Preface	xi
Contributors	xii
1 Facial, Scalp, Neck, Hands, Lower Extremities, and Genital Anatomy	1
<i>Shauna Higgins, Marissa B. Lobl, and Ashley Wysong</i>	
1.1 Introduction	1
1.2 Head and Neck	1
1.2.1 Cosmetic Units and Facial Fat Pads	1
1.2.2 Superficial Landmarks	2
1.2.3 Muscles	3
1.2.4 Innervation	4
1.2.5 Vasculature	8
1.2.6 Special Considerations	11
1.3 Hand	12
1.3.1 Innervation	12
1.3.2 Vasculature	13
1.3.3 Fascia and Soft Tissue	14
1.3.4 Nail Anatomy	14
1.4 Lower Extremities	15
1.4.1 Innervation	16
1.4.2 Vasculature	17
1.4.3 Toe Nails	19
1.5 Genitalia	19
1.5.1 Female Genital Anatomy	19
1.5.2 Male Genital Anatomy	21
1.6 Conclusion	22
2 Reconstruction of the Forehead Unit	25
<i>Ardeshir Edward Nadimi, Sonal A. Parikh, and Vishal Anil Patel</i>	
2.1 Introduction	25
2.1.1 Anatomy	25
2.2 Aesthetic Subunits	28
2.2.1 Central Subunit	30
2.2.2 Lateral Subunit	33
2.2.3 Temple Subunit	35
2.2.4 Eyebrow Subunit	37
2.3 Massive Forehead Defects	38
2.4 Tissue Expansion	39
2.4.1 Introduction	39
2.4.2 Intraoperative Tissue Expansion	39
2.4.3 Internal and External Tissue Expanders	39
2.5 Conclusion	40
3 Reconstruction of the Nasal Unit	41
<i>Ian Maher, Jamie L. Hanson, and Gabriel Amon</i>	
3.1 Structure and Function	41
3.2 Skin Characteristics	41
3.3 Nasal Subunits	41
3.4 Keys to Success	41
3.5 Local Reconstruction of Subunits	42
3.5.1 Mobile Subunits	42
3.5.2 Immobile Subunits	43
3.5.3 Large or Multisubunit Defects	48
3.6 Conclusion	50

4	Reconstruction of the Eyelid Units	54		
	<i>Anne Barmettler</i>			
4.1	Eyelid Reconstruction	54	4.3.1	Skin-Only Defects
			4.3.2	Full-Thickness Defects (Skin and Tarsal Defects)
4.1.1	Location	55	4.3.3	Key Points
4.1.2	Depth	55		
4.1.3	Size	55	4.4	Lateral Canthal Subunit
4.2	Lower Lid Unit	55	4.4.1	Key Points
			4.5	Medial Canthal Subunit
4.2.1	Skin-Only Defects	55	4.5.1	Key Points
4.2.2	Full-Thickness Defects (Skin and Tarsal Defects)	56	4.6	Conclusion
4.2.3	Key Points	60		
4.3	Upper Lid Unit	60		
5	Reconstruction of the Cheek	63		
	<i>Jenna Wald and C. William Hanke</i>			
5.1	Introduction	63	5.6	Zygomatic Subunit
5.2	Anatomy	63	5.6.1	Primary Closure
			5.6.2	V-Y Advancement Flap
5.2.1	Soft Tissue	63	5.7	Lateral Subunit
5.2.2	Innervation	64	5.7.1	Advancement Flap with Burow's Triangle
5.2.3	Vascular Supply/Lymphatics	64	5.8	Buccal Subunit
5.3	Clinical Considerations	64	5.8.1	Primary Closure
5.4	Algorithm for Cheek Reconstruction	65	5.8.2	Transposition Flap
5.5	Medial Subunit	66		
5.5.1	Advancement Flap	68		
5.5.2	Rotation Flap	69		
5.5.3	V-Y Advancement Flap	70		
6	Reconstruction of the Upper and Lower Lip Unit	77		
	<i>Gian Vinelli, Ramone F. Williams, David H. Ciocon, and Anne Truitt</i>			
6.1	Anatomic Considerations	77	6.4	Lower Lip Reconstruction
6.2	Approach to Reconstruction of the Lip Unit	79	6.4.1	Cutaneous Lower Lip with or without Vermilion Involvement
6.3	Upper Lip	79	6.5	Vermilion Involvement Only
			6.5.1	Less than One-Third of the Lip Length
6.3.1	Philtral Subunit	79	6.5.2	Greater than One-Third of the Lip Length
6.3.2	Philtral Subunit: Vermilion Lip Only	85		
6.3.3	Lateral Subunits	86		
6.3.4	Vermilion Lip Only	89		

