Cryoultramicrotomy	140
4 Conclusions	145
References	146

Chapter 7 Freeze-Substitution and Freeze-Drying

R. A. STEINBRECHT and M. MÜLLER (With 6 Figures) ..	149
1 Introduction	149
2 Methodology: Theoretical and Experimental Data	150
3 Procedures and Instrumentation	155
4 Critical Evaluation	160
References	168

Part III Special Aspects

Chapter 8 Theory and Practice of High Pressure Freezing

H. MOOR (With 6 Figures)	175
1 Introduction	175
2 Freezing Under Atmospheric Pressure	176
3 Freezing Under High Pressure	179
4 The Main Practical Problems of Pressure-Freezing	181
5 The High Pressure Freezing Machine (Balzers HPM 010)	182
6 Some Practical Advice	187
7 Discussion of Results	189
References	190

Chapter 9 Freeze-Etching of Dispersions, Emulsions and Macromolecular Solutions of Biological Interest

L. BACHMANN (With 6 Figures)	192
1 Introduction	192
2 Specific Problems of Specimen Preparation	192
3 Determination of Particle Concentrations and Molecular Weights	196
4 Measurements of Size and Shape	198
5 Structure of Dispersions in Bulk and at Interfaces	201
References	202

Chapter 10 High Resolution Metal Replication of Freeze-Dried Specimens

H. GROSS (With 5 Figures)	205
1 Introduction	205
2 Electron Microscopy and Image Processing	205
3 Characterization of the Test Specimens	206
4 Controlled Freeze-Drying	207
5 High Resolution Shadowing	210
References	215

Chapter 11 Immunogold Labelling of Cryosections and Cryofractures

J. BOONSTRA, P. VAN MAURIK, and A. J. VERKLEIJ (With 6 Figures)	216
1 Introduction	216
2 Cryoultramicrotomy	217
3 Cryofractures	220

4 Label Efficiency	225
5 Conclusions	228
References	229

Chapter 12 Cryoultramicrotomy for Autoradiography and Enzyme Cytochemistry

P.M. FREDERIK (With 1 Figure)	231
1 Introduction	231
2 Cryoultramicrotomy for the Autoradiography of Diffusible Substances	232
3 Thin Cryosections in Histochemistry	235
4 Conclusions	237
References	238

Chapter 13 Scanning Electron Microscopy and X-Ray Microanalysis of Frozen-Hydrated Bulk Samples

A. T. MARSHALL (With 8 Figures)	240
1 Introduction	240
2 Morphology	240
3 Analysis	243
4 Freezing	243
5 Instrumentation	244
6 Electron Interactions	245
7 X-Ray Emission	250
8 The Fracture Surface	250
9 Quantitative Analysis	251
10 Water Content or Dry Weight Fraction	252
11 Beam Damage and Mass Loss	253
12 Detection Limits	254
13 Conclusions	254
References	254

Chapter 14 Cryofixation of Dynamic Processes in Cells and Organelles

G. KNOLL, A. J. VERKLEIJ, and H. PLATTNER (With 3 Figures)	258
1 Introduction	258
2 Cooling Rate, Freezing Time, Time Resolution	259
3 Cellular Structures: Rapid Freezing Versus Chemical Fixation	260
4 Membrane Dynamics	263
5 Conclusions and Outlook	267
References	268

Chapter 15 Cryofixation of Diffusible Elements in Cells and Tissues for Electron Probe Microanalysis

K. ZIEROLD and R. A. STEINBRECHT (With 1 Figure) . . .	272
1 Introduction	272
2 Specimen Preparation	273
3 Some Biological Applications and Results	278
4 Conclusion and Outlook	279
References	279

Part IV Appendix

Chapter 16 Safety Rules for Cryopreparation

H. SITTE, K. NEUMANN, and L. EDELMANN (With 1 Figure)	285
1 Introduction	285
2 Asphyxiation with Gaseous Nitrogen	285
3 Gaseous Propane Explosions	286
4 Burns Caused by Secondary Cryogen Splashing	286
5 Burns Caused by Primary Cryogen Splashing	287
6 Ignition of Combustible Secondary Cryogens	288
7 Bursting of Cryogen Containers	288
8 Transport and Disposal of Cryogens	288
9 Concluding Remarks	288
References	289
