<b>Foreword</b>	xiii
<b>Preface</b>	xv
<b>1 Introduction</b>	1
<b>2 Prehistorical evidence of periodontal diseases</b>	2
<b>3 Contributions of ancient civilizations</b>	3
3.1 Near East	3
3.2 China	3
3.3 Egypt	4
3.4 Greece	4
3.5 Etruria and the Roman Empire	5
<b>4 The Middle Ages</b>	7
4.1 Islam	7
4.2 Central Europe	9
4.3 Asia and America	11
<b>5 The 16th and 17th centuries</b>	13
<b>6 The 18th century</b>	16
6.1 Fauchard and some French contemporaries	16
6.2 In England	19
6.3 In Germany	20
<b>7 The 19th century</b>	22
7.1 Emergence of original concepts	22
7.2 Birth of "pyorrhea alveolaris"	23
7.3 Therapy and first preventive measures	23
7.4 From "Riggs' disease" to the "Maladie de Fauchard"	25
7.5 A concept of dento-gingival topography	26
7.6 A first specialist in periodontics	26
7.7 A new orientation: prevention	28
7.8 Era of perfecting instrumentation	29
7.9 Ascension of surgery	29
7.10 The point of view of G. V. Black	30
7.11 Some disciples of Riggs	31
7.12 The birth of the dental hygienist profession	32

7.13	The founding of the American Academy of Oral Prophylaxis and Periodontology	32
7.14	New orientations: incidence possibility of systemic factors	32
7.15	Introduction of dental occlusion in periodontology	33
7.16	The concept of primary alveolar atrophy	34
7.17	Towards an extension of the concept of dentistry	35
7.18	The advent of microbiology	36
<b>8</b>	<b>The first quarter of the 20th century</b>	<b>38</b>
8.1	Two decisive events	38
8.2	Microstructural observations	38
8.3	Two influential French clinicians	40
8.4	Other different procedures	41
8.5	Amoebae and emetine	41
8.6	Problems of nutrition and food consistency	42
8.7	Concept of "pyorrheic diathesis"	43
8.8	A tentative synthesis	43
8.9	Towards more systematized research	44
8.10	The Vienna School	44
8.11	Prolongations in time and space	46
8.12	The concepts of "paradentium" and "paradentose"	47
8.13	Other points of view	49
8.14	Parallel developments on the North American continent	50
<b>9</b>	<b>Dawn of the second quarter of the 20th century</b>	<b>52</b>
9.1	The Innsbruck School	52
9.2	From "paradentoses" to "paradentopathies" via "paradentites"	52
9.3	European impulses on the North American continent	53
<b>10</b>	<b>An important international event in 1926: the Dental Congress in Philadelphia</b>	<b>54</b>
10.1	Introduction	54
10.2	The voice of France	55
10.3	The concept of the Vienna School	56
10.4	The search for concordances	57
10.5	American counterparts	57
10.5.1	Micromorphological contributions	57
10.5.2	Microbiological contributions	59

10.5.3	Modifying effects of nutritional factors	59
10.5.4	Occlusal forces and alveolar bone	60
10.5.5	Interest of radiography in periodontics	61
10.5.6	Rational objectives in therapy	61
10.6	The struggle against infection. Vaccinotherapy	64
10.7	Pioneers in prevention	65
10.8	Questions of terminology	65
<b>11</b>	<b>New orientations</b>	<b>67</b>
<b>12</b>	<b>In the period between the founding of the 'Journal of Periodontology' and the end of the Second World War</b>	<b>68</b>
<b>13</b>	<b>The development of periodontal surgery: parallel evolution on two continents</b>	<b>71</b>
<b>14</b>	<b>European periodontology in 1931; the 8th International Dental Congress in Paris</b>	<b>73</b>
<b>15</b>	<b>Towards the establishment of international exchanges</b>	<b>76</b>
<b>16</b>	<b>The origins of oral biology</b>	<b>78</b>
<b>17</b>	<b>Searching for general predispositional conditions</b>	<b>80</b>
17.1	Alveolar bone and osseous pathology	80
17.1	Investigations on metabolism	80
<b>18</b>	<b>European confrontations: the Vienna Congress 1936</b>	<b>82</b>
18.1	Neuro-vegetative influences	82
18.2	Inflammation as a major determinant	83
18.3	Functional problems	83
18.4	Reaffirmation of the basic concept of "paradentosis"	85
18.5	Persistency of fundamental divergences	86
18.6	The opinion of a pioneer of radical surgery of periodontal diseases	87
18.7	References to systemic metabolic disturbances	88
<b>19</b>	<b>A decisive turn for the dental profession</b>	<b>89</b>
<b>20</b>	<b>New orientations</b>	<b>92</b>
<b>21</b>	<b>Last gleam before a period of obscurity</b>	<b>93</b>
<b>22</b>	<b>Polemic around "paradentose"</b>	<b>94</b>
<b>23</b>	<b>Creation of an international periodical</b>	<b>95</b>
<b>24</b>	<b>Renewal of international relations</b>	<b>97</b>

