

Table of Contents

Preface	v
Acknowledgement	vi
Should You Read This Book?	vii
List of Figures	xi
Introduction	1
Origins of the TCP/IP Protocol Suite	2
The TCP Community	3
The OSI Reference Model	7
Overview of the TCP/IP Protocol Suite	8
A Sample Internetwork	12
Level Two — The Data Link Layer	15
Services and Standards at the Data Link Layer	16
Ethernet	18
Level Three — the Network Layer	21
Internet Protocol (IP)	22
IP Overview	23
IP Header	26
Fragmentation and Reassembly	32
Setting Parameters	34
Error Reporting Service	37
Matching IP Addresses to Network Configurations	37
Services IP Requires from Lower Layers	40
Internetwork Control Message Protocol (ICMP)	40
Address Resolution Protocol (ARP)	41
Internet Address Resolution	42
Proxy ARP	42
Reverse Address Resolution Protocol (RARP)	42
IP on IEEE 802 Networks	43

Level Four — The Transport Layer	45
Services identified for the Transport Layer	45
Transmission Control Protocol (TCP)	47
TCP Overview	47
TCP Header Format	51
Connection Management	56
Acknowledgement	58
Flow Control	59
Multiplexing	59
Synchronization	60
Rendezvous	61
The Push Flag	61
User Datagram Protocol (UDP)	61
Port Numbers	62
 Levels Five through Seven — Session through Application Layers	 63
Services Identified with the Session, Presenta- tion and Application Levels	64
File Transfer Protocol (FTP)	66
FTP Control Connections	66
FTP Data Connections	66
Telnet	67
Network Virtual Terminal (NVT)	67
Principle of Negotiated Options	68
NetBios	69
Domain Name Service (DNS)	71
Simple Mail Transport Protocol (SMTP)	71
 Appendix One — Glossary of Terms	 73
 Appendix Two — Assigned Number	 89
Ethernet Type Numbers of Interest	89
Assigned Protocol Numbers Within the IP Header	90
Assigned Port Numbers in TCP and UDP Headers	91
Assigned Telnet Options	92
 Appendix Three — References	 93
 Index	 95
