Introduction

Purpose and Plan	1
Material, Techniques, and Preparation of the Illustrations	1
Annotations	4
Terminology and Labelling	4

Part I Gross Anatomy

Orientation	6
External and Medial Views	10
Internal Structures	26

Part II Vessels and Meninges

Arteries of the Brain	34
Veins of the Brain	45
Vessels of the Brain Stem	50
Meninges, Cisterns and Liquor System	54
Vessels and Meninges of the Spinal Cord	60

Part III Brain Slices

Coronal Sections	66
Sections Perpendicular to the Axis of the Brain Stem	79
Sagittal Sections	84
Horizontal Sections	89

Part IV Microscopical Sections

Coronal Sections Through the Basal Part of the Prosencephalon	96
Transverse Sections Through the Brain Stem and Spinal Cord	104

Part V Functional Systems

Cranial Nerve Nuclei in the Brain Stem	144
General Sensory Systems and Taste	149
Introduction	149
Primary Afferents and the Spinal Grey Matter	150
The Anterolateral System	151
The Medial Lemniscus System	154
The Somatosensory Cortex	154

The Trigeminal System	155
Descending Connections to Somatosensory Relay Nuclei	160
The Visceral Afferent Systems	164
Special Sensory Systems	165
The Vestibular System	165
The Vestibular Nerve and Nuclei	165
Afferents to the Vestibular Nuclei	168
Efferents from the Vestibular Nuclei	169
Projections from the Vestibular Nuclei to the Cerebral Cortex	172
The Auditory System	172
Auditory Centres	172
Auditory Pathways	173
The Ascending Auditory Projection	177
The Descending Auditory Projection	178
Auditory Reflex Pathways	179
The Visual System	179
The Visual Pathway	179
The Accessory Optic System	184
Visual Reflexes	185
Eye Movements	185
Ascending Reticular Systems	197
The Reticular Formation	197
The Raphe Nuclei	197
The Medial Reticular Formation	202
The Lateral Reticular Formation	202
Noradrenergic Cell Groups	204
Adrenergic Cell Groups	205
Cholinergic Cell Groups; Locomotor and Relay Centres	205
Ascending Reticular Pathways	206
Ascending Projections from the Raphe Nuclei	206
Ascending Projections from the Medial Reticular Zone	208
Ascending Projections from the Lateral Reticular Zone	211
Cerebellum	221
Introduction	221
Cortex and Central Nuclei	222
Types of Afferent and Intrinsic Connections	222
Terminations of Mossy Fibre Systems	224
Functional Zones: Organization of the Olivocerebellar Climbing Fibre System and the Corticonuclear Projection	228
The Vestibulocerebellum	232
Efferent Pathways	232
Function and Malfunction of the Cerebellum	236
Thalamocortical and Corticothalamic Connections	237
The Thalamus: Its Parts and Peduncles	237
Specific and Non-specific Nuclei of the Thalamus	238
Thalamic and Thalamocortical Circuits	239
Connections of the Ventral Thalamic Nuclei	239

Connections of the Anterior Nucleus and the Lateral Dorsal Nucleus of the Thalamus	240
Connections of the Medial Nucleus of the Thalamus	240
Connections of the Medial Geniculate Body	241
Connections of the Posterior Nuclei of the Thalamus	241
Connections of the Lateral Geniculate Body	241
Connections of the Lateral Thalamic Nuclei	244
Connections of the Intralaminar Nuclei	246
Motor Systems	247
Long Corticofugal Pathways	247
Introduction	247
Medial and Lateral Motor Systems	253
Reticulospinal, Raphespinal and Coeruleospinal Systems	256
Direct and Indirect Cortico-motoneuronal Connections	257
The Pyramidal Tract Syndrome	258
The So-Called Extrapyrarnidal Motor System	258
Introduction	258
Structural Features	259
Fibre Connections	260
Aspects of the Organisation of the Striatum	267
Subdivision of the Basal Ganglia into Dorsal and Ventral Sectors	269
Fibre Connections of the Ventral Striatum	270
The Magnocellular Basomedial Telencephalic Complex	273
Descending Reticular Systems	279
Descending Projections from the Raphe Nuclei	279
Descending Projections from the Medial Reticular Zone	282
Descending Projections from the Lateral Reticular Zone	284
Olfactory and Limbic Systems	293
Introduction	293
The Central Limbic Continuum: Sections and Centres	296
The Central Limbic Continuum: Circuitry and Major Conduction Channels	302
The Central Limbic Continuum: Functional Connections of Individual Centres	309
The Amygdala	323
Introduction	323
Fibre Systems Related to the Amygdala	324
Afferents to the Amygdala	324
Efferents from the Amygdala	328
Comments on the Connections and Functions of the Amygdala	329
Bed Nucleus of the Stria Terminalis	332
The Hippocampus	334
Introduction	334
Fibre Systems Related to the Hippocampus	335
Intrinsic Connections of the Hippocampus	335
Afferents to the Hippocampus	336
Efferents from the Hippocampus	340

The Circuit of Papez	341
The Olfactory System	344
The Limbic System at Large: A Functional Commentary	348
Long Association and Commissural Connections	365
General Features	365
The Somatosensory Cortex	370
The Visual Cortex	371
The Auditory Cortex	372
The Frontal Lobe	373
The Paralimbic Areas	375
References	377
Subject Index	419