7	Reconstruction of the Mental Unit	97		
	<i>Thomas K. Barlow, Arjun Dayal, and Vineet Mishra</i>			
7.1	Anatomy	97	7.4	Lateral Chin
				104
7.2	Defects and Repairs	99	7.4.1	Lateral Chin Key Points
				105
7.3	Central Chin	100	7.5	Submental Chin
				105
7.3.1	Central Chin Key Points	104		
8	Reconstruction of the Ear	108		
	<i>David G. Brodland</i>			
8.1	Basic Concepts in Reconstruction of the Ear	108	8.2	Antihelix and Conchal Bowl
				115
8.1.1	Superior Helix	110	8.3	Posterior Ear Defects
8.1.2	Mid Helix	112		118
8.1.3	Earlobe/Inferior Helix	114		
9	Reconstruction of the Neck Unit	122		
	<i>Merrick A. Brodsky, Saud Aleissa, and Anthony Rossi</i>			
9.1	Anatomy of the Neck	122	9.2.1	Primary Closure
				124
9.1.1	Anterior Cervical Triangle	122	9.2.2	Secondary Intention Healing
9.1.2	Posterior Cervical Triangle	122		124
9.1.3	Platysma	123	9.2.3	Skin Grafts
				124
9.2	Reconstruction	124	9.2.4	Skin Substitutes
				125
			9.2.5	Skin Flaps
				126
			9.2.6	Complications
				126
10	Reconstruction of the Scalp	128		
	<i>Adam J. Tinklepaugh and Rachel Westbay</i>			
10.1	Scalp Anatomy	128	10.4	Choosing the Reconstructive Approach
				131
10.1.1	Soft-Tissue Layers	128	10.4.1	Second Intention
10.1.2	Vascular Supply and Lymphatics	129		131
			10.4.2	Primary Closure
10.2	Preoperative Evaluation	130		132
			10.4.3	Skin Grafting
10.2.1	Evaluating the Patient	130		133
10.2.2	Evaluating the Defect	130	10.4.4	Local Flaps
				135
10.3	Essential Concepts in Scalp Reconstruction	130	10.4.5	Regional Flaps
				139
10.3.1	Reconstructive Goals	130	10.4.6	Microsurgical Free Tissue Transfer
10.3.2	Surgical Principles	130		140
			10.4.7	Piecemeal Closure
				141
			10.5	Adjuvant Surgical Techniques
				141
			10.5.1	Tissue Expansion
				141
			10.6	Algorithm for Scalp Reconstruction ...
				142

11	Reconstruction of the Hand and Nail Unit after Mohs Surgery	146		
	<i>Evelyn R. Reed, Thomas J. Wright, Madison E. Tattini, and Shaun D. Mendenhall</i>			
11.1	Introduction	146	11.4.1	Anatomy
			11.4.2	Reconstruction
11.2	Cutaneous Malignancies of the Hand ...	146		
11.2.1	Nonmelanoma Skin Cancers of the Hand ...	146	11.5	Thumb
11.2.2	Treatment for NMSC of the Hand	146	11.5.1	Anatomy
11.2.3	Melanoma of the Hand	146	11.5.2	Reconstruction
11.2.4	Treatment for Melanoma of the Hand	147		
11.3	Dorsum of Hand	147	11.6	Nail Plate and Nail Bed
11.3.1	Anatomy	147	11.6.1	Anatomy
11.3.2	Reconstruction	148	11.6.2	Reconstruction
11.4	Dorsal Surface of Fingers	150	11.7	Conclusion
				157
12	Reconstruction of the Genital	160		
	<i>Jenny C. Hu and Richard G. Bennett</i>			
12.1	Anatomy	160	12.3.1	Reconstruction of the Male External Genitalia
12.1.1	Anatomy of the Male External Genitalia. ...	160	12.3.2	Reconstruction of the Female External Genitalia
12.1.2	Anatomy of the Female External Genitalia	160	12.3.3	Reconstruction of the Perineum
12.1.3	Anatomy of the Perineum	161	12.4	Conclusion
12.2	Anesthesia	161		165
12.3	Reconstruction	162		
13	Reconstruction of Lower Legs	166		
	<i>Kira Minkis, Thomas S. Bander, and Kristina Navrazhina</i>			
13.1	Introduction	166	13.4	Postoperative Care Following Lower Extremity Reconstruction
13.2	Anatomy of Lower Extremity	167		174
13.2.1	Arterial Supply	167	13.4.1	Dressings
13.2.2	Venous Drainage	168	13.4.2	Unna Boot
13.2.3	Cutaneous Innervation	168	13.4.3	Postoperative Immobilization
13.3	Reconstructive Approaches for Lower Extremity Defects	168	13.5	Complications
13.3.1	Preoperative Consultation	168	13.5.1	Infection
13.3.2	Overview of Reconstructive Approaches ...	169	13.5.2	Dehiscence
13.3.3	Secondary Intention Healing	169	13.5.3	Contact and Stasis Dermatitis
13.3.4	Linear Repair	169	13.5.4	Hematoma or Seroma
13.3.5	Skin Grafts	169	13.5.5	Management of Scarring
13.3.6	Random Pattern Flaps	173	13.6	Conclusion
13.3.7	Perforator Flaps	173		181

