

Table of Contents

Dedication	x
Preface	xi
Acknowledgements	xiv
Definition of Symbols Used	xv
 <i>Chapter 1 MATHEMATICAL BACKGROUND</i>	 1
1.1. Fourier Series	1
1.2. Complex Variable	4
1.2.1. Singularity	5
1.2.2. Complex Integration	6
1.3. Hyperbolic Function	7
1.3.1. Catenary Equation	8
1.4. Bessel Functions	10
1.5. Partial Differential Equation	11
1.6. References	15
 <i>Chapter 2 INTRODUCTION TO OFFSHORE STRUCTURES</i>	 16
2.1. Types and Functions of Offshore Structures	17
2.1.1. Exploratory Structures	18
2.1.2. Production Structures	19
2.1.3. Oil Storage Structure	19
2.1.4. Oil Loading Structure	19
2.1.5. Installation Operations	20
2.2. Fixed Jacket Platforms	21
2.2.1. Gulf of Mexico Platforms	21
2.2.2. Southern California–West Coast Platforms	23
2.2.3. North Sea Platforms	25
2.3. Single Point Mooring Systems	29
2.4. Tension Leg Platform	30
2.5. Arctic Structures	33
2.6. Future Offshore Structure Concepts	34
2.7. References	37
 <i>Chapter 3 WAVE THEORIES</i>	 41
3.1. Stream Function	43
3.2. Potential Function	43

3.3.	Bernoulli Equation	44
3.4.	Boundary Conditions	45
3.5.	Common Wave Theories	46
3.5.1.	Linear Airy Wave Theory	48
3.5.2.	Stokes Finite Amplitude Wave Theory	55
3.5.3.	Cnoidal Wave Theory	61
3.5.4.	Stream Function Wave Theory	69
3.5.5.	Standing Wave Theory	75
3.5.6.	Application of Theories	77
3.6.	References	84

<i>Chapter 4</i>	<i>DESIGN WAVE ENVIRONMENT</i>	<i>86</i>
4.1.	Wave Energy Spectral Density	87
4.1.1.	Autocorrelation Method	90
4.1.2.	Fast Fourier Transform Method	91
4.2.	Smoothing of Energy Spectra	93
4.3.	Filtering of Energy Spectra	94
4.4.	Limitation of Energy Spectral Approach	97
4.5.	Variation in Spectral Representation	97
4.6.	Mathematical Spectrum Models	102
4.6.1.	Phillips	102
4.6.2.	General Form	102
4.6.3.	Neumann Spectrum	103
4.6.4.	Pierson–Moskowitz Spectrum	105
4.6.5.	Bretschneider Spectrum	107
4.6.6.	ISSC Spectrum	109
4.6.7.	ITTC Spectrum	109
4.6.8.	Unified Form	110
4.6.9.	JONSWAP Spectrum	113
4.6.10.	Scott Spectrum	116
4.6.11.	Liu Spectrum	116
4.6.12.	Mitsuyasu Spectrum	117
4.6.13.	Ochi–Hubble Spectrum	118
4.6.14.	Variation in Spectrum Models	120
4.7.	Simulation of Wave Profile from Spectra	122
4.8.	References	125

<i>Chapter 5</i>	<i>WAVE STATISTICS</i>	<i>128</i>
5.1.	Short Term Statistics	128
5.1.1.	Significant Wave Heights	130
5.1.2.	Root Mean-Square Wave Heights	132
5.1.3.	Maximum Wave Heights	133
5.1.4.	Average Wave Periods	133
5.1.5.	Spectral Width Parameters	134

5.1.6.	Probability Distribution and Probability Density	135
5.1.6.1.	Probability Density of η	140
5.1.6.2.	Probability Distribution of H	141
5.1.6.3.	Wide Band Extreme Value Prediction	145
5.1.6.4.	Probability Distribution of T	150
5.1.6.5.	Joint Distribution of H and T	152
5.2.	Long Term Distribution of Wind and Wave	154
5.2.1.	Return Periods of Local Storms	155
5.2.2.	Wave Height Long-Term Distribution	156
5.2.3.	Gumbel's Standard Skewed Distribution	158
5.2.4.	Weibull Distribution	158
5.2.5.	Frechet Distribution	162
5.2.6.	Log-Normal Distribution	163
5.2.7.	Discussion of Long Term Probability Distribution	165
5.3.	References	165

