

Contents

1. Introduction	1
1.1 A Little History	1
1.2 Null Elements and Simple Spinors	6
1.3 About the Present Work	10
1.4 Motivation and Outlook	13
2. Notation and Terminology	16
3. Vector Spaces and Inner Products	23
3.1 Complex Structure in a Real Vector Space	23
3.2 Quaternionic Structure in a Real Vector Space	24
3.3 Complex Conjugation and Hermitean Forms	26
3.4 Real and Quaternionic Structures in a Complex Vector Space	29
3.5 Inner Products in Vector Spaces	31
4. Algebras and Their Representations	37
4.1 Definitions	37
4.2 Simple Algebras	41
4.3 Antiautomorphisms and Inner Products	42
4.4 Real Algebras	46
4.5 Graded Algebras	50
5. General Properties of Clifford Algebras	54
5.1 Definition and General Properties of Clifford Algebras	54
5.2 The Vector Space Structure of Clifford Algebras	57
5.3 The Graded Structure of Clifford Algebras	61
5.4 The Volume Element and Hodge Duality	66
5.5 Relation Between the Clifford Algebras of Vector Spaces of Adjacent Dimension	69

6. Complex Clifford Algebras	71
6.1 Dirac and Weyl Spinors	71
6.2 The Inner Products	73
6.3 Extensions of Representations	76
6.4 The Wall Groups	81
7. Real Clifford Algebras	84
7.1 The Index Periodicity	84
7.2 Charge Conjugation and Majorana Spinors	90
7.3 The Dirac Forms	100
7.4 Clifford Algebras of Euclidean Spaces	104
7.5 The Spinorial Chessboard	109
7.6 Summary	116