14	Reconstruction of Scars	185		
	<i>Jill Waibel, Chloe Gianatasio, and Rebecca Lissette Quinonez</i>			
14.1	Introduction: Why Do We Scar?	185	14.4.5	Textural Irregularities
			14.4.6	Atrophic and Hypopigmented Scars
14.2	Types of Scars	185	14.4.7	Excision/Punch Biopsies
			14.4.8	Laser
14.2.1	Atrophic	185	14.4.9	Laser-Assisted Delivery
14.2.2	Hypertrophic	185	14.4.10	Hypopigmentation
14.2.3	Keloid	186	14.4.11	Atrophy
14.2.4	Contracture	186	14.4.12	Fat Grafting
14.3	Scar Prevention	186	14.4.13	Other Techniques (Hyaluronic Acid Filler, Subcision)
			14.4.14	Hypertrophic and Keloid Scars
14.3.1	Early Intervention	186	14.4.15	Surgery
14.3.2	Passive and Active Therapies	187	14.4.16	Z-Plasty
14.3.3	To Skin Graft or not to Skin Graft	188	14.4.17	W-Plasty
14.4	Scar Revision	188	14.4.18	Laser
			14.4.19	Laser-Assisted Delivery
14.4.1	Discoloration	188	14.4.20	Adjuvant Therapies
14.4.2	Laser Treatment of Erythema	188	14.4.21	Combination Treatment
14.4.3	Laser Treatment of Pigmentation	189	14.5	Conclusion
14.4.4	Discoloration in Hypertrophic and Keloid Scars	190		
15	Mohs and Melanoma	198		
	<i>John A. Zitelli</i>			
15.1	Melanoma In Situ and Malignant Melanoma	198	15.5	Slow Mohs and Other Staged Excisions
15.2	Treatment	198	15.6	Local Recurrence after MMS
15.3	Indications for MMS	199	15.7	Reconstruction after Clear MMS Margins
15.4	Mohs Micrographic Surgery: Procedure	199	15.8	Controversies
15.4.1	Technique	199		
15.4.2	Positive Margins	200		
16	Prevention and Repair of Internal Nasal Valve Dysfunction for the Reconstructive Surgeon	204		
	<i>Parth Patel, Ethan T. Routt, Ziad M. Alshaalan, and David H. Ciocon</i>			
16.1	Introduction	204	16.4	Patient Selection/Considerations
16.2	Modalities/Treatment Options Available	205	16.5	Noninvasive Techniques
16.3	Indications and Evaluation of INV Dysfunction	205	16.6	Invasive Techniques: Suspension Sutures

16.6.1	Nasal Valve Suspension toward the Orbital Rim	207	16.8	Invasive Techniques: Repositioning and Reallocation of Scar Tissue.....	209
16.6.2	Nasal Valve Suspension toward the Lateral Side of the Nasal Bone	207	16.9	Postoperative Instructions.....	209
16.6.3	Nasal Valve Suspension toward Local Tissue	207	16.10	Potential Complications and their Management	209
16.7	Invasive Techniques: Cartilage Grafts	208	16.11	Pearls/Pitfalls	209
Index.....					212
