

Preface	ix
Nomenclature	xi
<b>1 INTRODUCTION</b>	<b>1</b>
1.1. Background	1
1.2. Early Studies and Development (Circular Fins)	2
1.3. Studies of a Spirally Finned System	9
1.4. Studies of Heat Transfer Mechanisms and Row-To-Row Variations	12
1.5. Hydraulic Drag and Pressure Drop	14
1.6. Concluding Remarks	17
<b>2 CONDUCTION OF HEAT IN A FINNED TUBE</b>	<b>19</b>
2.1. Fin Design	19
2.2. Temperature Gradient in a Circumferential Fin	22
2.3. Heat Dissipation from a Circumferential Fin	27
2.4. Heat Conduction of Spiral Fins	31
2.5. Fin Effectiveness	34
2.6. Thermal Conductivity of the Tube Supporting the Fins	38
<b>3 FLOW OVER AND HEAT TRANSFER OF FINNED TUBE BUNDLES</b>	<b>50</b>
3.1. Factors Controlling the Transfer of Heat from a Finned Tube Bundle	50
3.2. Coefficient of Heat Transfer from a Finned Tube	53
3.3. Selection of the Principal Parameters	59

3.4.	Effect of Finned Tube and Coolant Thermal Conductivities on Heat Transfer from Finned Tube Bundles	69
3.5.	Other Forms of Test Data Reduction	71
4	EXPERIMENTAL TECHNIQUES	75
4.1.	The Experimental Arrangement	76
4.2.	Determination of Heat Transfer from a Bundle	80
4.3.	Determination of Flow Variables	85
4.4.	Remarks on the Experimental Work	87
5	PRESSURE DROP IN FINNED TUBE BUNDLES	90
5.1.	Preliminary Remarks	90
5.2.	Experimental Data on Pressure Drop in Tube Bundles	92
5.3.	Analysis of Experimental Data	92
6	EXPERIMENTAL DETERMINATION OF THE DISTRIBUTION OF THE HEAT TRANSFER COEFFICIENT OVER A FIN	105
6.1.	Statement of the Problem	105
6.2.	Methodological Remarks	114
6.3.	Experimental Results	115
7	MEAN HEAT TRANSFER COEFFICIENT FROM A FINNED TUBE IN A BUNDLE	118
7.1.	Results of Experimental Study of Bundles of Tubes with Various Fin Geometries	118
7.2.	Results of an Experimental Study of Bundles with Varying Geometries with Constant Fin Geometry	126
7.3.	Correlation of Experimental Data	133
8	LOCAL HEAT TRANSFER FROM A FINNED TUBE IN A BUNDLE	138
8.1.	Preliminary Remarks	138
8.2.	Experimental Results	143
8.3.	Comparison of Model Heating Methods	149
9	EFFECTIVENESS OF THE BUNDLES UNDER STUDY	153
9.1.	Preliminary Remarks	153
9.2.	Comparison of Bundle Effectiveness on the Basis of the Surface Extension Factor	155
9.3.	Comparison of the Thermal Effectiveness of Bundles	157

9.4.	Overall Dimensions and Weight of Bundles	160
9.5.	Effect of Finning Geometry on the Thermal Performance, Overall Size, and Weight of Bundles	163

## 10 COMPARISON OF DATA AND PRACTICAL RECOMMENDATIONS 171

10.1.	Comparison of Data on Heat Transfer from Finned Tube Bundles	171
10.2.	Comparison of Data for the Euler Number for Finned Tubes	174
10.3.	Design Recommendations	176
10.4.	Concluding Remarks	182

## APPENDICES 185

1.	Physical Properties of Air	185
2.	Experimental Data on the Hydraulic Drag of Staggered Bundles of Tubes With Spiral Fins in Crossflow Air	186
3.	Experimental Data on the Mean Heat Transfer from Staggered Bundles of Tubes with Spiral Fins in Crossflow Air	196
4.	Experimental Data on Local Heat Transfer from a Finned Tube with $d = 32$ mm, $s$ from 4 to 7 mm, $h = 13.5$ mm in Crossflow Air	208
5.	Experimental Data for Determination of the Coefficient of Nonuniformity of Heat Transfer over a Finned Tube with $d = 32$ mm; $s = 6$ mm and $h = 9$ mm in a Staggered Bundle	213
