

TABLE OF CONTENTS

K. ALLADI,	A study of the moments of additive functions using Laplace transforms and sieve methods	1
B. BALASUBRAMANIAN and K. RAMACHANDRA,	A hybrid version of a theorem of Ingham	38
B.C. BERNDT,	Remarks on some of Ramanujan's number theore- tical discoveries found in his second notebook . .	47
S. BHARGAVA and Ch. ADIGA,	Two generalizations of Ramanujan's continued fraction identities	56
H. DIAMOND and H. HALBERSTAM,	The combinatorial sieve	63
P. ERDÖS,	On some of my problems in number theory I would most like to see solved	74
P. ERDÖS, A. SARKÖZY and V.T. SOS,	Problems and results on additive properties of general sequences, IV. . . .	85
F. GRUPP and H.-E. RICHERT,	The functions of the linear sieve	105
J. HANUMANTHACHARI,	An extended Nagell totient and related Ramanujan sums	115
R. JAGANNATHAN,	On projective representations of finite Abelian groups	130
V.S. JOSHI,	Sums of reciprocals of some non-vanishing multiplicative functions	140
I. KATAI,	A remark on a paper of K. Ramachandra	147
S.A. KATRE,	Jacobsthal sums in terms of quadratic partitions of a prime	153
V. KUMAR MURTY,	Fourier coefficients of modular forms	163
C. POMERANCE,	On the distribution of round numbers	173
S. SRINIVASAN,	Some remarks in number theory	201
A. VERMA and V.K. JAIN,	Basic analogues of transformations of nearly-poised basic hypergeometric series . . .	206
