Contents

1 Introduction 1

1.1 Momentum Transfer 3
1.2 Heat and Mass Transfer 7
1.3 Relations between Heat and Momentum Transfer 9
1.4 Coupled and Uncoupled Flows 13
1.5 Units and Dimensions 14
1.6 Outline of the Book 15
Problems 17
References 18

2 Conservation Equations for Mass, Momentum, and Energy 19

2.1 Continuity Equation 20
2.2 Momentum Equations 21
2.3 Internal Energy and Enthalpy Equations 25
2.4 Conservation Equations for Turbulent Flow 31
2.5 Equations of Motion: Summary 37
Problems 38
References 40

3 Boundary-Layer Equations 41

3.1 Uncoupled Flows 42
3.2 Estimates of Density Fluctuations in Coupled Turbulent Flows 48
3.3 Equations for Coupled Turbulent Flows 53
3.4 Integral Equations 58
3.5 Boundary Conditions 62

3.6 Thin-Shear-Layer Equations: Summary 66
Problems 67
References 70

4 Uncoupled Laminar Boundary Layers 71

4.1 Similarity Analysis 72
4.2 Two-Dimensional Similar Flows 78
4.3 Two-Dimensional Nonsimilar Flows 88
4.4 Axisymmetric Flows 99
4.5 Wall Jets and Film Cooling 105
Problems 113
References 123

5 Uncoupled Laminar Duct Flows 124

5.1 Fully Developed Duct Flow 125
5.2 Thermal Entry Length for a Fully Developed Velocity Field 132
5.3 Hydrodynamic and Thermal Entry Lengths 136
Problems 142
References 148

6 Uncoupled Turbulent Boundary Layers 150

6.1 Composite Nature of a Turbulent Boundary Layer 153
6.2 The Inner Layer 156
6.3 The Outer Layer 168
6.4 The Whole Layer 170
6.5 Two-Dimensional Boundary Layers with Zero Pressure Gradient 172
6.6 Two-Dimensional Flows with Pressure Gradient 184
6.7 Wall Jets and Film Cooling 201
Problems 208
References 213

7 Uncoupled Turbulent Duct Flows 216

7.1 Fully Developed Duct Flow 216
7.2 Thermal Entry Length for a Fully Developed Velocity Field 227
7.3 Hydrodynamic and Thermal Entry Lengths 230
Problems 233
References 236

8 Free Shear Flows 238

8.1 Two-Dimensional Laminar Jet 239
8.2 Laminar Mixing Layer between Two Uniform Streams at Different Temperatures 246
8.3 Two-Dimensional Turbulent Jet 249
8.4 Turbulent Mixing Layer between Two Uniform Streams at Different Temperatures 252

8.5 Coupled Flows 254
Problems 259
References 261

9 Buoyant Flows 263

9.1 Natural-Convection Boundary Layers 267
9.2 Combined Natural- and Forced-Convection Boundary Layers 280
9.3 Wall Jets and Film Heating or Cooling 284
9.4 Natural and Forced Convection in Duct Flows 288
9.5 Natural Convection in Free Shear Flows 294
Problems 297
References 299

10 Coupled Laminar Boundary Layers 301

10.1 Similar Flows 306
10.2 Nonsimilar Flows 312
10.3 Shock-Wave/Shear-Layer Interaction 315
10.4 A Prescription for Computing Interactive Flows with Shocks 325
Problems 328
References 330

11 Coupled Turbulent Boundary Layers 333

11.1 Inner-Layer Similarity Analysis for Velocity and Temperature Profiles 335
11.2 Transformations for Coupled Turbulent Flows 340
11.3 Two-Dimensional Boundary Layers with Zero Pressure Gradient 343
11.4 Two-Dimensional Flows with Pressure Gradient 355
11.5 Shock-Wave/Boundary-Layer Interaction 365
References 369

12 Coupled Duct Flows 372

12.1 Laminar Flow in a Tube with Uniform Heat Flux 376
12.2 Laminar, Transitional and Turbulent Flow in a Cooled Tube 381
References 384

13 Finite-Difference Solution of Boundary-Layer Equations 385

13.1 Review of Numerical Methods for Boundary-Layer Equations 386
13.2 Solution of the Energy Equation for Internal Flows with Fully Developed Velocity Profile 395
13.3 Fortran Program for Internal Laminar and Turbulent Flows with Fully Developed Velocity Profile 398
13.4 Solution of Mass, Momentum, and Energy Equations for Boundary-Layer Flows 406
13.5 Fortran Program for Coupled Boundary-Layer Flows 415
References 427

14 Applications of a Computer Program to Heat-Transfer Problems 429

14.1 Forced and Free Convection between Two Vertical Parallel Plates 430
14.2 Wall Jet and Film Heating 439
14.3 Turbulent Free Jet 444
14.4 Mixing Layer between Two Uniform Streams at Different Temperatures 453
References 455

Appendix A Conversion Factors 456

Appendix B Physical Properties of Gases, Liquids, Liquid Metals, and Metals 459

Appendix C Gamma, Beta and Incomplete Beta Functions 472

Appendix D Fortran Program for Head's Method 474
