

Contents

I. Introduction	
H. J. DEEG	1
II. Pre-transplant Considerations	
1. How Should Marrow Transplantation be Approached? H. J. DEEG	7
2. When Should Marrow Transplantation be Considered? H.-G. KLINGEMANN	18
3. Preparation for Marrow Transplantation G. L. PHILLIPS	26
4. Who Pays? H. J. DEEG	43
III. Transplant Procedure	
1. Donor Selection H. J. DEEG	47
2. Conditioning Regimens G. L. PHILLIPS	53
3. Collection, Processing and Infusion of Marrow H.-G. KLINGEMANN	71
IV. Acute Transplant Related Problems	
1. Side Effects of Conditioning G. L. PHILLIPS	81
2. Acute Graft-versus-Host Disease H. J. DEEG	86

3. Marrow Graft Failure	
H. J. DEEG	99
4. The Management of Infections	
G. L. PHILLIPS	107
5. Interstitial Pneumonitis	
H. J. DEEG	114
6. Hepatic Dysfunction	
H.-G. KLINGEMANN	123
7. Urinary Tract	
H.-G. KLINGEMANN	135
8. Central Nervous System	
H.-G. KLINGEMANN	140

V. Delayed Transplant Related Problems

1. Follow-up after Discharge from the Transplant Center	
H. J. DEEG	151
2. Chronic Graft-Versus-Host Disease	
H.-G. KLINGEMANN	156
3. Pulmonary Problems	
H.-G. KLINGEMANN	170
4. Endocrine Function, Growth, and Development	
H. J. DEEG	174
5. Ocular Problems	
H. J. DEEG	178
6. Secondary Malignancies	
H. J. DEEG	180
7. Long-Term Adjustments	
H. J. DEEG	183

VI. Future Developments

H. J. DEEG	185
