Editorial Introduction IX

Bibliography of Mark Grigor'evich Krein 1

D. Alpay, I. Gohberg:

On Orthogonal Matrix Polynomials 25

1. Introduction 25

2. Rational Matrix-valued Functions Unitary on the Unit Circle 27

3. The Theorem of M. G. Krein 37

4. First Properties of Orthogonal Polynomials 38

5. A Generalization of the Theorem of M. G. Krein 41

References 45

A. Atzmon:

n -Orthonormal Operator Polynomials 47

1. Introduction 47

2. Notations, Definitions and Preliminaries 48

3. Characterization of O_n for Finite Dimensional Spaces 53

Appendix: The Scalar Case 59

References 63

A. Ben-Artzi, I. Gohberg:

Extension of a Theorem of M. G. Krein on Orthogonal Polynomials for the Nonstationary Case 65

1. Introduction 65

2. Preliminaries 68

3. Band Matrices and Nonstationary Stein Equations 70

4. Proof of the Main Result 75

References 78

H. Dym:

Hermitian Block Toeplitz Matrices, Orthogonal Polynomials, Reproducing Kernel Pontryagin Spaces, Interpolation and Extension 79

1. Introduction 80

2. Reproducing Kernel Pontryagin Spaces 83

3. Linear Fractional Transformations 86

4. Some Useful Identities 88

5. Polynomials of the Second Kind 93

6. Some Matrix Identities 98

7. Interpolation 100

8. Interpolation in the Pseudo Carathéodory Class 105

9. Interpolation in the Wiener Algebra 108

10. The Covariance Extension Problem 112

11. Interior Roots 117

12. Isometries and Negative Squares 121

13. The Levinson Recursions 123

14. Factorization, Schur and Christoffel Darboux 130

15. References 134

I. Gohberg, L. Lerer:

Matrix Generalizations of M. G. Krein Theorems on Orthogonal Polynomials	137
0. Introduction	137
1. Preliminaries	143
2. The First M. G. Krein Theorem for Block Toeplitz Matrices	150
3. The Basic Inverse Problem for Invertible Block Toeplitz Matrices	155
4. Equations in Matrix Polynomials and Linear Matrix Equations	163
5. Coprime Symmetric Factorizations	173
6. Matrix Generalization of the Second M. G. Krein Theorem	183
7. Inverse Problems for General Block Toeplitz Matrices and Stein Equations	188
8. Inverse Problems for Invertible Hermitian Block Toeplitz Matrices	193
References	200

H. J. Landau:

Polynomials Orthogonal in an Indefinite Metric	203
Introduction	203
A Space of Polynomials	205
Evaluations	206
Theorems 1 and 2	209