<b>25</b>	<b>Return to terminology</b>	<b>98</b>
<b>26</b>	<b>Developments in the United States and England between 1940 and 1950</b>	<b>100</b>
<b>27</b>	<b>A conference on periodontal disease, 1950</b>	<b>105</b>
<b>28</b>	<b>Decisions concerning a European classification expressed in Latin (ARPA, Madrid 1951)</b>	<b>106</b>
<b>29</b>	<b>New and varied topics</b>	<b>107</b>
<b>30</b>	<b>Research on the American continent</b>	<b>109</b>
<b>31</b>	<b>European contributions 1950–1955</b>	<b>113</b>
<b>32</b>	<b>Efforts towards Euro-American cooperation</b>	<b>115</b>
<b>33</b>	<b>Classification and nomenclature: a restatement</b>	<b>117</b>
<b>34</b>	<b>The opinion of a European pathologist</b>	<b>119</b>
<b>35</b>	<b>New investigations (1955–1957)</b>	<b>120</b>
<b>36</b>	<b>An important event</b>	<b>123</b>
<b>37</b>	<b>The European Congress, Paris 1958</b>	<b>125</b>
<b>38</b>	<b>Education in periodontology in the United States</b>	<b>127</b>
<b>39</b>	<b>Periodontal surgery</b>	<b>128</b>
<b>40</b>	<b>Research between 1958 and 1960</b>	<b>130</b>
<b>41</b>	<b>International Congress, Vienna 1960</b>	<b>135</b>
<b>42</b>	<b>New observations from 1960 to 1965</b>	<b>137</b>
	42.1 Fundamental research; pathology	137
	42.1 Therapy	139
<b>43</b>	<b>Different opinions, 1963</b>	<b>141</b>
	43.1 Epidemiology, Pathology	141
	43.2 Occlusal problems	141
	43.3 Drug therapy	142
	43.4 Surgery	143
	43.5 General assessments	143
<b>44</b>	<b>Geneva 1964: Some restatements</b>	<b>144</b>
<b>45</b>	<b>Dental hygienists and specialization</b>	<b>145</b>
<b>46</b>	<b>Periodontology at crossroads</b>	<b>146</b>
<b>47</b>	<b>The ‘World Workshop in Periodontics, 1966’</b>	<b>147</b>

<b>48</b>	<b>The investigation period 1965–1970</b>	<b>149</b>
48.1	Structures	149
48.2	Histochemistry	149
48.3	Periodontal physiopathology	150
48.4	Pathology	151
48.5	Dental plaque and calculus	152
48.6	Microbiology and immunology	153
48.7	Mechanical-functional problems	154
48.8	Systemic factors	155
48.9	Periodontal indices and epidemiological studies	155
48.10	Advances in therapy	157
<b>49</b>	<b>Last Congress of ARPA Internationale</b>	<b>161</b>
<b>50</b>	<b>Microstructure of marginal periodontium: a restatement</b>	<b>163</b>
<b>51</b>	<b>The period between 1970 and 1980</b>	<b>165</b>
51.1	Morphological investigations	165
51.2	Gingival fluid	166
51.3	Pathology	167
51.4	Etiology	171
51.5	Occlusion, bruxism	171
51.6	Dental plaque and calculus	172
51.7	Microbiology	173
51.8	Immunology	175
51.9	Epidemiology	176
51.10	Diagnostic procedures	178
51.11	Drug therapy	180
51.12	Surgery	182
51.12.1	Gingivo-dental curettage	182
51.12.2	Gingivectomy	183
51.12.3	Gingivoplasty	184
51.12.4	Osteoplastic surgery	184
51.12.5	Mucogingival surgery	185
51.12.6	Bone transplants	187
51.12.7	Insertion of inert materials	188
51.12.8	Operations on root furcations	188
51.12.9	Tissue repair potential	189
51.12.10	Long-term results of surgical treatment	189

51.13	Auxiliary therapy through dental fixation	190
51.14	Maintenance care and prevention	191
<b>52</b>	<b>European restatement</b>	<b>194</b>
<b>53</b>	<b>Periodontology and the World Health Organization (WHO)</b>	<b>199</b>
<b>54</b>	<b>Addendum</b>	<b>201</b>
<b>55</b>	<b>Summary</b>	<b>203</b>
	<b>References</b>	<b>205</b>
	<b>Author index</b>	<b>247</b>
