

Table of Contents

1 Introduction

1.1	What Do We Mean by Expert System?	1
1.2	What Is Prolog?	3
1.3	Which Implementation of Prolog Are We Using?	5
1.4	How Is This Lab Structured?	6

2 Characteristics and Components of an Expert System

2.1	The Concept and Areas of Application	9
2.2	Human Versus Machine Knowledge	11
2.3	Knowledge Base and Knowledge Bank	14
2.4	Rule Knowledge	16
2.5	The Inference Engine	18
2.6	Instantiation of Variables	19
2.7	Applications Problems	20
2.8	Classification of Typical Expert Systems	22

3 A Model System for Transit Fare Information

3.1	The Problem	27
3.2	Transit Fare Rules	28
3.3	Conducting a Dialog	29
3.4	Control Structure and the Rule Interpreter	32
3.5	Gathering Case Data	34
3.6	The Inference Tree and Protocolling	38
3.7	Explanations	42
3.8	Equivalent Answers	47
3.9	Weaknesses and Possible Improvements	48

4 The Representation and Processing of Knowledge

4.1	System Architecture	51
4.2	System Development	53
4.3	Modularization	55
4.4	Knowledge Structures and Deductive Mechanisms	58
4.5	Production Systems	61
4.6	The Direction of Chaining	62

4.7	Inference Trees	65
4.8	Rule Modification and Non-monotonic Logic	67
4.9	Control of Flow	68
5 Dialog and Explanatory Components		
5.1	Implicit Dialog Texts	71
5.2	The Structure and Processing of Rules	76
5.3	Facts and Degrees of Certainty	78
5.4	The Inference Engine	80
5.5	Gathering Case Data	81
5.6	Vague Knowledge	84
5.7	Instructing the User to Perform a Test	86
5.8	Explaining the Reason for a Question	91
5.9	Presenting and Explaining the Results	93
5.10	"Why Not" Explanations	95
5.11	Listing the Current Contents of the Fact Base	99
5.12	Shortcomings and Possible Improvements	101
6 "Experience" and "Learning"		
6.1	User Hunches	103
6.2	Diagnostic Phases	104
6.3	Heuristics	109
6.4	Diagnostic Statistics	115
6.5	Learning from Experience	117
6.6	Shortcomings and Possible Improvements	119
7 Object-Oriented Knowledge Management		
7.1	Objects, Instances and Classes	121
7.2	Representing Objects with Frames	122
7.3	The Organization of an Object Base	125
7.4	Primitive Operations for Managing Objects	126
7.5	The Knowledge Base for Software License Administration	129
7.6	The Primitives for Accessing Objects	133
7.7	Displaying Complex Structures	138
7.8	The "System" as an Object	143
7.9	Shortcomings and Possible Improvements	145
8 Frames and Procedures		
8.1	Interactive Definition of New Objects	147
8.2	The Dialog for Constructing a New Object	152
8.3	Acquiring and Evaluating User Input	153
8.4	Procedural Components	157
8.5	Managing Free Format Text in External Memory	160

8.6	Assistance Systems for Information Preparation	167
8.7	Building an "Intelligent" Index Manager	169
8.8	Shortcomings and Possible Improvements	173
9 The Representation and Use of Constraints		
9.1	Configuration and Selection Systems	175
9.2	The "Coupling Expert"	176
9.3	Functions and the Structure of Knowledge	177
9.4	Characteristic Object Data	181
9.5	Entering and Displaying Objects	184
9.6	Primitive Access Predicates	187
9.7	Representation of the Computational Formulas	189
9.8	Constraints on the Coupling Selection	191
9.9	The Complete Analysis of a Coupling	196
10 Embedding the System		
10.1	Dialog Flow	199
10.2	The Menu Interface	200
10.3	Displaying Objects	205
10.4	The Selection of Objects	208
10.5	Maintaining a Protocol	217
10.6	Applying Metaknowledge	219
10.7	Preparing a Suggestion for Coupling Construction	221
10.8	Shortcomings and Possible Improvements	224
11 Software Development Methodology		
11.1	"Knowledge-Based" Software Technology	227
11.2	Project Flow	228
11.3	Problem Specification	233
11.4	The Prototype	235
11.5	The Organization of Knowledge	238
11.6	Inference Strategies	240
11.7	Modularization of the Knowledge Base	241
11.8	Knowledge Representation	242
11.9	Representing Metaknowledge	245
11.10	Metasystems	247
11.11	Project Execution	249
Appendix		
A The "MTA Expert"		
A.1	Start-up Procedure	253
A.2	Module "mta"	253

A.3	Module “controlling”	254
A.4	Module “dialog”	256
A.5	Module “explanation”	258
A.6	Module “aux_programs”	261
A.7	Module “rule_base”	262

B The System for Finding Defects in Automobile Heaters

B.1	Start-up Procedure	265
B.2	Module “main_prog”	265
B.3	Module “knowledge_base”	267
B.4	Module “test_aids”	268
B.5	Module “dialog”	273
B.6	Module “aux_predicates”	278
B.7	Module “init”	280
B.8	Module “explanation”	281
B.9	Module “hypotheses”	284
B.10	Module “learn”	286
B.11	Module “endless”	287

C The License and Memo Manager

C.1	Initialization Procedure	289
C.2	Start-up Procedure	289
C.3	Module “primitives”	289
C.4	Module “frames”	301
C.5	Module “attachments”	303
C.6	Module “help”	304
C.7	Module “memos”	306
C.8	Module “input_output”	310

D The “Coupling Expert”

D.1	Start-up Procedure	315
D.2	Module “drive”	315
D.3	Module “load”	316
D.4	Module “assembly”	318
D.5	Module “coupling”	319
D.6	Module “frame”	326
D.7	Module “gen_frames”	329
D.8	Module “reading”	337
D.9	Module “show”	338
D.10	Module “fillout”	339
D.11	Module “constraints”	343
D.12	Module “procedures”	344
D.13	Module “requirement”	347

D.14 Module “controlling”	348
D.15 Module “auxiliary_pred”	353
D.16 Module “explanation”	356
D.17 Module “metaknowledge”	358
Further Reading	361
Bibliography	365
Subject Index	369
