Foreword by Joshua Lederberg	vii
Preface	xi
Acknowledgments	xiii
Color Plates (following page 98)	
1 Introduction	1
2 Assays: Tools of the New Biology	4
3 Viruses and Oncogenes	38
4 Human T Cell Lymphotropic/Leukemia Viruses	67
5 Cellular Proto-oncogenes	78
6 Oncogenes and Human Cancers	98
7 <i>src</i> and Related Protein Kinases	133
8 Growth Factors and Receptors	156
9 <i>ras</i> Family of Oncogenes	182
10 <i>myc</i> and Other Nuclear Oncogenes	198
11 Additional Oncogenes	222
12 Transgenic Mice: Direct In Vivo Assay for Oncogenes	234
13 Potential Diagnostic Uses of Oncogenes	241
14 Potential Therapeutic Applications of Oncogenes	262
15 Oncogene Paradigm: Contribution to a Fundamental Understanding of Malignancy	279
Appendix: Oncogenes and Related Genes	281
Index	293
