<i>Aspects of Respiratory Muscles Physiology</i>	
Some old concepts in respiratory muscle mechanics	17
J.D. Derenne	
Inspiratory muscle physiology, with particular regard to the diaphragm	23
P.T. MacKlem	
Respiratory muscle physiology with particular regard to rib cage muscles	35
M. Estenne	
Patterns of inspiratory muscle activation with changing levels of ventilatory demand	41
E. D'Angelo	
Chest wall and diaphragmatic afferents: their role during external mechanical loading and respiratory muscle ischemia	49
Y. Jammes	
The oxygen cost of respiratory and non-respiratory muscles	59
S. Sanci, S. Romano, S. Field, V. Bellia, G. Bonsignore, A. Grassino	
EMG evaluation of respiratory muscles	69
A. Arrigo, R. Casale, M. Buonocore	
<i>Aspects of Respiratory Muscles Pathophysiology</i>	
Pathways leading to skeletal muscle fatigue	77
A. Grassino, M.D.	
Efficiency of breathing during hyperinflation	89
W.P. Collett, L.A. Engel	
Effect of lung volume on in vivo contraction characteristics of the human diaphragm	95
J. Smith, F. Bellemare	
Nutritional and metabolic aspects of COPD	111
E. Fiaccadori, S. Del Canale, A. Guariglia	
Inspiratory muscles and dyspnea	125
J.W. Fitting	
Respiratory muscle weakness	133
M. Green, A.K. Mier, J. Moxham	
Intrinsic PEEP and its ramifications in patients with respiratory failure	141
J. Milic-Emili, S.B. Gottfried, A. Rossi	

Early Changes in respiratory mechanics in acute respiratory failure	149
A. Rossi, R. Poggi, E. Manzin, C. Broseghini, R. Brandolese	
The respiratory muscles in acute respiratory failure	161
R. Pariente	
<i>Therapeutical Approaches</i>	
Respiratory muscle training in COPD	165
R.L. Parady	
Treatment of patients with respiratory failure during wakefulness and sleep: use of tank ventilator	173
M. Schiavina	
Rest in the treatment of respiratory muscle fatigue	183
P.T. MacKlem	
Key words	191
