

Table of Contents

Course Contents	2
General Information	3
▶ Design of a universal milling machine	
▶ Equipping the workplace	
▶ General guidelines regarding occupational safety	
▶ Environmental protection and efficient use of energy	
Maintenance and Startup	7
▶ Guidelines for maintaining and starting up the milling machine	
▶ Lubrication chart	
▶ Check list	
Overview of Skills Exercises.....	11
Supply Parts.....	15
▶ Parts list	
▶ Supply parts list for Exercise 12	
Skills Exercises.....	17
▶ Exercises 1 to 13	
Learning outcome test.....	58

Appendix

- ▶ Work planning sheets (x10)
- ▶ Inspection and evaluation sheets (x13)
- ▶ Evaluation sheet
- ▶ Evaluation overview

	Machine-based material processing	Metal working
	Milling	
	Contents	

Table of Contents

1. General Information	2
2. Milling Methods	3
2.1 Manufacturing processes	3
2.2 Cutting processes	3
2.3 Material removal processes	4
2.4 Milling processes	4
3. Fundamental Principles	5
3.1 The motions on a milling machine	5
3.2 Cutting edge geometry	7
3.3 Tool wear	9
3.4 Determining machining parameters	11
4. Milling	18
4.1 Milling processes according to DIN 8589	18
4.2 Milling machine types	24
4.3 Milling machine design	27
4.4 Milling tools	30
4.5 Clamping and aligning the workpieces	41
4.6 Tool holding fixtures	50
4.7 Milling with the dividing head	55
4.8 General guidelines regarding occupational safety	59
4.9 Environmental protection/energy efficiency	60
4.10 Exercises with solutions	61
5. Recommended Reading	63
