Contents

1 Introduction 1
References 4

2 The Basics 5
2.1 Equations for First and Second Order Reactions 5
2.2 Equilibrium Binding to Two Sites 7
2.3 Equilibrium Binding to Any Number of Sites 9
2.4 Writing Differential Equations for Two Site Binding 10
2.5 Writing Differential Equations for Any Reaction Scheme 12
2.6 Analytical and Numerical Solutions 12

3 Classical Analytical Solutions 15
3.1 Analytical Solutions for Equilibrium Binding 15
3.1.1 Direct Binding Curves 15
3.1.2 Double Reciprocal Plots 17
3.1.3 Comparison of Scatchard Plots and Double Reciprocal Plots 18
3.1.4 Lineweaver-Burk Plots 21
3.1.5 Dose–Response Curves and Hill Coefficients 23
3.2 Analytical Solutions for Binding Kinetics 24
3.2.1 Exponential Decay 25
3.2.2 Half-Logarithmic Plots 26
3.2.3 Initial Velocity of Association Kinetics 27
3.2.4 Pseudo First-Order Kinetics 28
3.2.5 Multiple Exponential Fits 28
References 29

4 Getting Started with Octave 31
4.1 Installation Instructions 31
4.2 Typing the First Commands 32

4.3 Writing a Program 34
4.4 Setting Up a Work Environment for Octave: Arrangement of Editor, Terminal, and Plot Window 36
4.5 The MATLAB Environment 37
4.6 Arrays, Vectors, and Matrices 38
4.7 A Very Elementary Tutorial for GNU Octave and MATLAB 39
4.8 Recommended Literature for Octave/MATLAB 40
References 40

5 Equilibrium Binding 43
5.1 Solving Nonlinear Equations for Equilibrium Binding 43
5.2 Equilibrium Binding to One Site (`EQ1.m`) 44
5.3 Equilibrium Binding to Two Sites (`EQ2.m`) 50
5.4 Equilibrium Binding to Two Sites in the Presence of Inhibitor (`EQ3.m`) 52
5.5 Allosteric Interactions of Subunits (`EQ4.m`) 57
5.6 Allosteric Activators and Inhibitors (`EQ5.m`) 62
5.7 Dose–Response Curves (`EQ6.m`) 64
5.8 Multiple Allosteric Inhibition (`EQ7.m`) 67
References 70

6 Binding Kinetics 71
6.1 Solving Differential Equations in GNU Octave and MATLAB 71
6.2 Kinetics of Ligand Binding to One Site (`kin1.m`) 73
6.3 Binding to One Site Followed by a Conformational Change of the Receptor (`kin2.m`) 77
6.4 Dissociation Kinetics: Chase with Inhibitor (`kin3.m`) 81
6.5 Facilitated Dissociation (`kin4.m`) 84
6.6 Sequential Binding and Obstructed Dissociation (`kin5.m`) 87
6.7 Irreversible Inhibition (`kin6.m`) 91
References 95

7 Enzyme Kinetics 97
7.1 Progress Curves (`enz1.m`) 97
7.2 Progress Curves for a Weak Substrate (`enz1b.m`) 99
7.3 Michaelis–Menten Enzyme Kinetics (`enz2.m`) 101
7.4 Lineweaver–Burk Plots from Progress Curves (`enz3.m`) 102
7.5 Substrate Inhibition (`enz4.m`) 107
7.6 Enzyme Inhibition with Reversible Inhibitors (`Enz5.m`) 111
References 118

8 Fitting the Data 119
8.1 Multi-parameter Fits and Correlation of Parameters (`fit1.m`) 119
8.1.1 The Sample Program `fit1.m` 120

8.1.2 Strategies to Fit Correlated Parameters 123
8.2 Experimental Setup 124
8.3 Entering the Experimental Data (`fit2.m`) 125
8.4 Fitting Substrate Inhibition 127
8.4.1 Generating Sample Data (`fit3.m`) 128
8.4.2 Calculating Steady State Equilibria (`fit4.m`) 129
8.4.3 Global Fit of Progress Curves (`fit5.m`) 136
References 141

9 Appendix: Installing GNU Octave for Mac OS and Linux 143
9.1 Installation Instructions for Mac OS X 143
9.2 Installation Instructions for Linux 144
