Contributors to the Monograph	xiii
Abbreviations	xv
Section I: The Monograph	1
1. Introduction	3
1.1 Objective and Scope	3
1.2 Criteria for Literature Selection	3
1.3 Criteria for Assessing the Validity of Data	3
1.4 The Outline	6
1.5 References	8
2. Chemical and Physical Data	9
2.1 General Observations and Terminology	9
2.2 Chemical Names and Synonyms	10
2.2.1 Sucrose	10
2.2.2 D-Glucose	10
2.2.3 D-Fructose	10
2.3 Structural and Molecular Formulae and Molecular Weight	10
2.3.1 Sucrose	11
2.3.2 Glucose	11
2.3.3 Fructose	11
2.4 Chemical and Physical Properties of the Pure Substance	11
2.4.1 Sucrose	11
2.4.1.1 Description	11
2.4.1.2 Solubility	12
2.4.1.3 Stability	12
2.4.1.4 Identity and Specification Test	12
2.4.2 Glucose	12
2.4.2.1 Description	12
2.4.2.2 Solubility	13

2.4.2.3	Stability	13
2.4.2.4	Identity and Specification Test	13
2.4.3	Fructose	13
2.4.3.1	Description	13
2.4.3.2	Solubility	13
2.4.3.3	Stability	13
2.4.3.4	Identity and Specification Test	14
2.5	Codex Alimentarius Specifications	14
2.6	Identity and Purity Aspects	15
2.6.1	Degradation Products	15
2.6.2	Additives	15
2.6.3	Extraneous Materials	16
2.6.4	Pesticide Residues	16
2.7	References	16
3.	Production, Uses and Occurrence of Sucrose	19
3.1	Production and Uses	19
3.1.1	Production	20
3.1.2	Uses	22
3.2	Occurrence	24
3.2.1	Natural Occurrence	24
3.2.2	Extracted Sucrose	24
3.2.2.1	Technical Preparation of Sucrose from Sugar Cane	24
3.2.2.2	Technical Preparation of Sucrose from Sugar Beets	25
3.2.3	Sucrose Content in Foods	26
3.2.4	Browning Reaction of Sucrose	27
3.3	Consumption Data	27
3.4	References	30
4.	Metabolism and Kinetics	35
4.1	Sucrose	35
4.1.1	Digestion	35
4.1.2	Absorption and Transport	36
4.1.3	Sucrose as Energy Source	37
4.2	Glucose	38
4.2.1	Metabolism	38
4.2.1.1	Breakdown to Pyruvic Acid/Lactic Acid	38
4.2.1.2	Pentose Phosphate Cycle (Phosphogluconate Pathway)	40
4.2.1.3	Glycogen Formation	42
4.3	Fructose	42
4.3.1	Absorption	42
4.3.2	Transport	43
4.3.3	Metabolic Pathway of Fructose in the Liver	45
4.3.3.1	Phosphorylation of Fructose	45
4.3.3.2	Splitting of Fructose-1-Phosphate	45
4.3.3.3	Metabolism of D-Glyceraldehyde	46
4.3.3.4	Fate of Glyceraldehyde-3-Phosphate	46

4.3.4 Metabolism of Fructose in Other Tissues	47
4.3.5 End-Products of Fructose Metabolism	47
4.3.6 Accumulation of Fructose Metabolites	48
4.4 References	48
5. Biochemical Aspects	53
5.1 Sucrose	53
5.1.1 Effects of Plasma Constituents	53
5.1.1.1 Plasma Glucose	53
5.1.1.2 Plasma Lipids	54
5.1.1.3 Plasma Insulin	55
5.1.1.4 Plasma Lactate, Pyruvate, and Urate Levels	55
5.1.2 Effects on Lipogenesis	55
5.1.2.1 Hepatic Lipogenesis	55
5.1.2.2 Non-hepatic Lipogenesis	56
5.1.3 Effects on Cell Components	57
5.1.4 Effects on Mineral Metabolism	57
5.1.5 Effects of Sex Difference	57
5.1.6 Effects of Exercise	57
5.2 Fructose	58
5.2.1 Effects on Plasma Constituents	58
5.2.2 Effects on Lipogenesis	58
5.2.3 Effects on Adenine Nucleotides and Muscle Glycogen	59
5.2.4 Fructose and Lactic Acidosis	59
5.2.5 Effects on the Kidney	60
5.3 References	60
6. Health Aspects	65
6.1 Sucrose, Glucose, Fructose	65
6.1.1 Diabetes	65
6.1.2 Obesity	67
6.1.3 Oral and Dental Effects	68
6.1.4 Atherosclerosis and Coronary Heart Disease	71
6.1.5 Renal Effects	71
6.1.6 Blood Pressure	72
6.1.7 Wound Healing	72
6.1.8 Gastrointestinal Function	72
6.1.9 Behaviour and Nervous System Changes	73
6.1.10 Sucrose Intolerance	74
6.2 General Reviews on Health Aspects of Sucrose	74
6.3 References	75
7. Safety Aspects	83
7.1 General Observations	83
7.2 Acute Exposure	84
7.2.1 Oral	84
7.2.2 Parenteral	85
7.2.3 Factors Affecting Toxicity	85

7.2.4 Comparative Toxicity	85
7.2.4.1 Sugar and Drugs	85
7.2.4.2 Glucose, Fructose, and Sucrose	86
7.3 Prolonged Administration	86
7.3.1 General Observations	86
7.3.2 Sucrose as a Component of Animal Diets	86
7.3.3 Sucrose as a Comparative Control	87
7.3.4 Prolonged Administration/Carcinogenicity	88
7.3.4.1 Oral Administration	88
7.3.4.2 Parenteral Administration	89
7.3.4.3 Tumour Promotion	89
7.3.4.4 Human Studies	90
7.3.5 Reproductive Toxicity and Teratogenicity	91
7.3.5.1 Reproduction	91
7.3.5.2 Teratogenicity	92
7.4 Special Studies	93
7.4.1 Mutagenicity	93
7.4.2 Nephrocalcinosis	94
7.4.3 Life Span of Animals	94
7.4.4 Enzymatic Activity	95
7.5 References	95
8. Evaluations	101
8.1 Dental Caries	102
8.2 Obesity	103
8.3 Cardiovascular Disease	103
8.4 Diabetes	103
8.5 Glucose Tolerance	104
8.6 Cancer	104
8.7 Gallstones	105
8.8 Urinary Tract Stones	105
8.9 Influence on Behaviour	105
8.10 Various Other Health Issues	105
8.11 Overall Assessment	106
8.12 References	106
9. Conclusions and Recommendations	107
9.1 References	108
Section II: Bibliography	109
Selected References	111
Selected Books	191
