

Course overview

Maintenance interview	1
1.0 Maintenance	2
1.1 Maintenance measures	2
1.2 Maintenance work	3
1.3 Inspection	5
1.4 Maintenance and inspection list	6
1.5 Servicing	9
1.6 General information about occupational safety	11
1.7 Protection of the environment and energy efficiency	12
Interview on systematic fault handling	13
2.0 Systematic fault handling	14
2.1 Overview	14
2.2 Fault handling procedure	16
2.3 Developing a fault picture	17
2.4 Questions for acquiring information	19
2.5 Exercises	22
Interview on machine elements/bearings	40
3.0 Machine elements	41
3.1 Bearings	41
3.1.1 Overview	41
3.1.2 Identifying roller bearings	43
3.1.3 Preparations for installing and removing roller bearings	45
3.1.4 Installing roller bearings	46
3.1.5 Removing roller bearings	51
3.1.6 Recognising and evaluating damage	54
3.1.7 Lubricating roller bearings	57
Interview on machine elements/axles and shafts	58
3.2 Axles and shafts	59
3.2.1 Overview	59
3.2.2 Installing axles and shafts	60
	Maintenance/section: Basic principles
	Course overview
	General information
	Metal working

3.2.3	Removing axles and shafts.	60
3.2.3	Recognising and evaluating damage	61
	Interview on machine elements/couplings	62
3.3	Couplings.	63
3.3.1	Overview.	63
3.3.2	Installing and removing couplings	65
3.3.3	Recognising and evaluating damage	67
	Interview on machine elements/gears	68
3.4	Gears	69
3.4.1	Overview.	69
3.4.2	Installing and removing gears.	71
3.4.3	Identifying gears	71
3.4.4	Recognising and evaluating damage	72
	Interview on machine elements/screws and screw locking means	74
3.5	Screws and screw locking means.	75
3.5.1	Overview.	75
3.5.2	Strength classes	77
3.5.3	Screw locking means	79
3.5.4	Screw tools.	80
3.5.5	Work rules for screw connections	81
	Interview on machine elements/belts and chains	84
3.6	Belts and chains	85
3.6.1	Overview.	85
3.6.2	Belts	87
3.6.3	Installing and removing belts	89
3.6.4	Recognising and evaluating damage	91
3.6.5	Identifying belts	92
3.6.6	Chains.	93
3.6.7	Installing and removing chains	93
3.6.8	Recognising and evaluating damage	95
3.6.9	Identifying chains	97
	Maintenance/section: Basic principles	Metal working
	Course overview	
	General information	

3.6.10 Lubricating chains	97
---------------------------------	----

Interview on machine elements/seals	99
--	-----------

3.7 Seals.....	100
-----------------------	------------

3.7.1 Overview	100
----------------------	-----

3.7.2 Static seals	101
--------------------------	-----

3.7.3 Dynamic seals.....	106
--------------------------	-----

Interview on lubricants.....	116
-------------------------------------	------------

4.0 Lubricants	117
-----------------------------	------------

4.1 Overview	117
--------------------	-----

4.2 Lubricant parameters	118
--------------------------------	-----

4.3 Identifying lubricants.....	120
---------------------------------	-----

4.4 Lubricating devices.....	121
------------------------------	-----

Appendix	
-----------------------	--

	Maintenance/section: Basic principles	Metal working
	Course overview	
	General information
