Linking phenomena and 3-dimensional topology

H.M. Hilden, M.T. Lozano, J.M. Montesinos,	On the universal group of the Borromean rings	1
G.T. Jin,	On Kojima's η -function of links	14
P.A. Kirk,	Link maps in the four sphere	31
U. Koschorke,	Multiple point invariants of link maps	44
J.P. Levine,	The $\bar{\mu}$ -invariants of based links	87
W.B.R. Lickorish and K.C. Millett,	An evaluation of the F-polynomial of a link	104
W.D. Neumann and L. Rudolph,	The enhanced Milnor number in higher dimensions	109
C. Weber,	A topological interpretation for the polar quotients of an algebraic plane curve singularity	122

Immersions and vector bundle morphisms

J.S. Carter,	Surgering the equatorial immersion in low dimensions	144
D.H. Gottlieb,	On the index of pullback vector fields	167
U. Kaiser and B. Li,	Enumeration of immersions of m -manifolds in $(2m-2)$ -manifolds by the singularity method	171
U. Koschorke,	The singularity method and immersions of m -manifolds into manifolds of dimensions $2m-2$, $2m-3$ and $2m-4$	188
D. Randall,	On indices of tangent fields with finite singularities	213

Manifolds and algebraic topology

J.-H. Hausmann and P. Vogel,	Manifold categories of Poincaré duality spaces	241
F. Hegenbarth,	On the K -theory of the classifying spaces of the general linear groups over finite fields	259
A. Liulevicius,	A reciprocity law for symmetric products of G -sets	266