Chapter 6 WAVE FORCE ON SMALL STRUCTURES 168

6.1.	Wave Force Formulations	168
6.2.	Morison Equation	169
6.2.1.	Development of Morison Equation	170
6.2.2.	Inclined Cylinder	174
6.2.3.	Oscillating Cylinder	178
6.2.4.	Oscillating Cylinder in Current	179
6.2.5.	Fixed Cylinder in Waves and Current	183
6.2.6.	Oscillating Cylinder in Waves	187
6.2.7.	Oscillating Cylinder in Waves and Current	188
6.2.8.	Method of Coefficient Computation	189
6.3.	Transverse Force	194
6.4.	Hydrodynamic Coefficients	197
6.4.1.	Smooth Cylinders	197
6.4.2.	Rough Cylinder	203
6.4.3.	Inclined Cylinders	205
6.4.4.	Wall Proximity Effects	206
6.4.5.	Interference Effects	209
6.5.	Discussion on Appropriate Design Values of Coefficients	212
6.5.1.	Certifying Agency Guidelines	213
6.5.1.1.	American Petroleum Institute	213
6.5.1.2.	British Standard Institution	214
6.5.1.3.	Det Norske Veritas	215
6.5.1.4.	Norwegian Petroleum Directorate	215
6.5.2.	Ocean Tests in Waves	216
6.5.3.	Use of Laboratory Coefficients in Design	221
6.6.	Free Surface Effects	223
6.7.	References	227

<i>Chapter 7</i>	<i>WAVE FORCE ON LARGE STRUCTURES</i>	232
7.1.	Froude-Krylov Force	232
7.1.1.	General Theory	233
7.1.1.1.	Horizontal Cylinder	234
7.1.1.2.	Horizontal Halfcylinder	236
7.1.1.3.	Sphere	238
7.1.1.4.	Hemisphere	240
7.1.1.5.	Vertical Cylinder	241
7.1.1.6.	Rectangular Block	242
7.1.1.7.	Circular Disc	242
7.1.1.8.	Force Coefficients	243
7.2.	Diffraction Theory	244
7.2.1.	Closed Form Solution	250
7.2.1.1.	Large Fixed Vertical Cylinder	250
7.2.1.1.1.	First-Order Theory	250
7.2.1.1.2.	Second-Order Theory	260
7.2.1.1.2.1.	Free Surface Component	262
7.2.1.1.2.2.	Velocity-Squared Component	263
7.2.1.1.2.3.	Second Order Incident Vel- ocity Potential	265
7.2.1.2.	Bottom Seated Horizontal Halfcylinder	266
7.2.1.3.	Bottom Seated Hemisphere	270
7.2.1.3.1.	Application of Stokes Fifth Order Theory	274
7.2.1.4.	Multiple Vertical Cylinders	279
7.2.2.	Two Dimensional Source-Sink Method	286
7.2.2.1.	Half Submerged Cylinder	295
7.2.2.2.	Fully Submerged Cylinder	297
7.2.2.3.	Half Cylinder on Bottom	301
7.2.3.	Three Dimensional Source-Sink Method	301
7.2.4.	Open-Bottom Structures	312
7.3.	Application of Wave Force Regime	322
7.4.	References	324
<i>Chapter 8</i>	<i>FLOATING STRUCTURE DYNAMICS</i>	329
8.1.	Added Mass and Damping Coefficients	330
8.2.	Single Degree of Freedom System	332
8.3.	Articulated Tower Analysis	338
8.4.	Floating Storage Vessel Analysis	346
8.5.	Tower-Tanker System Analysis	351
8.6.	Six Degrees of Freedom System	356
8.7.	Wave Drift Oscillation	362
8.8.	Multi-Body Structure	367
8.9.	Two Floating Structures	368

8.10. Tension Leg Platform	371
8.10.1. Set-Down Effect	374
8.11. Guyed Tower	379
8.12. Slender Body Dynamics	383
8.13. References	386
 <i>Chapter 9 STRUCTURE RESPONSE STATISTICS</i>	 391
9.1. Short-Term Response Statistics	391
9.1.1. Response Amplitude Operators	392
9.1.2. Linear Response Spectra	392
9.1.2.1. Dynamic Pressure RAO	393
9.1.2.2. Inertial Force RAO	395
9.1.3. Nonlinear Drag Force	397
9.1.3.1. Linearization of Drag Force	397
9.1.3.2. Nonlinear Drag Force Spectrum	399
9.1.3.3. Total Morison Force Spectrum	403
9.1.3.4. Extreme Morison Force Statistics	405
9.1.3.5. Linearization of Coupled Current and Wave Drag	407
9.1.3.6. Nonlinear Coupled Current and Wave Drag Force Spectrum	409
9.1.3.7. Extreme Wave Current Force Statistics	411
9.1.4. Inertia Force Spectrum Coupled with Current	415
9.1.5. Motion Response and Spectrum	416
9.1.6. Response to Short Crested Waves	420
9.2. Long Term Distribution	421
9.3. Short Term Vs. Long Term Prediction	427
9.3.1. Short Term Prediction	427
9.3.2. Long-Term Prediction	429
9.4. Fatigue Analysis	431
9.5. References	434
 Author Index	 436
Subject Index	439
