1 Examination of the Fetus and the Neonatal Autopsy

Colin L. Berry

History	2
Dimensions	2
Weights	3
Dating	3
Chronology of Early Pregnancy in Man	3
External Examination	3
Internal Examination	4
Abnormalities of Specific Systems	5
Blighted Ova	7
Normal Organ Weights in the Fetus	8
Some Normal Histological Appearances During Development	8
The Neonatal Autopsy	31
Check Lists for a Paediatric Autopsy	38

2 Congenital Malformations

Colin L. Berry

Genetics of Common Malformations	43
Chromosomal Abnormality and Malformations	49
Specific Human Teratogens	51
Infectious Causes of Abnormal Development	58
Paternal Effects of Teratogens	59

3 Cardiac Pathology

Anton E. Becker and Robert H. Anderson

Autopsy Technique	63
Sequential Segment Analysis of the Heart	68
Congenital Heart Disease	77
Congenital Malformations of the Aorta	107
Congenital Malformations of the Central Pulmonary Arteries	110
Isolated Congenital Abnormalities of Endo-, Myo- and Pericardium	110

Congenital Heart Block	111
Complications of Congenital Heart Disease	113
Syndromes Commonly Associated with Cardiovascular Malformations	116
Cardiac Tumours	120

4 Central Nervous System

Joseph F. Smith

Development	125
Reactions to Injury in the Nervous System	130
Malformations	133
Nutritional, Toxic and Metabolic Degenerative Conditions	141
Kernicterus	148
Vascular and Hypoxic Damage	150
Epilepsy	162
Trauma	163
Infections	163
Tumours	174
Hydrocephalus	186

5 Gastrointestinal System

Colin L. Berry and Jean W. Keeling

Embryology	195
Facial and Oral Abnormalities	198
Salivary Glands	204
Oesophagus	204
Stomach	208
Duodenum	212
Pancreas	214
Small Bowel	218
Hirschsprung's Disease	237
Malformations of the Anus and Rectum	240
Polypoid Lesions of the Large Bowel	244
Appendix	247
Ulcerative Colitis	247
Crohn's Disease	248
Perforation of the Large Bowel	248
Hernias	248
Pneumatosis Intestinalis	249
Malignant Tumours	249

6 Liver and Gallbladder

Colin L. Berry and Jean W. Keeling

Embryology	257
Anomalies of Position, Form and Size	257
Cystic Disease	258
Erythroblastosis Fetalis	261
Neonatal Jaundice	261

Metabolic Defects Causing Unconjugated Hyperbilirubinaemia	263
Inherited Metabolic Disease	264
Giant Cell Transformation and Intrahepatic Cholestasis	267
Obstructive Jaundice	270
Intravenous Alimentation	273
Infections	274
Reye's Syndrome	277
Kwashiorkor	280
Cirrhosis	280
Thalassaemia	281
Mucoviscidosis	281
Budd–Chiari Syndrome	283
Trauma	283
Tumours	284
Gallbladder	287
Cholecystitis	290
Cholelithiasis	290

7 Respiratory System

Jerry N. Cox

Development and Structure	293
Larynx	293
Trachea	293
Lungs	294
Pathology	297
Nose and Nasopharynx	297
Larynx and Trachea	312
Lungs	320
Bronchial Lesions	371
Lung Involvement in Metabolic Diseases	376
Tumours	376

8 Diseases of the Kidney and Lower Urinary Tract

R. Anthony Risdon

Embryology	409
Congenital Anomalies	410
Cystic Diseases of the Kidney	419
Renal Diseases Principally Affecting the Glomeruli	425
Renal Vascular Disease	439
Renal Infection	443
Urolithiasis	449
Hereditary Abnormalities of Renal Tubular Transport	449
Renal Tumours	452
Renal Pelvis, Ureter, Bladder and Urethra – Embryology	454
Renal Pelvis and Ureter	455
Bladder	457
Urethra	459
Disorders of Differentiation of the Genital Tract	459

9 Diseases of Bones and Joints*Peter A. Revell*

Normal Development of the Skeletal System	467
Abnormal Development	470
Skeletal Abnormalities Developed Later in Childhood or Adolescence	476
Osteogenesis Imperfecta	478
Hyperostosis (Osteosclerosis)	480
Inborn Errors of Metabolism	482
Metabolic Disorders Related to Bones	486
Endocrine Disorders and the Skeleton	487
Skeletal Changes in Haematological Disorders	489
Chronic Polyarthritis	490
Infections of Bones and Joints	492
Tumours and Tumour-like Conditions	495

10 Muscle and Peripheral Nerve*Michael Swash*

Muscle Biopsy Techniques	511
Histological Features of Neuromuscular Disease	514
Classification of Neuromuscular Disorders	526
Myopathic Disorders	526
Inflammatory Myopathies	541
Myasthenia Gravis	542
Neurogenic Disorders	544
Diseases of Peripheral Nerve	545

11 Spleen, Lymph Nodes and Immunoreactive Tissues*Colin L. Berry and Peter A. Revell*

Embryogenesis and Development	565
Fetal Immunoreactivity	569
Immune-deficiency States	570
Other Diseases of the Thymus	582
Anatomical Abnormalities of the Spleen	585
Effects of Splenectomy	585
Cysts, Hamartomas and Heterotopias	585
Storage Disorders	585
Histiocytosis X	587
Leukaemia	590
Malignant Lymphomas	591

12 Endocrine Pathology in Paediatrics*Christopher L. Brown*

Adrenal Cortex	607
Adrenal Medulla and Paraganglia	616
Pancreatic Islets	618
Multiple Endocrine Neoplasia Syndromes	623
Parathyroid Glands	625
Pituitary	630

Thyroid	633
Hormonal Effects of Gonadal Tumours	644
Ectopic Hormone Syndromes Associated with Tumours	646
13 Infectious Diseases	
<i>Ronald O. C. Kaschula</i>	
Infections in Newborn Infants and Fetuses	653
Infections in Malnourished Children	671
Tuberculosis and Other Mycobacterial Infections	678
Bacterial Infections	682
Viral Infections	693
Mycoplasma and Ureaplasma Infections	708
Fungal Infections	709
Protozoal Infections in Childhood	714
Rickettsial Diseases	727
14 Metabolic Disorders: General Considerations	
<i>Brian D. Lake</i>	
Blood Film Examination	738
Bone Marrow Examination	743
Urine Examination	747
Neuronal Storage Disease: Diagnosis by Rectal Biopsy	748
Glycogen Storage Disease	752
Other Tissues and Techniques	757
15 Embryonic Tumours of Children	
<i>Colin L. Berry and Jean W. Keeling</i>	
Aetiology	766
Retinoblastoma	767
Neuroblastoma	769
Medulloblastoma	773
Nephroblastoma	776
Rhabdomyosarcoma	783
Hepatoblastoma	785
Teratomas	789
Second Malignant Neoplasms in Children Surviving Embryonic Tumours	793
16 A. Sudden Unexpected Infant Death	
B. Non-accidental Injury	
<i>Jean W. Keeling</i>	
A. Sudden Unexpected Infant Death	797
Epidemiology	798
Necropsy Technique	799
Necropsy Findings	800
Pathogenesis	804
B. Non-accidental Injury	810
Necropsy Examination	811
Pathological Findings	812
Subject Index	821
