

Contents

1 Introduction

<i>G. A. Rose</i>	1
Plasma Oxalate/Creatinine Ratio	3
Renal Hyperoxaluria?	3

2 Assay of Oxalate and Glycollate in Urine

<i>G. P. Kasidas</i>	7
Introduction	7
Relevant Chemistry of Oxalate and Glycollate Anions . .	7
Assaying of Oxalate in Urine	9
Methods for the Preliminary Separation of Oxalate from Other Urinary Constituents	10
Analytical Approaches for Determining Urinary Oxalate	12
Ascorbate – a Major Problem in the Assaying of Oxalate in Urine	17
Normal Range for Urinary Oxalate	20
Assaying for Urinary Glycollate	20
Chemical Techniques	20
Physical Techniques	21
Enzymatic Techniques	21
Usefulness of Urinary Glycollate in Determining the Origin of Hyperoxaluria	22
Summary	23

3 Experiences with an External Quality Assessment Scheme for Urinary Oxalate

<i>C. T. Samuel</i>	27
Introduction	27
Urinary Oxalate Assay – the Need for External Quality Assessment	27
Organisation of the Quality Assessment Scheme	28
Details of Participants	28
Preparation and Distribution of Material	29
Results	32
Selection of Data	32
Between-Laboratory Imprecision	32
Accuracy	35
Ascorbate Interference and its Removal	36
Other Observations on Selected Methods	38
Discussion	41
Conclusion	43

4 Assaying of Oxalate in Plasma

<i>G. P. Kasidas</i>	45
Introduction	45
Plasma-Oxalate Determination	46
Separation of Oxalate from Plasma prior to its Measurement	46
In vitro Assays for Plasma Oxalate	46
In vivo Radioisotopic Assays	50
Assaying of Plasma Oxalate at St Peter's Hospitals (London)	51
Plasma Oxalate Levels in Normal and some Pathological States. Clinical Usefulness of Plasma Oxalate	52
Normal Subjects	52
Patients with Renal Failure with or without Primary Hyperoxaluria	52
Circadian Variation of Plasma Oxalate. Implications for Oxalate Clearance	55
Conclusions and Summary	61

5 Primary Hyperoxaluria

<i>R. W. E. Watts and M. A. Mansell</i>	65
Clinical Aspects	65
Biochemistry	66
General	66
The Metabolic Lesion in Type I Primary Hyperoxaluria	67

The Metabolic Lesion in Type II Primary Hyperoxaluria	69
Primary Hyperoxaluria Type III	69
Investigation and Evaluation of Patients with Primary Hyperoxaluria	70
Treatment	73

6 Primary Hyperoxaluria in Children

<i>T. M. Barratt, Vanessa von Sperling, M. J. Dillon, G. A. Rose and R. S. Trompeter</i>	83
Introduction	83
Clinical Features	85
Age and Sex	85
Presentation	85
Infantile Oxalosis	87
Older Children	89
Biochemical Features	89
Urine Oxalate in Normal Children	89
Hyperoxaluria	91
Glycollate	92
Diagnosis in Renal Failure	92
Progress	93
Renal Function	93
Systemic Oxalosis	94
Treatment	95
Simple Measures	95
Pyridoxine	95
Surgery and Lithotripsy	97
Dialysis and Transplantation	97
The Future	99
Antenatal Diagnosis	99
Liver Transplantation	99

7 Enteric and Other Secondary Hyperoxalurias

<i>D. S. Rampton and M. Sarner</i>	103
Introduction	103
Oxalate Metabolism and Secondary Hyperoxaluria	103
Pathogenesis of Enteric Hyperoxaluria	105
Glyoxylate Theory	105
Origin of Excess Urinary Oxalate	105
Reasons for Hyperabsorption of Dietary Oxalate	106
Clinical Importance of Enteric Hyperoxaluria	110
Renal Complications	110
Screening for Steatorrhoea with the Oxalate Loading Test	111

Treatment of Enteric Hyperoxaluria	112
Dietary Measures	113
Drug Therapy	114
Surgical Treatment	115
Summary	115

8 Mild Metabolic Hyperoxaluria. A New Syndrome

<i>G. A. Rose</i>	121
Introduction	121
Historical	121
Clinical Details of Patients	122
Link with Other Conditions	122
Response to Pyridoxine	124
Aetiology	127
Have Others Seen MMH?	129
Effect of Pyridoxine on Stone Formation	129

9 Oxalate Crystalluria

<i>P. C. Hallson</i>	131
Introduction	131
Crystal Types Seen by Light Microscopy at 37°C	132
Calcium Oxalate	132
Calcium Phosphate	132
Investigating Crystalluria	134
Inducing Crystallisation	134
Generating Crystals by Evaporation	135
Quantitative Crystal Measurements	136
Determining Relative Amounts of Calcium Oxalate Crystals	136
Absolute Quantities of Calcium Oxalate Crystals	136
Chemical Analysis of Urinary Crystals	137
Recent Studies of Crystalluria	139
Crystal Sizes	139
"Eroded" Envelope Oxalate Crystals	139
The Importance of Urinary Oxalate in Calcium Oxalate Crystalluria	141
Microscopy of Urinary Oxalate Crystals	142
Aggregation of Envelope Oxalate Crystals	145
Role of Urinary Calcium Concentration in Oxalate Crystalluria	146
Urine Osmolality and Calcium Oxalate Crystalluria	150
Osmolality and Calcium Phosphate Crystalluria	150
pH Effects on Crystalluria	153
Microscopy Findings	153

Effect on Crystalluria of Urinary pH	155
Inhibitors of Calcium Oxalate Crystallisation	160
Summary	163

10 Renal Failure and Transplantation in Primary Hyperoxaluria

<i>M. A. Mansell and R. W. E. Watts</i>	167
Introduction	167
Clinical Aspects	167
Medical Care	168
Surgical Care	168
Systemic Oxalosis	170
Peritoneal Dialysis and Haemodialysis	170
Renal Transplantation	172
Combined Hepatic and Renal Transplantation	174
Conclusion	174

11 Vitamin B6 Metabolism in Relation to Metabolic Hyperoxaluria

<i>P. K. S. Liu and G. A. Rose</i>	177
Introduction	177
Structure and Function of Vitamin B6	177
Vitamin B6 and Hyperoxaluria	177
Methods for Studying Pyridoxine Metabolism	179
Analytical Problems	179
Present Methods Available	179
A Simple HPLC Method for Studying Vitamin B6 Metabolism	180
Apotryptophanase Assay	180
Urinary Pyridoxic Acid Assay	180
Evaluation of Plasma Vitamin B6 Methods	180
Separation of Vitamin B6 Standards	180
Calibration of HPLC System	181
Chemical Recovery of B6 Vitamers from Plasma	181
Precision of HPLC Assay for Vitamin B6	182
Correlation between HPLC and Enzymatic Method for Plasma PLP	182
Correlation between Two Methods for Pyridoxic Acid	183
Physiology of Pyridoxine	183
Diurnal Rhythm of Plasma PLP in Normal Subjects	183
Effect of a Single Dose of 200 mg Pyridoxine	185
Reference Plasma PLP Values	185
Plasma B6 Profile from a Normal Subject	186

Plasma B6 Profiles from Individuals on Pyridoxine Supplements	186
Half-Life of Plasma Pyridoxine	188
Effect of Dose of Pyridoxine on Plasma Levels of Vitamins	188
Plasma Levels of Vitamin B6 in Metabolic Hyperoxalurias	190
Urinary Excretion of Pyridoxic Acid after Load of Pyridoxine	191
Subject Index	193
