| List of Tables.....                                                                                                                                                                   | III |
| List of Figures .....                                                                                                                                                                 | IV  |
| List of Abbreviations.....                                                                                                                                                            | V   |
| Summary .....                                                                                                                                                                         | 2   |
| Zusammenfassung .....                                                                                                                                                                 | 4   |
| 1 General Introduction .....                                                                                                                                                          | 7   |
| 1.1 Objectives .....                                                                                                                                                                  | 9   |
| 1.2 Structure of the Dissertation.....                                                                                                                                                | 9   |
| 2 Publications .....                                                                                                                                                                  | 11  |
| 2.1 Features and Applications of a Field Imaging Chlorophyll Fluorometer to Measure Stress in Agricultural Plants.....                                                                | 12  |
| 2.1.1 Abstract .....                                                                                                                                                                  | 12  |
| 2.1.2 Introduction .....                                                                                                                                                              | 13  |
| 2.1.3 Methods .....                                                                                                                                                                   | 15  |
| 2.1.4 Applications .....                                                                                                                                                              | 19  |
| 2.1.5 Limitations .....                                                                                                                                                               | 31  |
| 2.1.6 Perspectives .....                                                                                                                                                              | 32  |
| 2.1.7 Conclusion.....                                                                                                                                                                 | 32  |
| 2.2 Detecting Herbicide-resistant <i>Apera spica-venti</i> with a Chlorophyll Fluorescence Agar Test .....                                                                            | 34  |
| 2.2.1 Abstract .....                                                                                                                                                                  | 34  |
| 2.3 In-field Classification of Herbicide-resistant <i>Papaver rhoeas</i> and <i>Stellaria media</i> using an Imaging Sensor of the Maximum Quantum Efficiency of Photosystem II ..... | 35  |
| 2.3.1 Summary .....                                                                                                                                                                   | 35  |
| 3 General Discussion.....                                                                                                                                                             | 37  |
